LITEPAPER VERSION 1

DECENTRALIZED COMMUNITY INVESTMENT PROTOCOL

06 / 14 / 2021

<https://DCIP.finance>

DCIP (Decentralized Community Investment Platform) is the first investment as a service (IaaS) token on the BEP20 network.

The investments on our platform are fully decided by the token holders and will be verified and saved within our smart contract.

Not only is DCIP the first token to launch as an IaaS platform, but we are also the first platform to have a fully decentralized voting option in our smart contract.

Unlike other tokens launching on the BEP20 network, we have a REAL use case, which is not limited to the BEP20 network. With the continuous evolvement of Blockchain products, new opportunities will pop up for our platform, our investments are not bound to any chain, only the re-distribution of the profit is bound to the BEP20 chain.

Our goal is to take over traditional investments as we know them today, with no need for expensive hedge funds, investment bankers, or wealth managers. With DCIP we will bring the power back to the people!

O U R U N I Q U E F E A T U R E S

BUILT IN VOTING //

Our smart contract has a built in voting system to ensure that all investments are community led decisions

PUNISHMENT TAX //

All sales that happen within 24 hours of holding will have a 7% extra tax, which will be distributed to the holders*

ANTI-WHALE //

Our contract has a built-in maximum. The maximum transaction amount is capped at 0.1% of the total supply

* See our tokenomics for reference

INITIAL SUPPLY

1,000,000,000,000,000

CHAIN

BEP20

TOKEN ALLOCATION

■ Burned at launch (50%) ■ Dev / Marketing (5.5%)
■ Pre-sale / Private-sale (44.5%)

FEE BREAKDOWN

10% Standard tax

3% Liquidity

1% Marketing wallet

2% Community investment wallet

2% Burned

2% Redistributed to holders who hold longer than 24 hours

Total: 10%

7% Punishment tax *

Swaps within 24 hours:

4% Community investment wallet

1% Burned

2% Redistributed to holders who hold longer than 24 hours

Total: 7%

10% Will be applied on both buy and sell orders on CEX Trading.

*Punishment tax is only valid for swaps within 24 hours of holding, after 24 hours no extra tax will be applied

BREAKDOWN OF TOKENS AFTER SALE

445,000,000,000,000

TOTAL RUNNING SUPPLY

RUNNING SUPPLY

Private sale* (42%) Pre Sale* (38%)
Pancakeswap* (20%)

* ABOVE PERCENTAGES ARE BASED ON THE HARD CAPS OF THE PRIVATE AND PRE SALE

PRIVATE SALE

1 BNB =
750.000.000.000 DCIP

SOFT CAP:
125 BNB

HARD CAP:
250 BNB

Tokens in private sale are subject to token lock for 5 months, each month 20% of the tokens will "unlock"

PRE SALE

1 BNB =
450.000.000.000 DCIP

SOFT CAP:
188 BNB

HARD CAP:
375 BNB

PANCAKE SWAP

1 BNB =
350.000.000.000 DCIP

MAXIMUM LISTED
500 BNB*

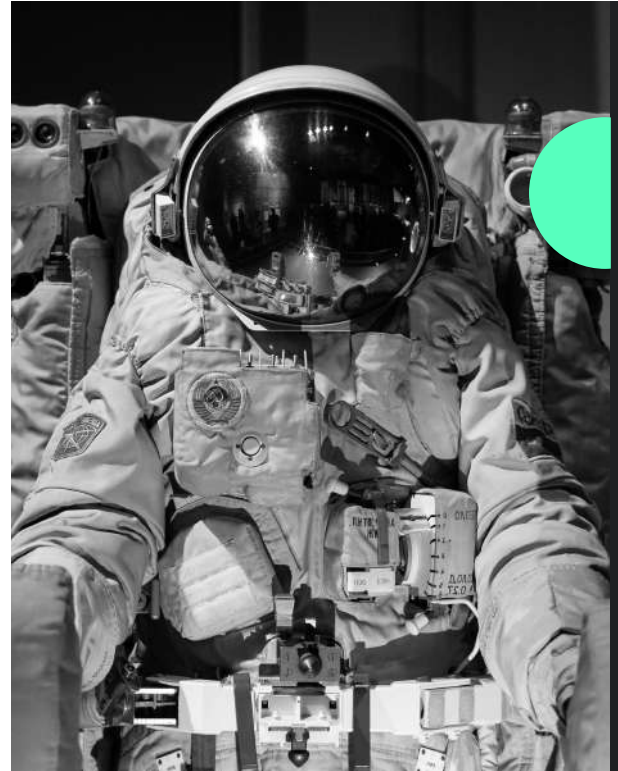

*Assuming all hard caps are met, we want to launch at a marketcap of \$400K. Remaining supply will be burned to ensure we meet this goal

*PERCENTAGES ARE SUBJECT TO CHANGE IF HARD CAPS ARE NOT REACHED!

COMMUNITY INVESTMENT WALLET

Our community investment wallet will invest the funds allocated to the wallet, into new projects, NFT's, or whatever the community decides! Our wallet will have real-time audit in our dashboard

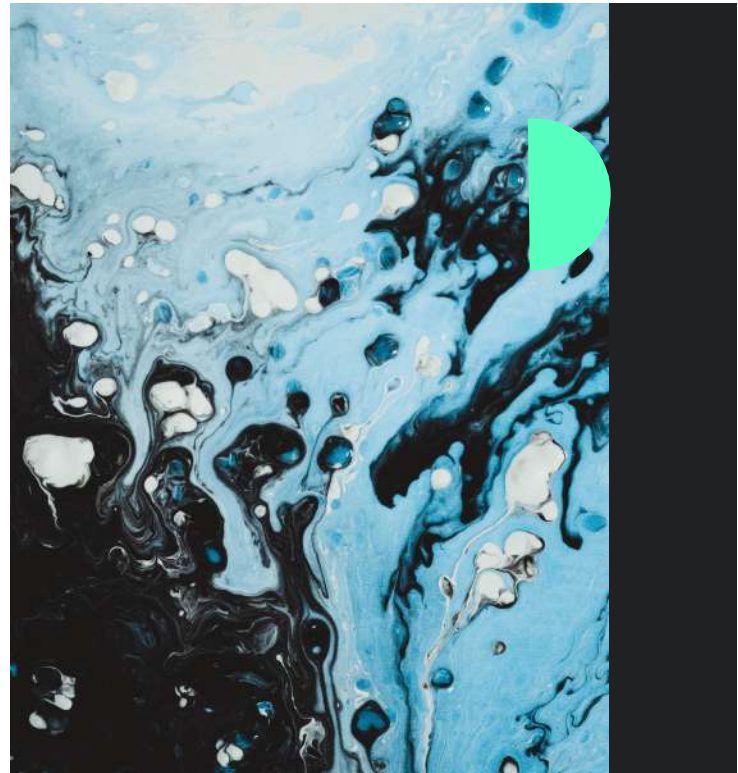

REDISTRIBUTION TO HOLDERS

HODL. Our HODL'ers need to be rewarded and bots or other speculators should be punished. Therefore you need to hold your coins for at least 24 hours, to benefit from the redistribution

BURNED

At each transaction, a percentage of that transaction will be burned. This decreases the total token supply, making the tokens more scarce

LIQUIDITY

In order to ensure that \$DCIP can be exchanged on Pancakeswap, each transaction will have a percentage that directly flows back to the liquidity on pancakeswap

MARKETING WALLET

\$DCIP will use marketing at its best. With the use of (Crypto)Influencers, Social media campaigns, and even traditional ways of marketing (advertisements, billboards, and sponsored articles) we will make sure "the word goes out"

PASSIVE INCOME BY HODLING

By HODLing \$DCIP in your wallet, you will be automatically rewarded a percentage of the distribution

PASSIVE INCOME BY INVESTMENTS

Our returns of the investments will be distributed pro-rata, meaning the more tokens you hold, the bigger the portion of the returns you will get

SPECULATION

Are you more of an active person? You will also benefit from the speculation of the price

Transparency is our top priority especially as it comes to our community investments, therefore we have developed a decentralized voting system based on your holdings. This means, the more tokens you hold, the more power you have on the vote.

We will experiment in the beginning with the voting frequency, starting with every 2 days. The frequency will be later adjusted according to community feedback.

Our main process is to decentralize investments, there is no need for expensive hedge funds, investment bankers, or other companies that try to profit from you, with your own money!

At \$DCIP we give the power back to the people. All rewards on our investments will be directly paid back to the holders, based on the number of tokens they held when the investment was initially done. The more tokens you hold, the higher percentage of the share you will receive.

Since we are operating on the BEP20 chain, all investments will be paid in BUSD or BNB. Initially, we will start with the weekly distribution of the rewards and will scale up or down according to the feedback we will receive

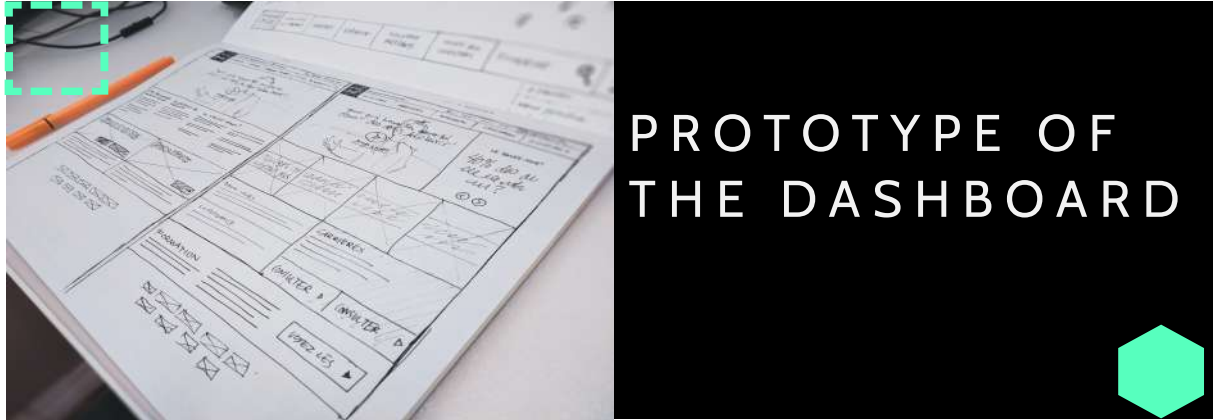

ENDLESS INVESTMENT OPPORTUNITIES

DCIP brings the power back to the people, this means that the limit of our investment is bound to the creativity of our token holders.

You want us to invest in Whiskey? Sure, we got you covered. You want us to invest in a nice apartment complex in New York? No problem!

The possibilities are endless. The more tokens you hold, the bigger your vote is. Participate in our social channels (Telegram and Discord) and get people to like the idea!

The screens you will find below are prototypes and are for demonstration purposes only, all functionalities shown in the screens are currently preset in either our contract (DCIP), in our voting contract (VOTING), or are characteristics of the blockchain.

Voting dashboard

Voting results

The screenshot shows the DCIP dashboard with the 'Vote' section selected in the sidebar. The main content area displays the results for 'vote 01-01-2021'. It indicates that \$500 USD was invested by 159 voters. A table lists the investments: Randomcoin (200\$), RandomNFT (100\$), and RandomICO (200\$). Below the table, it states that the user's voting power for this round is 4%.

Community wallet audit

The screenshot shows the DCIP dashboard with the 'Audit' section selected in the sidebar. The main content area displays the current BNB equivalent of all community investments as 6275 BNB. It also shows the Return on Investment (ROI) for three different periods: 1D (-5%), 7D (150%), and 30D (15370%). Below this, a table provides an overview of the current BEP20 community fund, listing the name, type, total buy price, current price on Pancakeswap, and ROI for five different assets.
