

WHITE PAPER.

1. Project Overview:

1. 1. GolCoin:

GolCoin is a cryptocurrency built on trust, with an ecosystem providing a secure and transparent way for users to transact with each other.

The solid community and the innovative vision are **GolCoin**'s keys to success despite the volatile market conditions.

Seeing a vast increase in holders and new community members, **GolCoin** attracts investors with the new Roadmap and high guaranteed APY offered in the staking pool **GolStaking**, which rewards users for holding **GolCoin** in their wallets.

The ecosystem allows users to easily buy, sell, and trade **GolCoins**, NFTs, in addition to creating virtual worlds and interacting with each other.

Starting with **Gollex**, a MENA-focused secure cryptocurrency exchange, **GolCoin** will continue taking on a global scope, attracting crypto aficionados and newcomers alike.

It is the **GolCoin** goal to connect realities and to impact lives with digital currencies, from forward-thinking cryptocurrencies to a modern decentralized exchange and growing ecosystem, with a team comprised of Web03 disrupters with expertise spanning from serial entrepreneurship to blockchain, marketing, engineering prowess, and beyond.

GolCoin's interoperability is made possible by its use of the Interledger Protocol (ILP), which enables near-instantaneous transactions across different ledgers, without the need for a third party to hold or manage user funds, allowing users to move their **GOL** tokens between different blockchain ecosystems, as well as exchanging them for other assets without being locked into any one ecosystem.

1. Project Overview:

1. 2. Mission:

Believing in economic equity and freedom, GolCoin has emerged to safeguard people's wealth and to bridge them with a futuristic investment plan. Presenting an ecosystem curated using the world's top-notch tech and most creative minds behind, GolCoin aspires to eliminate the old investing issues and to diversify the economic structure in the world of WEB3.0 to maximize profit and value for everyone.

1. 3. Achieved Goals:

- Up to 40,000 community Members, 90% are Arabic speakers
- The #1 in weekly top gainers in coin market cap for the month of July.
- The #2 top trend in CoinMarketCap for the month of July.
- Trend in 62 crypto news.
- MENA's most prominent cryptocurrency.
- One of the most globally recognized digital currencies in 2022 .

2. Ecosystem:

2.1. Golex:

Being one of the best crypto exchanges in the MENA region, **Golex** cryptocurrency trading platform, regulates and facilitates the relationship between seller and buyer; in addition to providing a great deal of liquidity that maximizes the speed of the trading process.

Golex collects a very low fee of 0.1% with each trade and withdrawal made on the platform, and with them **GolCoin** makes the buy-back also known as a share repurchase and sends them to the burn wallet to increase the price of the **GolCoin**.

Golex controls trading operations from opening to full closure and also provides an escrow service to ensure that transactions are safe and secure.

With its user-friendly interface and top-notch security features, **Golex** is highly reliable and a great option for those looking to invest in cryptocurrencies, using advanced encryption technology that protects user data to assure the optimum security of each transaction.

2.2 GolStaking:

GolStaking is a simple Platform to invest and earn interest on **GolCoin** assets, with weekly paid and tracked to the second annual interest. **GolStaking** rewards users for participating in the network, offering a Percentage of Profits on Opening Balance Staked starting from 175% up to 220% annually.

2. Ecosystem:

2.3. Agarthia:

As the world has adopted the metaverse with the entrance of the largest technology entities like Meta, Microsoft, and Google – in addition to industry and societal leaders, web3.0 has dominated the future and is waiting to be invested.

Residing in the universal digital destination of VR environments and web3, **Agharta.io** is a virtual world powered by the Unreal Engine 5, for traders and cryptocurrency enthusiasts.

Agharta.io is a new decentralized, social VR world bringing incredibly immersive and realistic interactive experiences to life with groundbreaking new features that provide a generational leap in visual fidelity, and enable worlds to be fully dynamic.

3D avatars will be the primary means to communicate and engage with one another, to provide a shared environment and economy regardless of location boundaries.

Agharta.io embarks on the next evolution of Crypto, NFTs and E-commerce, linking real life assets to the immersive experience with its interconnected portals that includes:

2.3.1 MetaGol:

An innovative VR game, as the perfect evolution in a long line of social technologies, covering a great shortcoming that exists in the digital world achieving the unprecedented vision.

2. Ecosystem:

2.3.2 MetaConnect:

A central social network for broadcasting news, conducting social conversations for other digital currency communities. MetaConnect aims to cover the existing shortcomings in the digital world, as it adopts the principle of the ease of use to achieve the largest possible user base.

2.3.3 MetaNow:

A messaging & Calling cross-platform application that focuses on speed, privacy and security. MetaNow users can securely exchange messages with high encryption capabilities including photos, videos and documents of any type and format, and compatible with HOLOGRAM technology.

2.4. NFT MarketPlace:

NFT marketplace is here to present the second generation of NFTs to the world. One of the biggest concerns about NFTs has always been that they usually have no practical utility and are mostly used as digital collectibles. But the next generation is the Utility Non-Fungible tokens, which are going to add real value and create facilitating solutions.

3. Branding:

The brand is elevated with a unique identity, a more secure system and upgradable contract. In addition, **GolCoin** will announce a precise mechanism on coinmarketcap and Etherscan to be reachable and transparent at any time.

3.1. Logo

In order to have the propeller image of **GolCoin**, the brand has a 3-dimensional look that suits the futuristic plan of **GolCoin**.

3.3. Web 3D

As **GolCoin** is evolving, it leverages the user experience starting from the very beginning, therefore, the website was developed with 3D designs, creating more engaging immersive interfaces that evokes emotions through interacting with 3D elements, to make users feel more connected and to deepen their experiences with **GolCoin** by tapping into their senses.

3.4. Blockchains

GolCoin is connected to Tron, Ethereum and BSC Networks, as a part of upgrading its features to enhance security, privacy and speed of the transactions. In addition to giving the users more options to choose from in lights of fees and compatibility and by so listing **GolCoin** on various platforms.

4. Tokenomics

With a max supply of 290,000,000 Gol

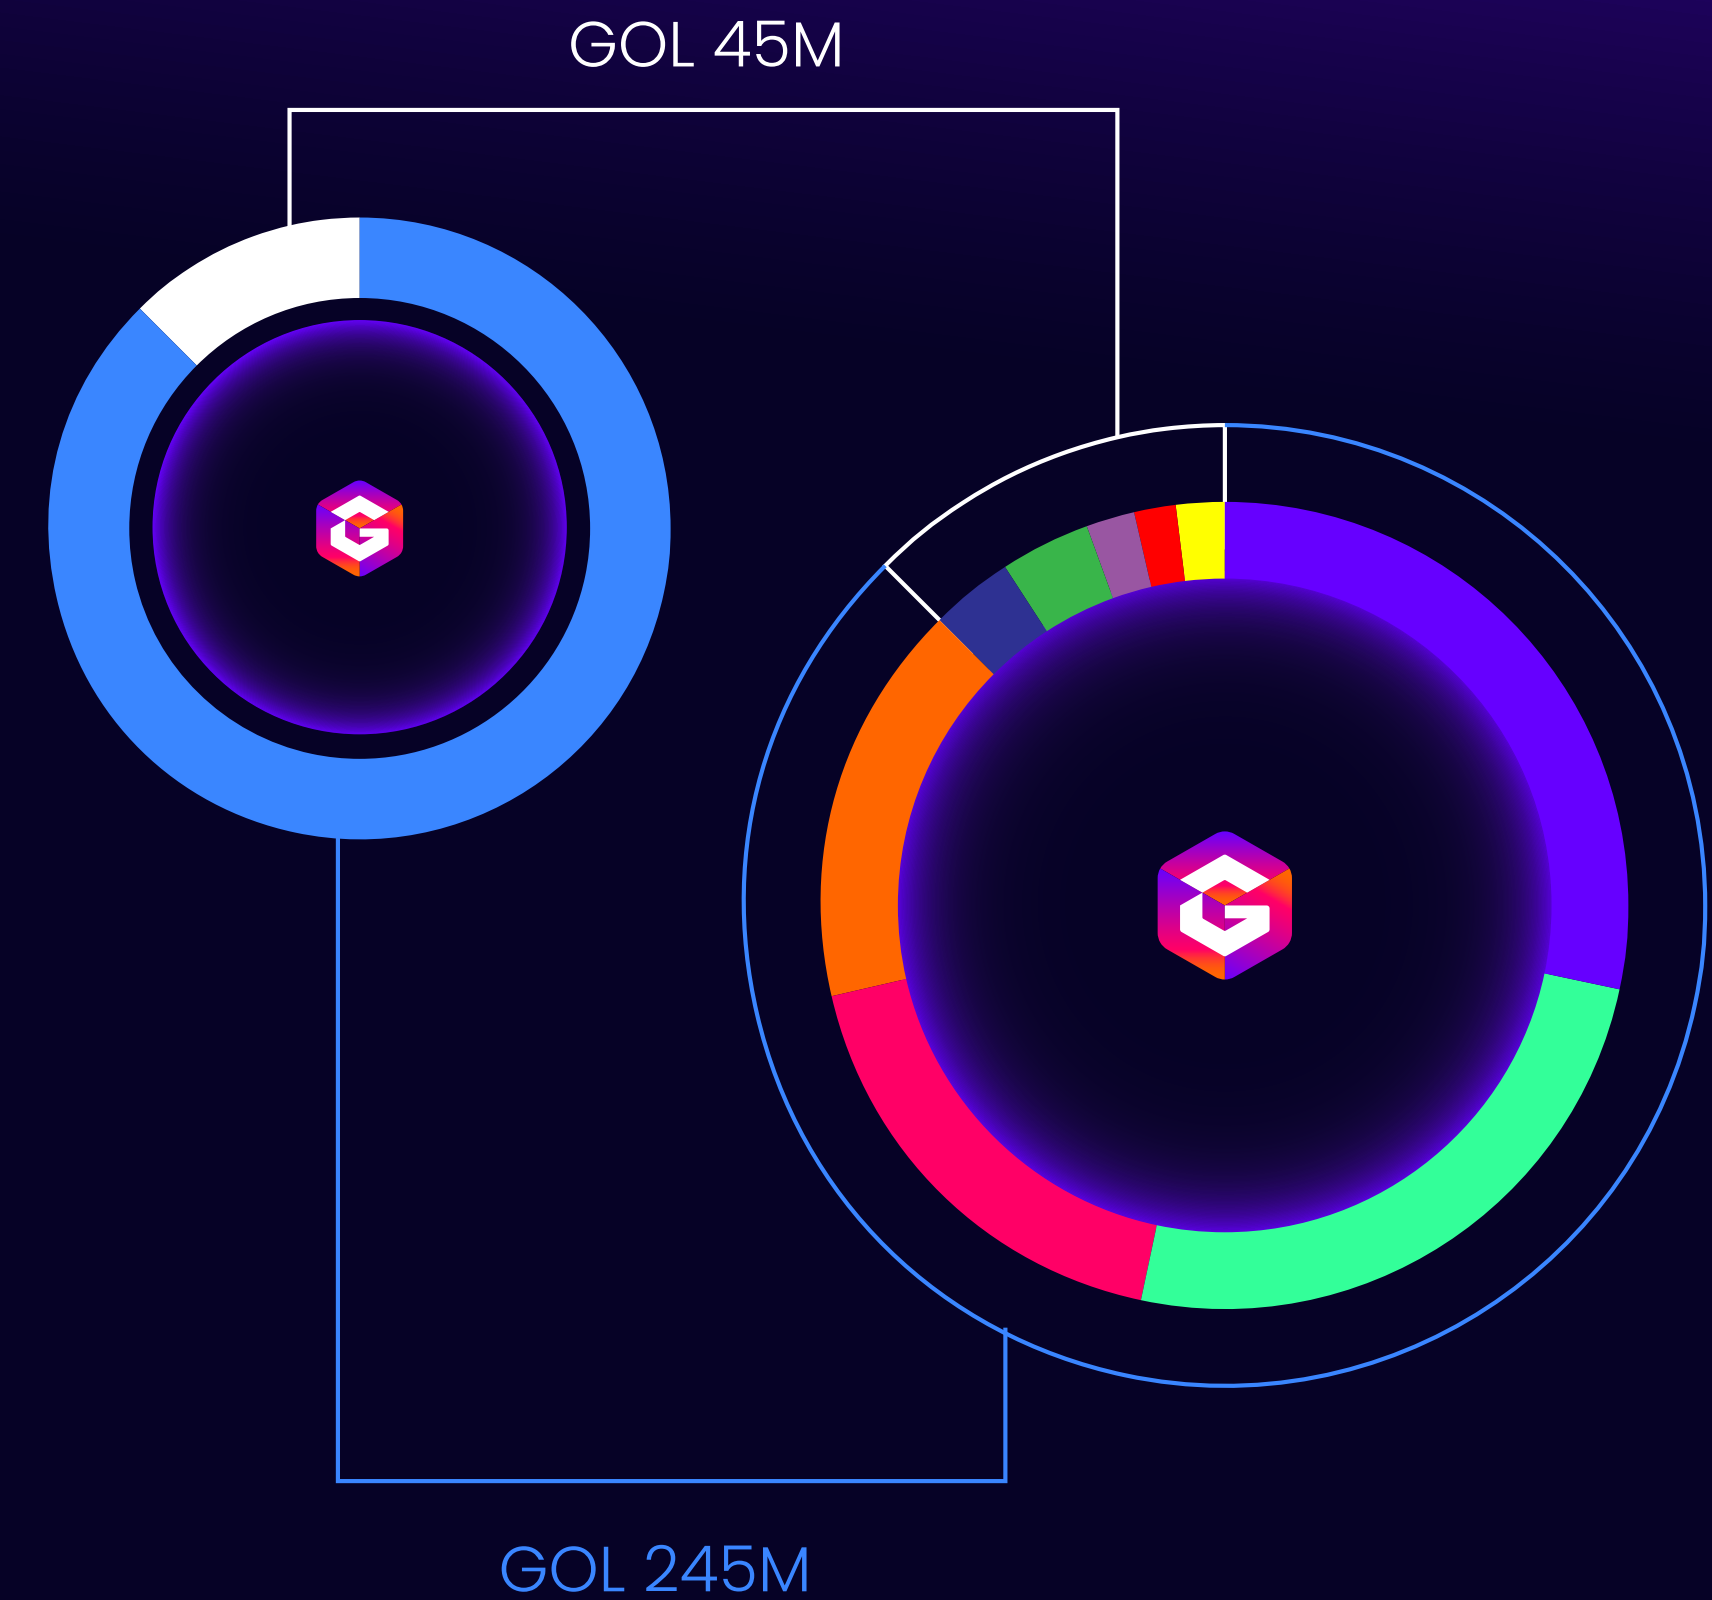

Our token has a comprehensive structure that powers its ecosystem and holds 245 Million Gols whereas, the reserved is going to be 45 Million Gol

6. Future Projects:

6.1 GolChain:

Creating a blockchain that is owned by GolCoin gives the coin great advantages such as improvement of security and trust, creates efficiencies in processing transactions, Visibility and traceability, and many more advantages that will help the coin and Investors.

6.2 Mining project:

To overcome the issues caused by the traditional mining process, GolCoin will be using Solar Power for its mining projects, since it is the best option for a sustainable future. This project will be one of the most important GolCoin projects with a capital of 22,000,000 Euros, giving profits on both long and short terms, boosting GolCoin presence on trading platforms and reflecting a reliable image for traders and cryptocurrency enthusiasts. Solar mining project will give a profit of 200% from the following:

- Profit from mining with USD
- Profit from the Bitcoin value increase
- Profit from GolStaking
- Profit from Electricity generated with Solar power
- Profit from Mining Project liquidity pool of 50,000,000 GOL.

6.3 Listing GOLC on major exchanges:

Getting GolCoin listed on the major trading platforms to get more trading volume for the coin and make it accessible on as many platforms as possible.

7. Roadmap:

7.1 Golex

Launched Golex.io for secure, trusted digital asset trading and asset management services.

7.2 New Smart contract with advanced features

GolCoin upgraded its smart contract to make trading GolCoin easier as it will support many blockchains.

7.3 Audit

To ensure the security and efficiency of our smart contract, we will submit it to the top smart contract audit service in the world "Certik".

7.4 Official Launch

7.5 Listing on the biggest exchanges

Getting GolCoin listed on the major trading platforms to get more trading volume for the coin and make it accessible on as many platforms as possible.

7. Roadmap:

7.6 GolStaking platform

Launched GolStaking as a simple Platform to invest and earn interest on GolCoin assets.

7.7 Agharta

Launching Agharta as a portal into a new universe in the meta world to connect people in an unprecedented futuristic way. Agharta will contain different channels such as Metaconnect, Metagols, and MetaNow.

7.8 NFT Marketplace

This project will carry the 2nd generation of NFT marketplaces with utility NFTs that can be integrated into Agharta.

7.4 Creating Golchain

GolCoin will launch its own native blockchain for improving security and trust, through efficient transactions processing, visibility and traceability.

7.4 Mining project

GolCoin will start using Solar Power for its mining projects, since it is the best option for a sustainable future.
