

GREENART COIN ECOSYSTEM

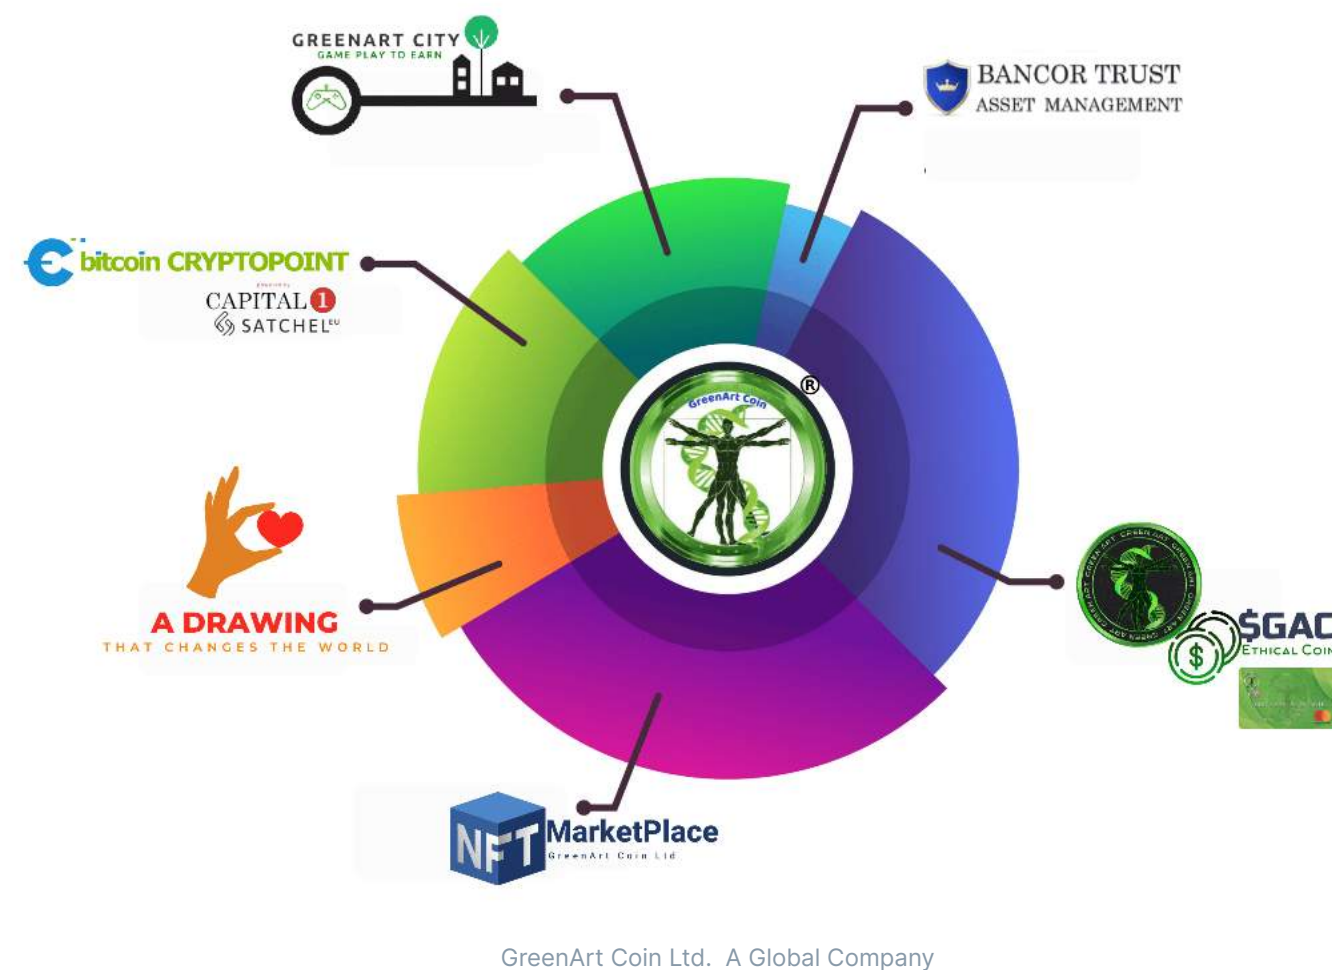

The First Ethical Cryptocurrency

GreenArt Coin is ethical cryptocurrency, NFTs marketplace, Play2Earn game, Networks platform for artists, collectors, gamers and investors.

GREENART COIN ECOSYSTEM LTD

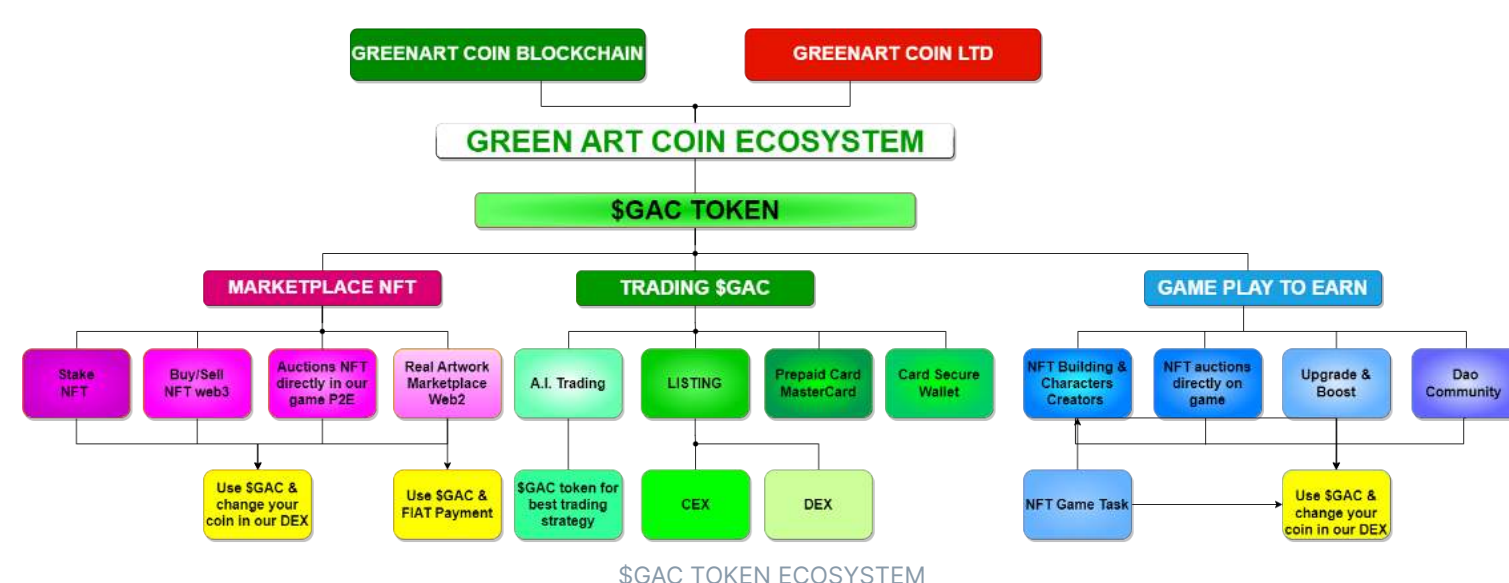

GreenArt Coin is the first ethical Ecosystem, It works around Cryptocurrency, Cryptopoint Franchising, Digital Bank, Game P2E and NFT Marketplace platform for artists, collectors and investors. Our NFTs are related to globally recognized and certified works of art from private collections and art galleries.

GreenArt Coin Ltd. A Global Company

The project involves creating a Web3-based game where players can build and manage their own eco-friendly city, while also creating and managing their own virtual art galleries and exhibitions using NFT artwork from the marketplace.

Players will earn rewards and bonuses for making eco-friendly choices in the game, such as building green infrastructure, reducing energy consumption, and promoting sustainable living.

The game will use GreenArt Coin token **SGAC** as the currency for transactions, and will include smart contracts to execute secure and transparent transactions between NFT buyers and sellers. The game will also include a rating and feedback system for artists, NFT sellers, and players who create and manage their own virtual art galleries and exhibitions.

GREENARTCOIN GROUP LTD

GreenArt Coin LTD is a holding company that operates across several sectors, such as NFTs, Play to Earn gaming, trading, artificial intelligence and token management, We are a company that holds ownership in various other companies, each specializing in a specific area.

The NFT sector focuses on the creation, purchase, and sale of unique and one-of-a-kind digital assets, such as digital art, videos, music, games, and more.

The Play to Earn gaming sector focuses on online games where players can earn cryptocurrencies or tokens for their in-game performance.

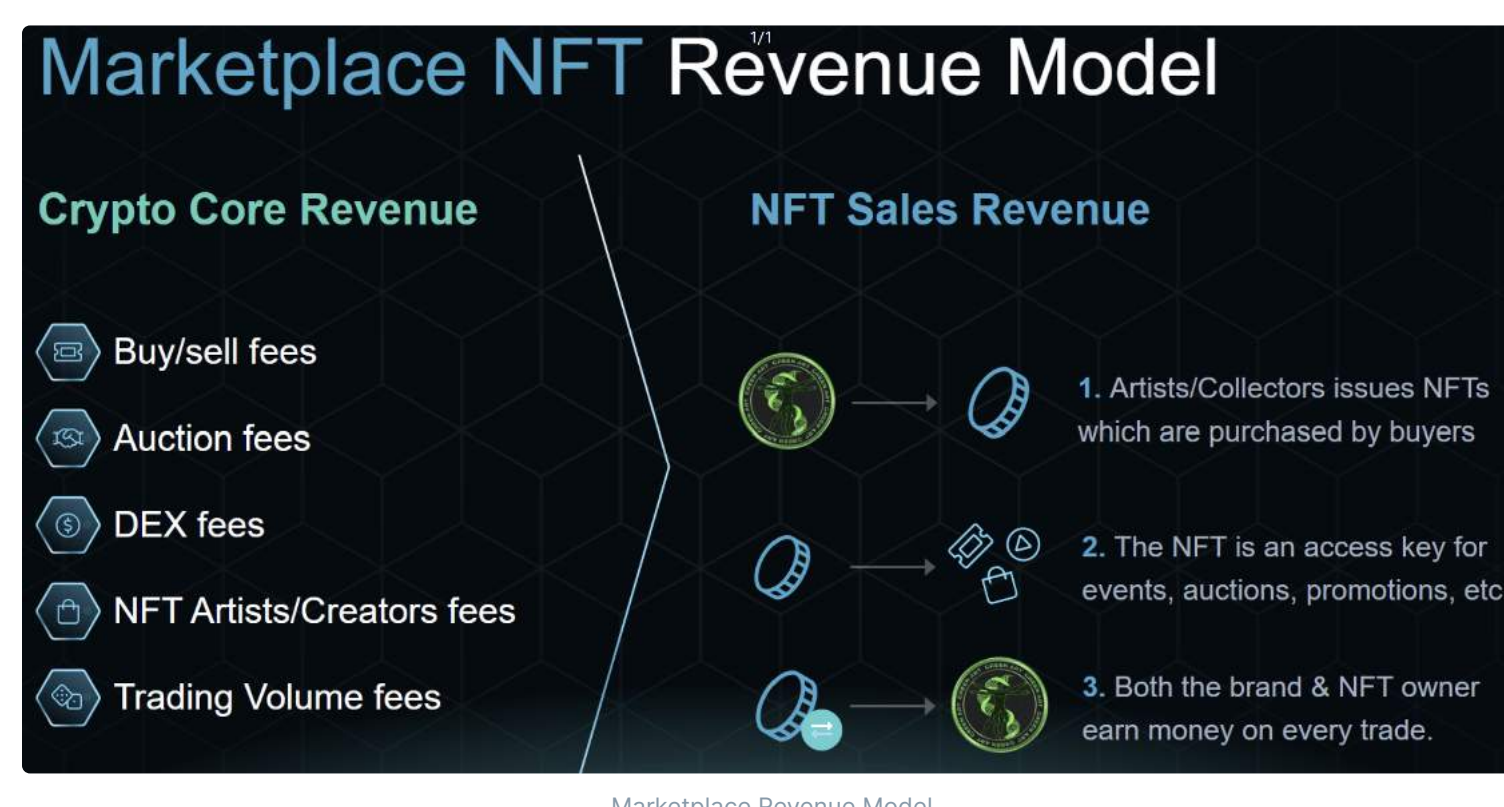

The trading sector deals with cryptocurrency trading and other trading activities, while the artificial intelligence sector focuses on creating AI-based solutions for the company's operations, such as data analysis, risk management, fraud detection, and more for the future GreenArt Blockchain.

The token management sector deals with creating and managing the company's token, particularly in terms of its usage, distribution, regulation, and value. This way, the holding company can have an overview of the different activities that they're undertaking, create synergies between the various sectors, and develop strategies to maximize value for their shareholders.

GREENART COIN LTD REVENUE MODELS

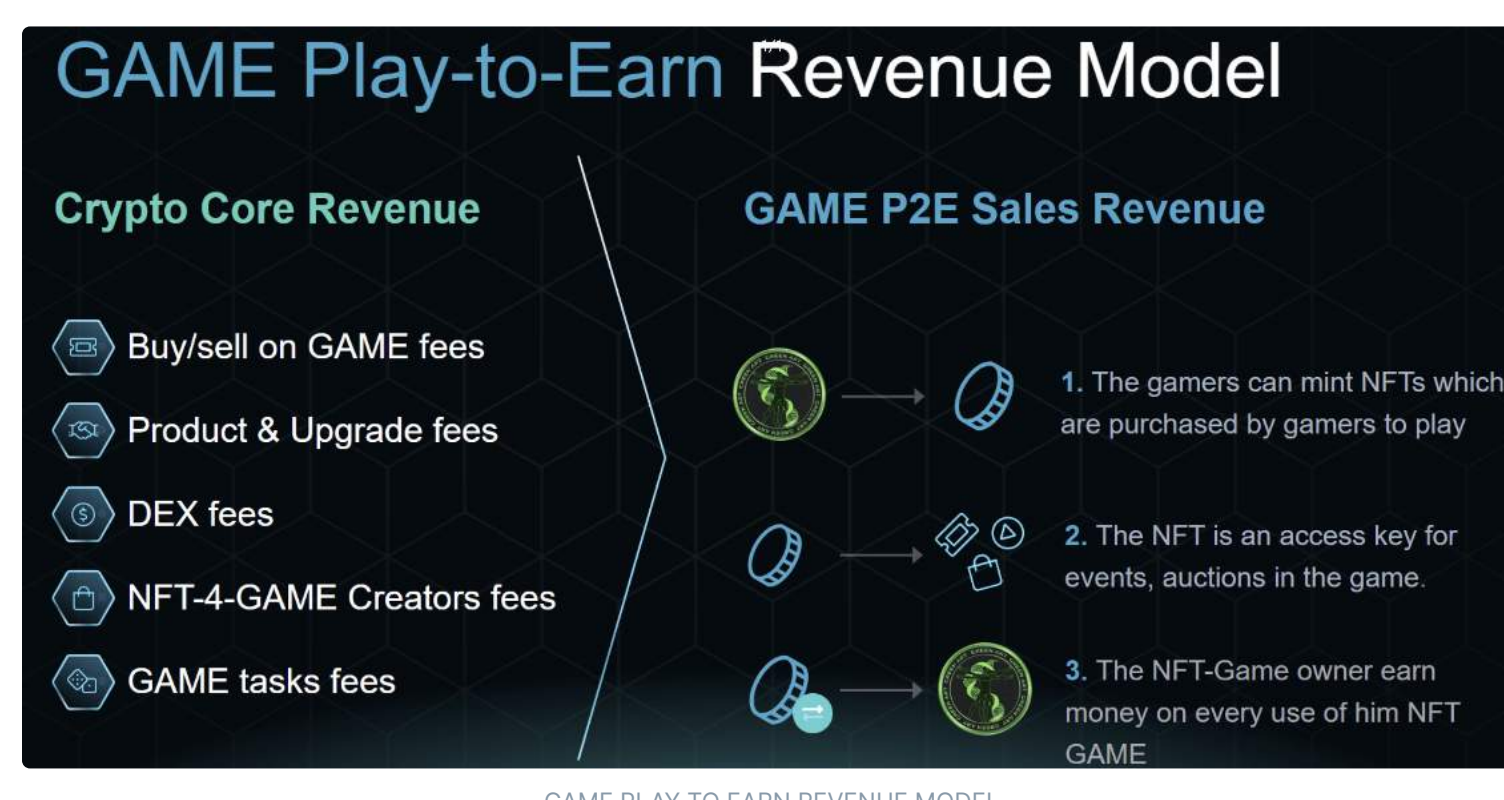

NFT MARKETPLACE REVENUE MODEL

SGAC token is the fuel of our marketplace and the official artworks coin

GAME PLAY-TO-EARN REVENUE MODEL

SGAC token is the official coin of GREENART WORLD

Why ethical cryptocurrency? For each transaction, GreenArt Coin automatically donates a percentage to the solidarity associations donate through our "Charity Wallet"

50% of our commissions go directly to support most of 10 charity projects

\$GAC

The Ethical Cryptocurrency

\$GAC is from the outset a major player in crypto investment. Every time you buy/sell our currency each transaction automatically generates a percentage of commissions that is sent directly to charity projects through our "Charity Wallet".

WHY CHOOSE \$GAC TOKEN

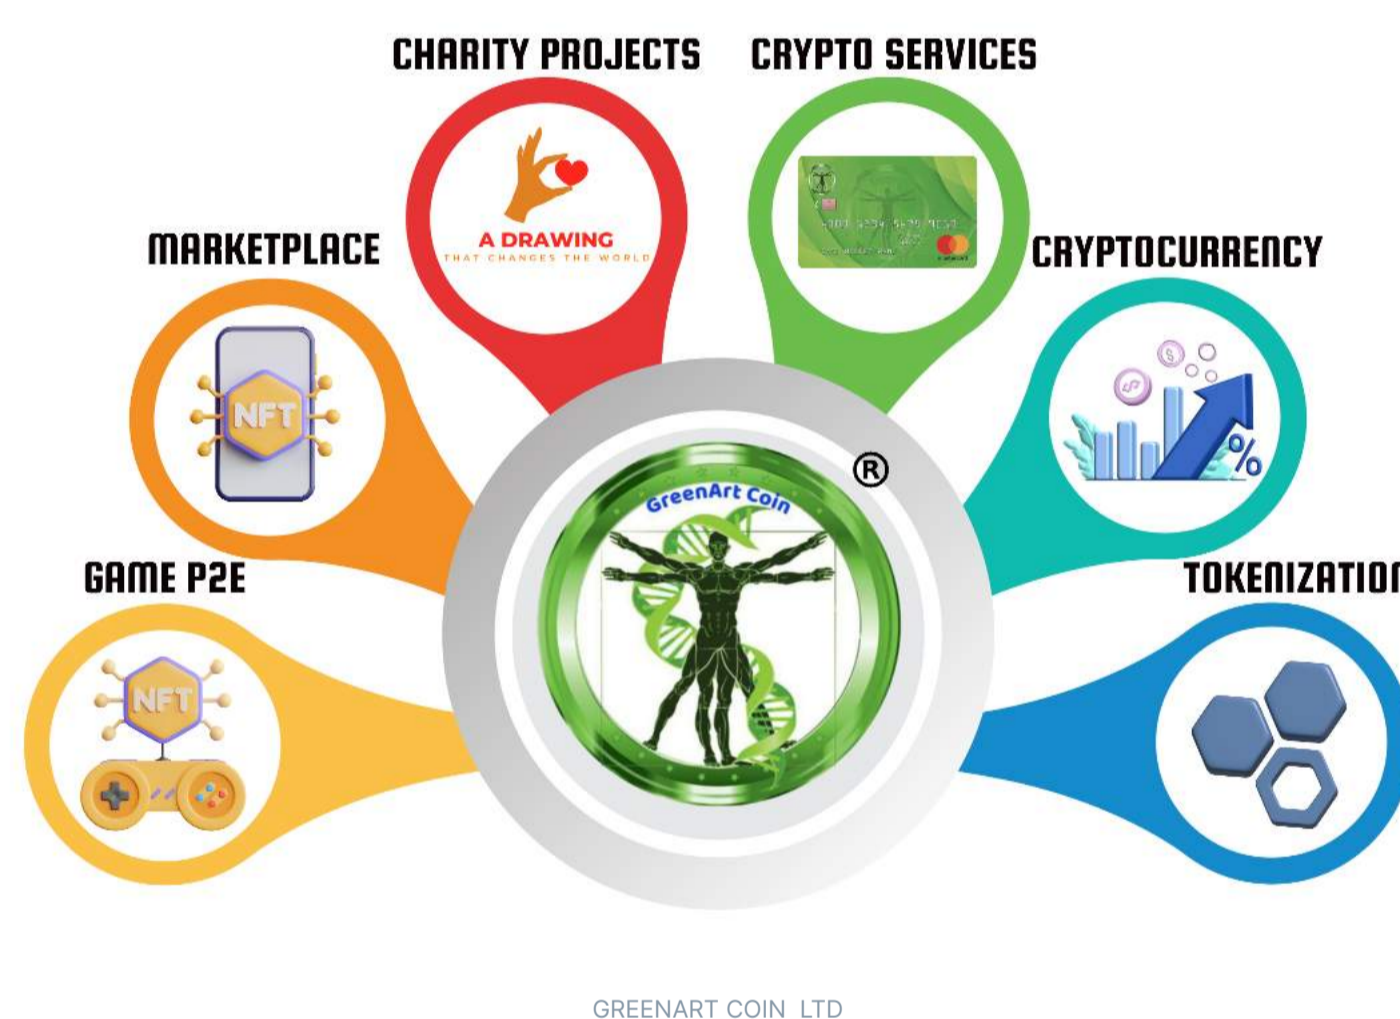

- 01 CHARTS**
\$GAC token will be listed on the major exchange markets
- 02 TOKENIZATION**
Participates in the purchase of a NFT artwork with minimum capital
- 03 NFT MARKETPLACE & AUCTION ROOM**
Buy/Sell artworks with \$GAC
- 04 DEX & STAKING**
Change & Stake NFT & Crypto in \$GAC token earn
- 05 BEST PRICE & REWARDS IN ICO/IDO**
Buy \$GAC token before Listing at better price and token rewards
- 06 GAME PLAY-TO-EARN**
\$GAC token is the only value to change the utility token to play
- 07 GREENART CARD & BITCOINCRYPTOPOINT**
Use \$GAC token to pay everywhere
- 08 A.I. TRADING ALGORITHM**
Use \$GAC token for the upcoming GAC exchange

\$GAC is a BEP-20 token and works on Binance Smart Chain

Implementation of Token as Currency: \$GAC token will serve as the currency within the game, allowing players to purchase NFT artwork and other items within the game

- The incentivization program will reward players for contributing to the ecosystem, and the token will serve as the currency for transactions and rewards within the ecosystem.
- ECO program: ECO program using your token to reward players for taking eco-friendly actions in the game, and for contributing to the ecosystem in other ways.

\$GAC THE TOKEN WITH A GREAT VALUE

❖ TOKENIZATION

Invest in NFT with minimum capital

TOKENIZATION VIDEO EXPLAIN

GreenArt Coin Opening a new point of view about the digital art markets: NFT tokenization is a new blockchain solution where any artworks can be split into smaller parts with equal rights.

How it works: Example

If an NFT costs 1 million dollars and with this price tag it is only accessible to a few investors. This is where tokenization comes into play to allow anyone anywhere to invest in this NFT.

By using GreenArt Dapp the artworks becomes digitized and then can be split into small blocks which take the form of tokens.

The NFT can be split into many different blocks. And now the same NFT is divided in 10,000 tokens worth 100 dollars each. At this price this NFT can be accessed by any investor with minimum capital. That's what tokenization is all about.

Through GreenArt Dapp anybody can acquire a block becoming a token holder and owner of a portion of the NFT. The token holders will get a new revenue stream coming from the block when the NFT gets sold and from the NFT stake in our \$GAC token you can invest in any artworks that has become digitized and tokenized.

THE AUTOMATIC CHARITY WALLET

A NEW CONCEPT OF CHARITY

OUR REVOLUTION: THE AUTOMATIC CHARITY WALLET

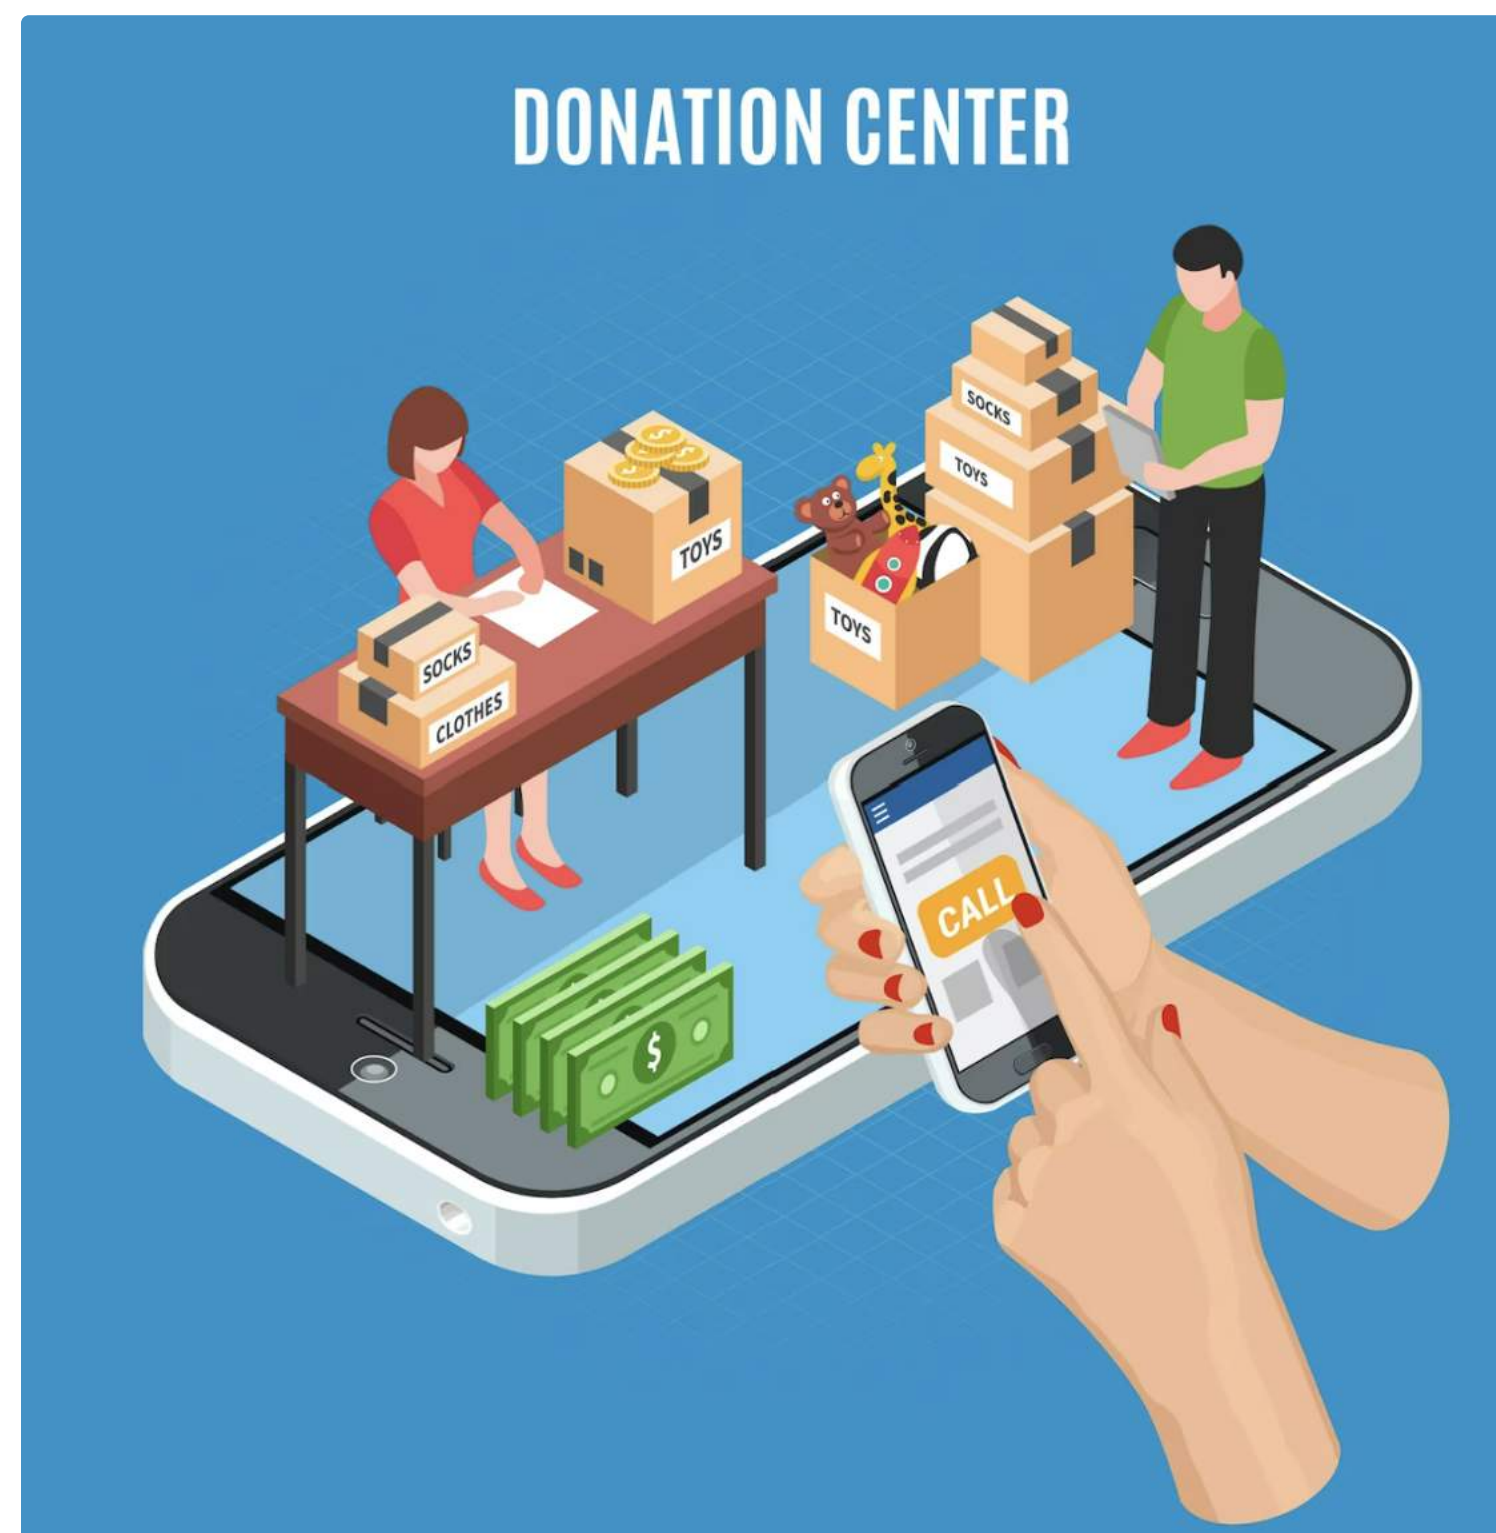

GreenArt Coin Ltd is an innovative company that has introduced the concept of ethical cryptocurrency, a system based on transparency and social responsibility. One of the key features of GreenArt Coin is the ability to automatically donate tokens that come from the fees in the purchase and sale of our token, without the use of human hands.

OUR PROJECTS

The revolution of GreenArt Coin lies in its ability to use blockchain technology to create an ethical currency that makes a difference in the world. Thanks to the transparency and traceability of transactions, it is possible to ensure that every donation goes exactly where it is needed and is used effectively for the common good.

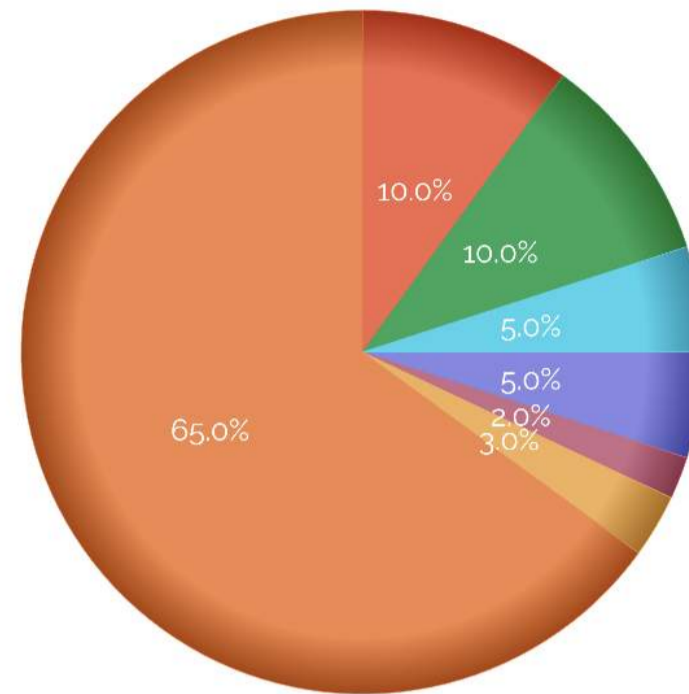

In summary, GreenArt Coin is the first company in the world to introduce the concept of ethical cryptocurrency and distinguishes itself by its ability to automatically donate tokens generated from transactions. This is a real step forward in creating a fairer, more sustainable, and responsible society.

We work in absolute transparency and no possibility of variation of automatic mailings

PRICING ORDER

TOKENOMICS

The pie chart represented the first distributions relative to the GAC BANK and it show in percentage the total value of \$GAC Tokens Initial Circulating Supply

TOKENOMICS IN DETAIL

GREENART COIN LTD ha resolved to issue the totality of tokens, according to the total supply, and keep them in custody in the "GAC BANK" with the purpose of make them available in limited quantities, avoiding sudden drawdowns caused by uncontrolled new token placement. Such choice, made considering the high market volatility, aims to monitor the price and regulate token placement balancing the circulation of \$GAC with market demand and therefore preserving long term growth of price.

THE LOCKING MECHANISM

All Tokens held in the GAC Bank have a locking mechanism and their unlocking will be determined to regulate the distribution of \$GAC on the ecosystem needs

The governance of the issuance will be made through our platform and will be determined based on the vote of the \$GAC holders

The entry of tokens released within the market will be authorized only and exclusively for the following operations:

- Rewards Distributions
- Cex Listing
- Dex Liquidity
- Burn Program
- Charity Events
- Advertising
- Development & Upgrades
- Bounty Program
- Airdrop Program
- Volume of new NFTs published
- NO TEAM TOKENS
- NO OWNERS TOKENS

THE FLUID LOCKING

One of the main advantage of Greenart Coin is that, differently of most token, it has a real underlying value, determined by the NFT owned.

a part of the NFT generated and sold on the marketplace is exclusive property of Greenart Coin, and is stored as asset, to guarantee the token holders in the event of default.

In case some owned NFT should be sold, it will be replaced by new ones, in a revolving approach, that, according to the ethical principles of Greenart Coin, intends to protect the whole community and minimize the risk that people may loose their money.

This approach will discourage hard speculation and allow a more stable and permanent growth of the token price, based on the parallel growth of the community and of the NFT acquired

REWARDS PROGRAM

10% MORE OF IEO HOLDERS

10% REWARDS for stakeholders in IDO

Investors who decide to buy our currency during the IEO phase will receive at the end of the pool, an additional quantity (10%) of \$GAC Tokens on their investment under rule "first come, first serve".

Our NFT represented works of art from private collections and high-level artists

In Our marketplace there are artworks of Caravaggio, Rembrandt, Rubens and world-class artists

We value works of Art and Artists

GreenArt Coin values all-round production and artistic activity. It promotes talents, buys their works, facilitates the sale of creations in global auctions

 <h3>Artworks</h3> <p>Join the Artists who have chosen GAC to create NFTs and to advertise and sell their Artworks.</p>	 <h3>Songs</h3> <p>Your compositions can be converted into a non fungible token. Sell tokens of your songs.</p>	 <h3>Videos</h3> <p>Turn your videos into NFTs, make them known to an international audience and make money on their purchase.</p>
 <h3>Photos</h3> <p>Do you want to sell the NFT of your professional photos? With GAC Coin you can do it.</p>	 <h3>Illustration</h3> <p>Hand-made drawings, digital creations obtained with programs or made with graphic supports: everything can be transformed into NFT.</p>	 <h3>Avatars</h3> <p>Make dozens of avatars with unique and original features and sell them on the platform.</p>

NFT MARKETPLACE ROADMAP

How to buy an NFT

Once you've found an NFT you like, how do you actually purchase it? There are three main ways to buy an NFT using GreenArt Coin: "buy now," auctions, and offers.

Buy now

NFTs listed to "buy now" are listed at a set price. They can be purchased any time during the sale period and without any additional involvement from the seller. This is the simplest method, and is a lot like buying on other e-commerce websites.

Auctions

When an NFT is up for auction, potential buyers can bid on the item. The NFT will either go to the highest bidder, or the seller can choose to accept any offer during the auction.

Offers

You can make an offer on any item using GreenArt Coin, even if it's not listed for sale. You can also make an offer on a listed item, if you want to offer less than its listed sale price.

The purchase process: A step-by-step guide

Let's walk through how to buy an NFT

1. As we discussed above, there are multiple ways to buy an NFT. For this example, we'll buy an NFT that's listed for sale by clicking the "Buy now" button.

2. Connect your crypto wallet

If you haven't already connected and set up your crypto wallet, you'll be prompted to do so during this step.

3. Choose your payment method

Next, you'll be prompted to choose if you'd like to pay with crypto or with a card. For this example, we'll use a card. If you want to buy using crypto, you'll need to load your wallet with cryptocurrency.

4. Review fees

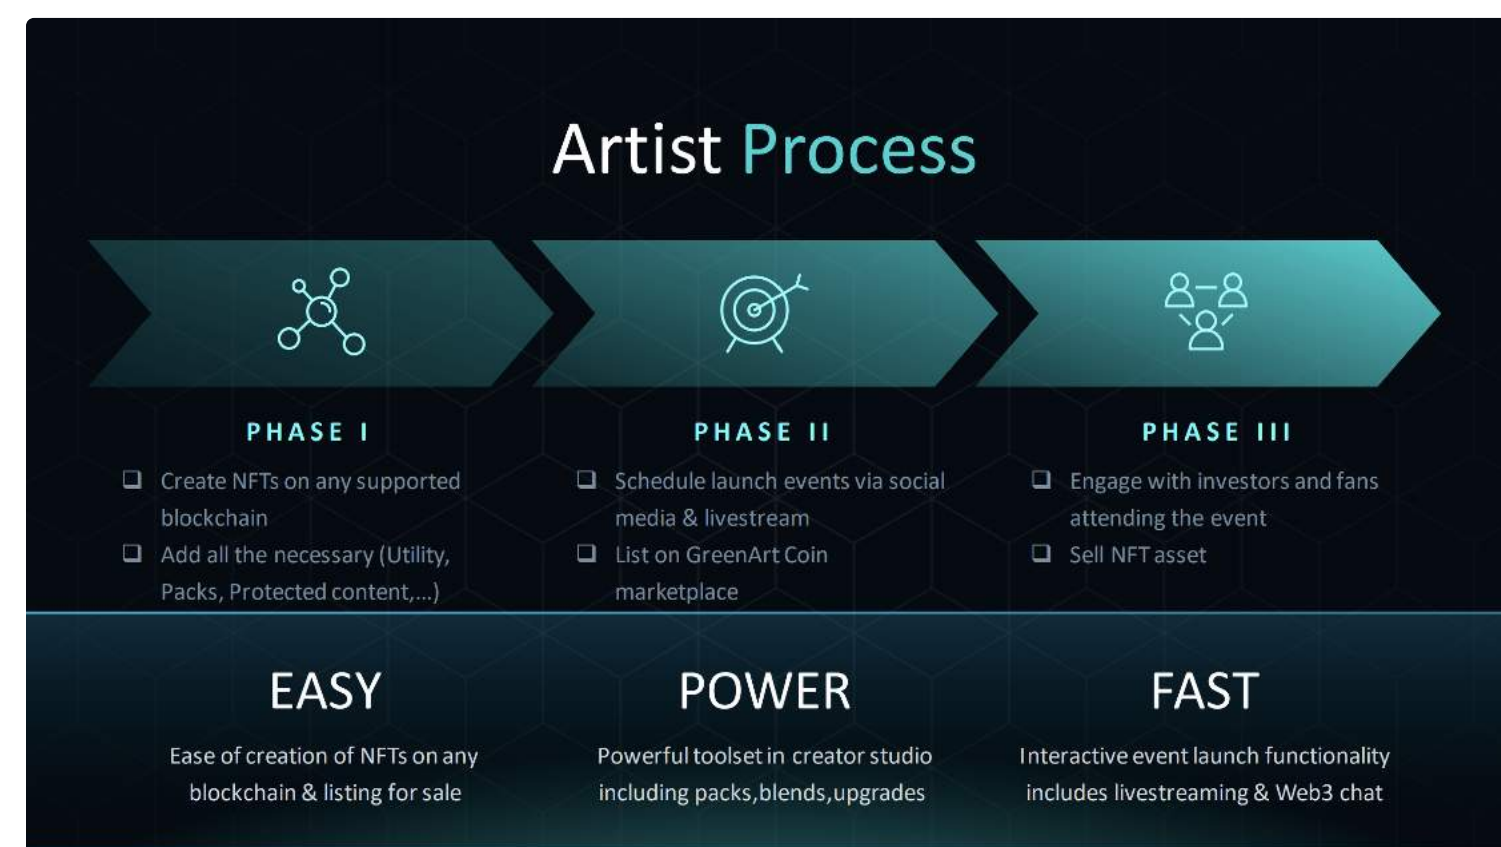

You may notice that your total is higher than the listed price for that NFT. This is due to network ("gas") fees and, if you're paying with a card, processing fees. The gas fee occurs on all transactions on the blockchain and the amount varies based on a variety of factors, such as how many people are using the network at that moment. GreenArt Coin does not receive these fees.

5. Enter your payment information

Follow the prompts and enter your information to complete your purchase. If this is your first time purchasing with a card you may be asked to verify your identity.

6. Your purchase is complete

Once you've entered all your necessary information and clicked "Pay", your NFT purchase is officially complete and has been written to the blockchain. Congratulations on your NFT purchase!

How to CREATE nft using greenartcoin?

Anyone can create an NFT. Your NFT can be as simple as the media itself, but it can also represent something more. Think of it this way: your NFT can simply be a piece of art, or it can be a piece of music represented by a GIF or a photograph. In the latter example, the NFT is the combination of the representation and the digital item it represents.

What do I need to create an NFT?

How to create an NFT

How to turn your creations into tokens. Earn money with your artwork, photos, videos and songs

Everything you need

Remove your creations from the drawers

Submit your work

Send your creations, we will turn them into NFTs

Sign the contract

Now you are part of the GreenArt Coin community!

Start earning

Earn a percentage each time your painting is displayed or sold

Make sure people see you

GreenArt Coin is an international showcase for every artist

In addition to the NFT itself, you'll need a crypto wallet to create and mint your NFT.

"Minting" an NFT is the process of writing a digital item to the blockchain. This establishes its immutable record of authenticity and ownership.

Crypto Wallet are a foundational tool of web3. Your wallet acts as a private key that allows you to interact with decentralized apps, buy NFTs, and navigate the web3 universe. Each blockchain has specific wallets you can use to transact on them. For example, MetaMask is a wallet used to interact with the Binance Smart Chain. GreenArt Coin is compatible with a wide variety of wallets.

Next, choose a blockchain on which to mint your NFT. GreenArt Coin is currently compatible with the BNB CHAIN for first and in the future multichains (Ethereum, Polygon, Klaytn, Arbitrum, Optimism, Avalanche and Solana blockchains) and each of these blockchain has different gas fee associated with transactions on their networks.

Then, you can create your collection. This is the fun part! Decide what your collection of NFTs is all about. Is it artwork, a collection of profile pictures, sports memorabilia, membership to a group, or something else entirely? Once you decide, create your collection by naming it something unique that represents your work and describing it. You'll also be prompted to choose a category and provide any relevant links to social media.

Once your crypto wallet is set up, you've chosen BNB blockchain, and your collection has been created, you're ready to mint your NFTs!

SUBMIT TO US your NFT on greenartcoin.eu

Once your crypto wallet is set up, you've chosen BNB blockchain and your collection has been created, you're ready to receive the \$GAC earned by your NFTs!

You'll also be prompted to choose a category and provide any relevant links to social media.

GREENART GAME PLAY-TO-EARN

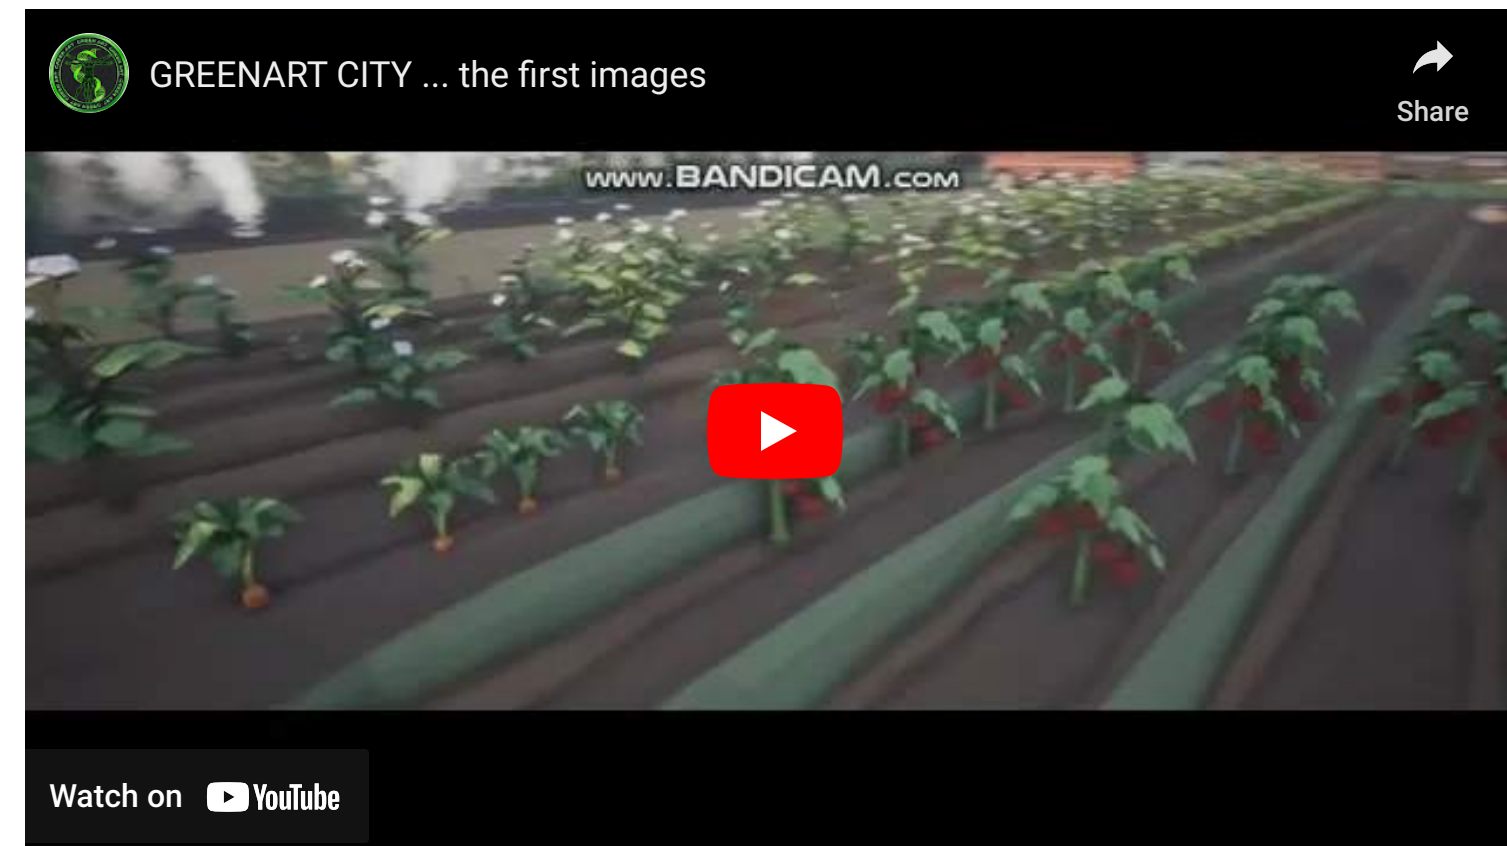

Play and Save the World

GreenArt Game is a play-to-earn game in which competitors compete in building the ecological city of the future. The goal of the game is to build a sustainable city that can meet the needs of its inhabitants without harming the surrounding environment.

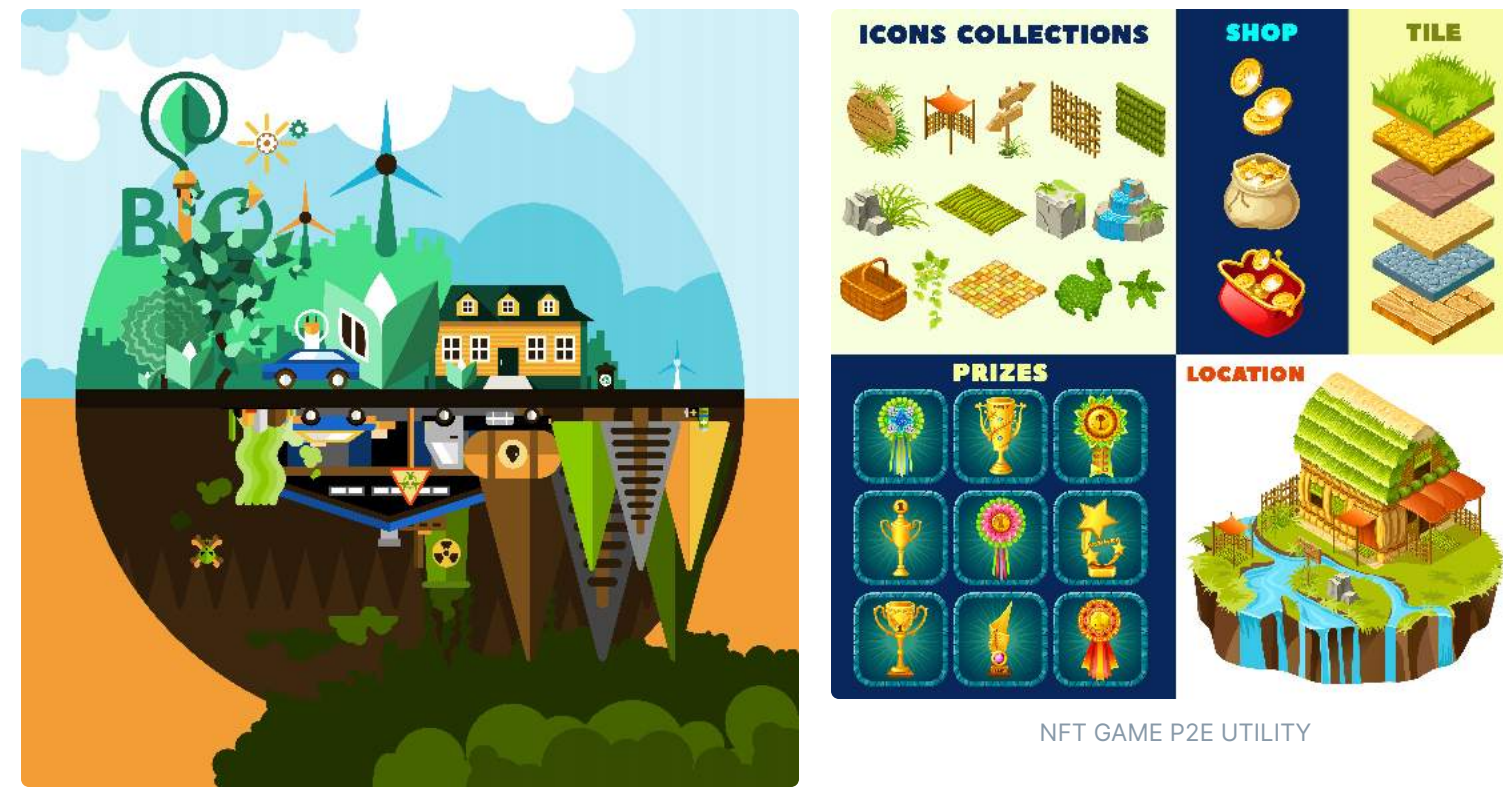

Competitors will start with a small city and work to develop it into a large metropolis, through the construction of buildings, infrastructure, and services.

SEE OUR PROGRESS

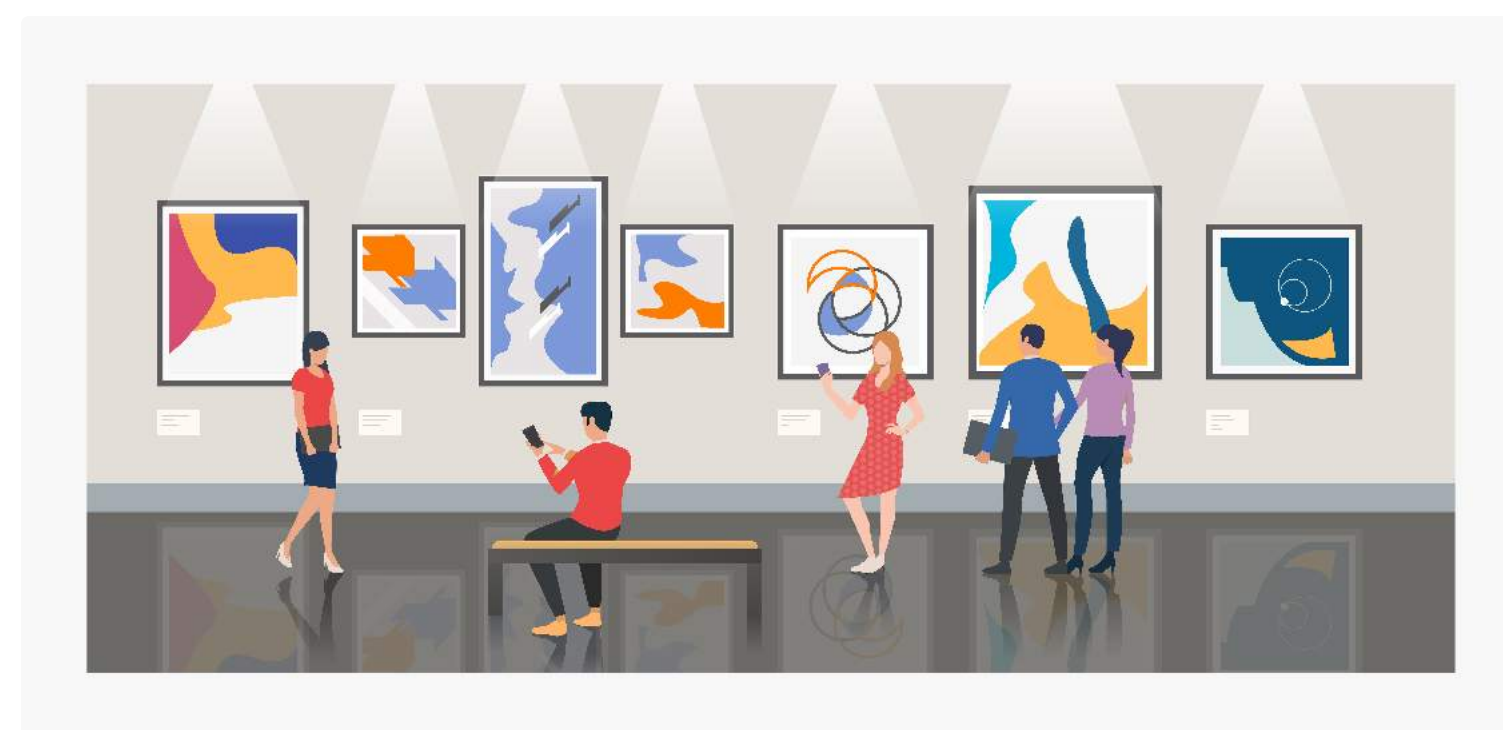

To earn game tokens, competitors must complete mini-games that represent the environmental challenges of the city, such as waste sorting, traffic management, energy efficiency, and more. In addition, competitors can trade resources and technologies necessary for city construction, thus creating a virtual market within the game.

BUILD YOUR GREENARTCITY

Competition among competitors will be based on the sustainability evaluation of the city, considering environmental health, citizen well-being, and economic efficiency. At the end of each season, competitors with the most sustainable and developed cities will receive token rewards that can be used to purchase goods and services within the game or traded for real currency.

Furthermore, the game will have a strong educational component, with the aim of raising awareness among players about environmental issues and solutions for building a sustainable future.

THE MARKETPLACE NFTs WORK ON OUR GAME P2E

You could transport the NFTs that are held in a small museum and galleries inside the game so as to put them and sell them directly in game and the auctions create them within the game world. enter to see an auction and interact with it you can ask a small amount of \$GAC a part of course to us a charity and a part to the owner of the museum that not only sells its NFT but earns by owning facilities in the game so as to incentivize to build and own buildings in the game, and also sub game structures in the game. The concept is to also create art galleries and earn about it

AUCTION, EXPO FAIR, CONGRESS AND MORE

Buy GreenArt Coin Token

GREENART DEX

GreenArt decentralised exchange (DEX) applies Automatic Market Maker (AMM) model to provide liquidity, establish fair prices for GAC/USDT (or other quote currency) pair trading and commission rewarding to market makers.

We must ensure that the added liquidity is placed in the same proportion of eth-token that is already established in the pool. At the same time, we want that at the stage of creating the exchange, liquidity will flow in an arbitrary proportion of eth-token, when the initial reserves are empty, i.e. when the pool has not yet been initialized
