Welcome to Saitama

Connecting the People to Decentralized Finance

Saitama is a web 3.0 technology company primarily focused on developing a decentralized finance ecosystem for everyday life. While innovations like blockchain and cryptocurrencies represent a bright future to the democratization of finance, understanding the basic concepts and skills needed can be challenging - not to say risky - to newcomers.

Saitama comes in with a mission to simplify DeFi technology and make it safer for the mainstream user, educating them and adding real life use cases that can make crypto adoption beneficial in their daily lives, such as transferring fiat money between peers and purchasing and selling tokens with debit or credit cards.

Our Beliefs:

Crypto can be simple
Finance is for everyone
Community is power

Our Journey

Saitama started as a community token project in June 2021. Led by a team of professionals with solid backgrounds in different areas. Saitama has grown into a multi-market, global business taking its token to an estimated market capitalization of over 7.5 Billion USD in November 2021 during its all time high, which placed it in a position among the Top 40 projects at the time.

From the very beginning, Saitama has set new standards in alt-DeFi projects by fully doxxing our team and registering a company to run the business.

Our Technology

The new SaitaPro mobile and desktop app with its non-custodial wallet, staking, farming and swap functionalities is at the core of Saitama's platform. Using state of the art blockchain technology and multiple security levels, the app also creates a safe environment by guiding users in the concepts of decentralized finance and carefully selecting the projects listed in its decentralized exchange. Designed to support the most popular blockchains, SaitaPro also contains a DApp browser with selected projects and connects users to Saitama's proprietary NFT platform FANG, and upcoming Play 2 Earn games.

SaitaPro

* Some features are in development and will be fully available in future versions.

- Non-custodial wallet, meaning your assets are decentralized and truly belong to you.

Use Cases

SaitaSwap

Only selected projects will be released on SaitaSwap, starting with the launch of LuckyRoo and The Motion tokens.

Edu

We aim to create an experience where the user is learning about crypto and finance while navigating in our ecosystem, with initiatives like the Saitama Academy.

SaitaPay

Through a partnership with ePay.me you can purchase tokens using debit or credit cards.

SaitaRealty

A satellite token in the Saitama ecosystem developing real estate technology.

Wolfcaster Games

We are developing play-2-earn games under the Wolfcaster franchise. Users will be able to use Saitama tokens to play and earn rewards.

FANG

Our proprietary NFT platform allows users to buy and sell digital art using Saitama tokens. Currently in Beta version at <http://fang.art>

The New Saitama Token

Saitama is an ERC-20 (Ethereum) token that can be purchased through decentralized and centralized exchanges. In June 2022, the Saitama token contract was upgraded to enhance security and performance features that will ensure its longevity and sustainability. So far, 55% of the token supply has been burned, leaving 45 billion tokens in circulation, with liquidity locked for 2 years until June 2024.

The New Saitama Token

Key Points

Added Security

Enhanced security with multisig wallets and ownership of the liquidity pool.

Fit to Face the Future

Flexibility to update features as token and use cases evolve.

Sustainable Business

New tokenomics keep the tax low while still contributing to funding and liquidity.

CEX Friendly Token

Ability to whitelist exchanges and reduced supply.

Hotter Burn

Our famous burn feature just got better with manual hyperburn events.

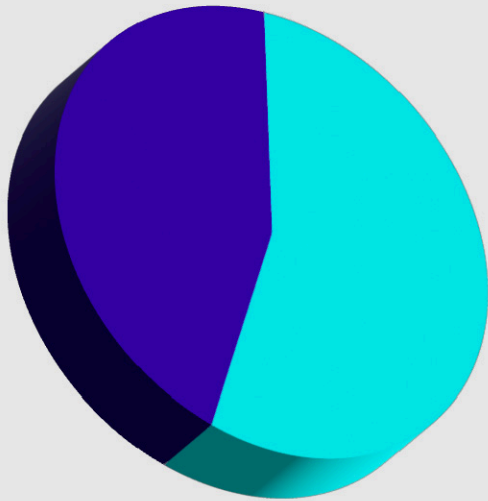

Meme No More

The Saitama token has left the meme category aligning with utility tokens.

Buy Saitama Tokens Using SaitaSwap

SaitaSwap, our decentralized exchange, is the best place to buy Saitama tokens. To use it, install our free SaitaPro App for Android ([download here](#)), and for iOS ([download here](#)). Or alternatively access (<https://dex.saita.pro>) and connect your preferred DeFi Wallet. Soon you will also be able to use Credit and Debit cards to buy Saitama tokens using fiat currency.

01

Get ETHEREUM on your SaitaPro Wallet App or connect your wallet on SaitaSwap Web. Don't forget to have enough ETH to cover the Ethereum Network gas fee.

02

Go to Swap and select Saitama as the Token you want to Swap and set Slippage Tolerance to 5%.

03

Now set up the value of ETH you want, confirm and submit the transaction. Then you can check the status on Etherscan.

Achievements & Aspirational Goals

- Reached 7.5 Billion USD marketcap at ATH without major exchange listings.
- Matured into a community of approx. 200,000 holders organically.
- Named 'Most Transparent Project' by Crypto Expo Dubai in 2022.
- Grew our collective social media outlets to 600K+ followers.
- Remained socially conscious and hosted over 15 charitable events in our first year.
- Redesigned the Saitama logo and brand to complement the evolution of the token.

The Power of the Community

Built on a strong and transparent foundation, Saitama harnesses the power of its multicultural community of hundreds of thousands of holders around the globe, which ensures the organic and sustainable growth of the platform through word of mouth and engagement.

The Saitama community has also hosted several initiatives of humanitarian assistance in different parts of the world, providing basic supplies, sanitary health and support in public education to communities in need.
