

SATOX - Whitepaper v1.3

SATOX is a cryptocurrency that is 100% community governed.
SATOX is an egalitarian ASIC resistance GPU-friendly Cryptocurrency.

WHAT IS SATOX?

SATOXCoin (SATOX) is primarily about safety and privacy of your funds. As in BTC code transactions are unversible and there is no way to block any single wallet in the network. Also, SATOX aims to stay POW GPU based blockchain. All of the above makes SATOX decentralized and free of censorship.

We believe that only POW GPU based blockchains are truly decentralized and free of censorship. Everyone should have opportunity to continue home mining in post 2023, so SATOX will always be a POW oriented chain.

SATOX is the native coin of the ecosystem, which is based on the SATOX blockchain. The project's objective was to integrate p2e (play-to-earn) functionality into popular games, including CS GO, Dota 2, Apex Legends, PUBG: Battlegrounds, Grand Theft Auto V, Team Fortress 2, Unturned, Rust, Naraka: Bladepoint, War Thunder, Warframe, Call of Duty®, Modern Warfare® II, Warzone™ 2.0, Destiny 2, Football Manager 2023, MIR4, ARK: Survival Evolved, Sid Meier's Civilization VI, Path of Exile, and many more. The main idea is to enable players to earn SATOX coins while playing these games, which can later be utilized as payment for participating in the project's eSports tournaments, where there are prizes to be won.

Our dedicated community have verified that 1020+ games played thru STEAM have earned them SATOX, and more will follow.

SATOX uses KAWPOW algorithm, the algorithm is protected against ASIC which leads to potential centralization. SATOX is a digital or virtual currency that is secured by cryptography, many cryptocurrencies are decentralized networks based on blockchain technology distributed ledger enforced by a disparate network of computers.

A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to government interference or manipulation.

SPECIFICATIONS

Name: Satocoin
Ticker: SSATOX
Algorithm: KawPoW
Block Reward: 300 SATOX -10% (P2E Funding) = 270 SATOX
Block confirmations: 10 Blocks
Block time: 60 seconds
Type: POW
Burned coins: 1+ Billion
Max supply: 8 Billion SATOX(would be mined over 100 year.)
Premine: 3.5B SATOX
 (For SWAP from the SATO-chain to the new SATOX-chain)
Re target Algorithm: DGW
Instamine Protection: 1000 Blocks
Halving time: 4 Years
p2p port: 60777
rpc port: 7777

THE CORE

Originally were four SATO community members who took some initiative to rescue stagnating abandoned coin. Earlier, original SATO had a tragic past – left forgotten with no purpose and goals.

Today, we embrace every Satocoin community member to join the team. If you are able to help the project and willing to be part of it in action – you are kindly welcome.

Current SATOX was formed as open source community project and shall remain so in future. So, everyone, who has a willing for cooperation and productive work for common goal should join.

Also the sub-team known as "SATOX Guards" are established to expand and promote P2E direction, apply and vote for important proposals, spread SATOX usage.

DEVELOPERS FUND

Satocoin community core team holds Developers fund.

It is being funded by 10% dev fee from each block and also from 50% of unclaimed original SATO coins left after the fork swap. Whole amount of fees goes directly to fund P2E process.

Other part of unclaimed coins have been burned.

The prime purpose of Dev Fund is enabling further SATOX development and progress.

Coins will be spent for promo activities, P2E rewards and potentially sold in reasonable quantities to facilitate funding for upcoming listings.

SATOX GUARDS CODEX

Satocoin Guards were established by SATOX CORE to determine dedicated community members who are ready for some actions for the project they care about. Their primary tasks are – testing, evolving and implementing the usage of SATOX in P2E Tech.

Also they have the rights to moderate telegram, discord or other social networks, as they are trusted community folks who put on all the needed efforts to see satocoin succeed.

Second part of their responsibility is the promotion of SATOX concept and usage wherever they find it possible and useful. Ultimately SATOX GUARDS will be the first POG testers, as developers of SATOX CORE move closer to creation of it. Guards are supervised and organized by SATOX KNIGHTS – their supervisors.

They decides on their tasks and missions, recruits new members and also grants coins for activity for each of them. Meanwhile SATOX CORE fund this division from Developers Fund. Despite Guards are granted by SATOX CORE they are not directly controlled by it, as one of the prime principle of SATOX project is decentralization.

That gives this division self-standing and independent way and vision of their mission. The concept is to give every SATOX Community member a chance to act and do better for common good – more than that, to be rewarded for it.

Since the birth of SATOX, our primary vision was and is to keep Satocoin as a community driven project and will remain as is.

And one of our opportunities is to give anyone, may it be from our Discord or Telegram the chance to join us and help further our project!

All we look for in a Satorian is to be proactive and help us out whenever they can!

TRUE POG

In recent times many crypto projects have included P2E features in coin distribution, to attract Gamer's to their projects. It worked out – combining gaming and Crypto was a success. The SATOX community was inspired with such a decisions, and designed its own unique vision and path to true Proof of Game. The case is – all known implanted solutions today are Play2Earn. Gamer's get coins from developers funds. Like a promo move, it was great and successful act. But SATOX aims to involve a much deeper concept. P2E is not POG, it does not participate in consensus and token distribution instead it is just rewarding it from funds of founders. We want players to create blocks and be a part of blockchain validation process on a par with miners. **As a concept** – to use SATOX QT core wallet as a single PC miner. The software interacting with OpenCL or Vulkan and other video modes on GPU will activate miner mode on a PC and a gamer will get coins straight in his wallet. Thats it. That gives limitless integration potential, because it does not require any game to be deployed with SATOX directly, user runs all process on his client side. The idea is that gamer will earn coins playing literally anything what uses GPU video mode, without consuming GPU resources. Sure thing will be to implement protection – one PC, one wallet, one gpu, one miner to ensure no multi launch abuse can be forced. Such design of true POG is not implanted or made elsewhere in Crypto sphere and Satocoin community aims to be pioneer in this fields. It will take much time and resources to do develop, test and release. SATOX CORE will research possibilities to integrate this design, motivate new developers and coders to join the project to make true Proof Of Game a reality. **Thats why SATOX Project see true POG as its prime and ultimate goal for incoming future, no matter how distant this goal seems to be now.**

APPLICATION USAGE FOR SATOX

SATOX resumable the characteristic of a decentralized Prof of Work(POW) and Proof of Game(POG) private digital peer to peer cryptocurrency enables instant payments to anyone, anywhere in the world.

- Unit of Accounting
- Store of Value
- Transfer of Value
- Assets minting on the blockchain
- Assets Transfer on the blockchain
- Game Purchase
- In Game Purchase
- Donation
- Tipping

ASSETS

An introduction to SATOXCoin Assets

One of the many reasons that encouraged us to start a new blockchain was the **Incomplete** and **wrong implementation** of assets on **"SATO"** blockchain, now with the new **"SATOX"** blockchain, assets have been **implemented** and **fully operational**.

Every time a member issue an asset on the blockchain a certain amount of **SATOX** is burned. Assets can be issued on the blockchain by any user who has a wallet with enough funds.

Assets or tokens can be used for anything the creator's imagination can conjure. Here is a few ideas you can use assets for.

Asset Applications

Representing real world custodied physical or digital assets to tokens

- Gold bars
- Silver coins
- Physical Euros
- Land Deeds
- Marvel Comics
- Energy credits (Electricity, Wood, Gas, Oil, Wind)

Representing a share of a project

Securities tokens: stock or shares of a company where the shares are represented by a token rather than a physical stock certificate.

- Securities or partnership interests with the built-in ability to pay dividends in SATOX(legal in many free market countries)
- Tokens which represent a coop, limited partnership, royalty sharing or profit sharing platform
- A token which represents a crowd-funded item with the ability to transfer or resell the item

Representing virtual goods

- Tickets to an event such as a soccer game with the ability to resell
- A license to allow an activity
- An access token to use a service
- In-game currency and items, transferable outside of the game platform

Representing a credit

- Gift cards
- Airline miles
- Reward Points

Asset Types

- Main Asset
- Sub Asset
- Unique Asset
- Messaging Channel Asset
- Qualifier Asset
- Sub Qualifier Asset
- Restricted Asset

HALVING SCHEDULE

(halving every 4 years.)

OLD SCHEDULE

BLOCK NO	HALVING BLOCK		DATE	REWARD
1	320,000	HARD FORK	18/10/2021	10000
320,000	added later		added later	1000
CHAIN MIGRATION	-	-	-	-

NEW SCHEDULE

BLOCK NO	HALVING BLOCK		DATE	REWARD
1	2,100,000		13/1/2027	300
2,100,001	4,200,001		13/1/2031	150
4,200,002	6,300,002		13/1/2035	75
6,300,003	8,400,003		13/1/2039	37.5
8,400,004	10,500,004		13/1/2043	18.75
10,500,005	12,600,005		13/1/2047	9.37
12,600,006	14,700,006		13/1/2051	4.68
14,700,007	16,800,007		13/1/2055	2.34
16,800,008	18,900,008		13/1/2059	1.17
18,900,009	21,000,009		13/1/2063	0.58
21,000,010	23,100,010		13/1/2067	0.29
23,100,011	25,200,011		13/1/2071	0.14
25,200,012	27,300,012		13/1/2075	0.07
27,300,013	29,400,013		13/1/2079	0.03
29,400,014	31,500,014		13/1/2083	0.01
