Dear VAIOT community,

We know that these are exciting times, and throughout this process, it may feel both energizing but also stressful for some of our loyal holders. As the VAIOT development team preps the Polygon contracts for the Airdrop and the Exchange swaps, we wanted to ensure that we are in consistent communication with our loyal community of token holders and community participants.

First, as VAIOT's new $VAI token address has been implemented and made live on some exchanges but not others, there may be some confusion on the rollout of our new token becoming fully live and tradable on all platforms. Kindly note that CoinGecko has not updated the $VAI website with the new contract info, but we are in contact with them daily to resolve the matter. Therefore, we urge you to double-check and verify the new official contract address.

> ***The current and ONLY token address for the NEW $VAI is:***
> ***0xD13cfD3133239a3c73a9E535A5c4DadEE36b395c***

VAIOT NEW $VAI is now (25.03.2022) trading on Gate.io we are still awaiting the swap to be finalized on KuCoin.

Furthermore, VAIOT will NOT relaunch the BSC staking pools. All people who held BSC-based $VAI will receive the NEW $VAI on Airdrop on Polygon.

For the time being, all staking pools available at staking.vaiot.ai are offline until the new staking contracts are relaunched. The relaunch will happen after the UniSwap relaunch (Thursday or Friday next week).

Finally, we encourage everyone to NOT attempt to move any of the old $VAI from exchanges, holdings, wallets, or any other place. By doing so, your $VAI will be permanently lost.

Thank you for your attention and patience, further updates will be shared as soon as possible.
