DECENTRALIZED FINANCE GAMEFI

What is DeFi

DeFi is an abbreviation for Decentralized Finance, which is a category of financial applications built on the Binance Smart Chain blockchain. DeFi provides decentralized alternatives to financial services without the need for intermediaries.

Examples include DEX (Decentralized Exchanges), lending platforms, stablecoins, staking and yield farming, and decentralized derivatives. DeFi leverages smart contracts for automating financial processes. DeFi has the potential for greater financial inclusivity but also carries its own risks.

What is GameFi

GameFi is a relatively new concept that combines elements of blockchain technology, decentralized finance (DeFi), and gaming. It refers to the integration of gaming mechanics and incentives into decentralized applications (dApps) or platforms, allowing users to earn rewards, trade in-game assets, and participate in various gaming-related activities.

GameFi aims to create an ecosystem where players can have true ownership and control over their in-game assets, such as virtual items, characters, or currencies, using blockchain technology. By leveraging non-fungible tokens (NFTs) and smart contracts, players can buy, sell, and trade these unique digital assets, often referred to as "play-to-earn" models. Additionally, GameFi may incorporate decentralized finance features, such as lending, borrowing, staking, or yield farming, within gaming environments. Players can use their in-game assets as collateral to borrow funds or earn additional rewards by participating in liquidity pools or yield farming protocols. The concept of GameFi has gained attention as it provides new opportunities for gamers to monetize their skills and investments in virtual worlds. It also introduces novel gameplay experiences and economic systems that leverage blockchain technology and cryptocurrencies. However, it's worth noting that GameFi is a rapidly evolving field, and the specific implementations and platforms may vary.

ALVA Ecosystem

Alva project is a project that aims to build an innovative and sustainable decentralized ecosystem in the blockchain world. Through the use of blockchain technology and the Binance Smart Chain platform, Alva Project aims to develop DeFi Staking and GameFi applications that will provide benefits to token holders and other users. Alva token Connecting Transactions in the Alva project Ecosystem, Alva Token is a token that is used as a means of transaction and exchange in the Alva project ecosystem. This token is built on top of the Binance Smartchain platform, which enables fast transactions and low fees. As an Ara Token holder, you will be able to use this token to transact with DeFi Staking and GameFi applications in the AlvaProject ecosystem.

Staking DAPP

Alva staking Dapp (Decentralized Application) is one of the interesting features offered by the alva project ecosystem. We will explain what alva staking dapp is, how it works, and how the alva Token is used to enhance returns and security for token holders within the ecosystem.

- You can stake alva token to earn reward Alva
- Annual Percentage Rate up to 36%

The staking dapp within the alva project ecosystem provides an opportunity for alva Token holders to increase their returns while contributing to the security and growth of the underlying blockchain network.

Through the delegation staking feature, participation in staking also becomes easier and more accessible for token holders. With the potential for higher future value growth of alva Token.

GameFi DAPP

Alva GameFi is a combination of unique features offered by the alva project to allow users to earn income from playing games.

Alva GameFi "Play to Earn" promotes game incubation and distribution, builds the Alva entertainment metaverse with a variety of games, and creates a new blockchain game financial system, making games not only interesting and enjoyable but also profitable!

Coming Soon!

Tokenomics

NAME : ALVA
SYMBOL : AA
TOTAL SUPPLY : 19000 AA
BLOCKCHAIN : BINANCE BSC

Token Distribution

Pre Sale

SOFT CAP	: 4.500
Hard Cap	: 9.880
ICO START	: 17 agustus 2023
ICO End	: 31 agustus 2023
ICO PRICE	: \$ 67

Road Map

A vertical timeline diagram on the left side of the page. It features a vertical line with three circular nodes. Each node is a dark blue circle with a lighter blue outer ring. Horizontal lines extend from each node to the right, pointing towards the corresponding quarterly section header.

Q3 2023

- Recruiting team
- Launch Social Media
- Building marketing team
- Building communities
- Preparation for Presale
- Start Presale August 2023

Q4 2023

- Defi Platform Development
- Start Defi Staking
- Listing on Global CEX
- Bsc Verified
- SmartContract Audit

Q1 2024

- Partnership for the future EcoSystem
- Listing on Coinmarketcap
- Listing on Coingecko

Road Map

With help from our teams, contributors and investors these are the milestones we are looking forward to achieve.

Q2 2024

- Start Defi Staking
- Listing on Asian BIG Exchange
- NFTs Development
- NFTs Characters design
- Add Liquidity on Pancakeswap Dex
- Giveaway Smartphone to alva Holders

Q3 2024

- Alva 10,000 Holders
- Launch Alva NFTs
- Worldwide Blockchain Community
- Start GameFi Development
- Start Web3 wallet DAPP Development
