Halisworld

Halisworld is a virtual reality platform powered by Binance blockchain. Users can create, experience, and monetize content and applications. Halisworld is a fantasy world in metaverse. Mixing dreams with reality and making a new world. Contents can range from static 3D scenes to interactive systems such as games.

Halisworld innovates how humans interact in the digital space by building the truly Decentralized Social Metaverse. Thanks to technology, Halis team is developing the **HalisWorld** and the **Halisworld App**, two products that allow your dreams to come true: **the only limit is your imagination!**

Imagine creating your own Ready Player One from scratch. Halisworld is building a fully immersive and decentralized 3D world for its Players to have fun, explore, socialize, earn achievements, innovate, and create with no limits.

Unlike other virtual worlds and social networks, Halisworld is not controlled by a centralized organization. There is no single agent with the power to modify the rules of the software, contents economics of the currency, or prevent others from accessing the world.

This document lays out the philosophical underpinnings, technical foundations, and economic mechanisms of Halisworld. Halisworld provides an infrastructure to support a shared virtual world, also known as a metaverse. Halisworld is an immersive world with 3D and VR modules that incorporates metaverse real estate investment. We will take you for a few minutes to Halisworld. It's parallel world on Web3. All worlds are built on blockchain with fantasy.

Halisworld is a bridge between the physical and virtual world.

There are segments of:

Dream world

In Dream world, players can do their wishes in our world. What you imagine in Dream everything is real here. Players will full control their Dreams.

Real world

Real world is like standard world which players doing in real life. Here is everything Real and legit. However, you can change it.

Fantasy world

In Fantasy word, each player can make their own Fantasy word in metaverse and there are no limits with it. Here players can do everything in their Fantasy.

Trippy world

In Fantasy word, each player can make their own Fantasy word in metaverse and there are no limits with it. Here players can do everything in their Fantasy.

Play in your fantasy world. Incredible games first time launch. GameFi, Reality and Virtual Reality mixed space. If you have never seen a hallucination, welcome to our world, or you saw already continue with us build your fantasy dream world. In Halisworld everything is possible in a night dream.

Teamwork makes the dream work. Bridging the gap between the physical, Web3, and the metaverse. Halisworld is not just a metaverse, it's a second life on the blockchain.

If you can't do it in the real world, you can do it in the Metaverse.

Abstract

The Metaverse

Halisworld provides an infrastructure to support a shared virtual world, also known as a metaverse.

The Halisworld metaverse supports multiple platforms, which remove the barrier of different hardware, software, and operating systems. This enables more users to invite and connect with their friends & family to enhance possibilities in the exponential growth of the user base.

- a limitless landscape with endless possibilities; an opportunity to create, transform, and transition values; the next step in the evolution of Blockchain (and the Internet) as a whole. The Halisworld Metaverse is a multifaceted p2e game with a dream of innovative, incentive based real time mechanics promising to enhance gaming experience and user in the new era of gaming 3.0

The market is far beyond just the gaming or blockchain communities, which can get easily onboarded from regular platforms.

Abstract

We are innovating a new metaverse utilizing the innovative technology of blockchain, connecting the unique features of blockchain to narrate towards wide adoption by giving the users an immersive experience within VR (Virtual Reality). Halisworld has the potential to become the market leader of cross-platform metaverse to attract millions of users, and an associated greater opportunity for revenues.

The Halisworld metaverse is designed in a way to give users maximum freedom just like in real life. Users can enjoy the democratic governance model based on a liquid democracy and real-world inspiration rules over a DAO (Decentralized Autonomous Organization) through the Halisworld native token.

There will be one type of token in our game, which will be called \$HLS and based on the Binance blockchain which we will integrate into Unreal Engine to enable digital currency and digitally scarce virtual items that players can buy, sell and trade with each other.

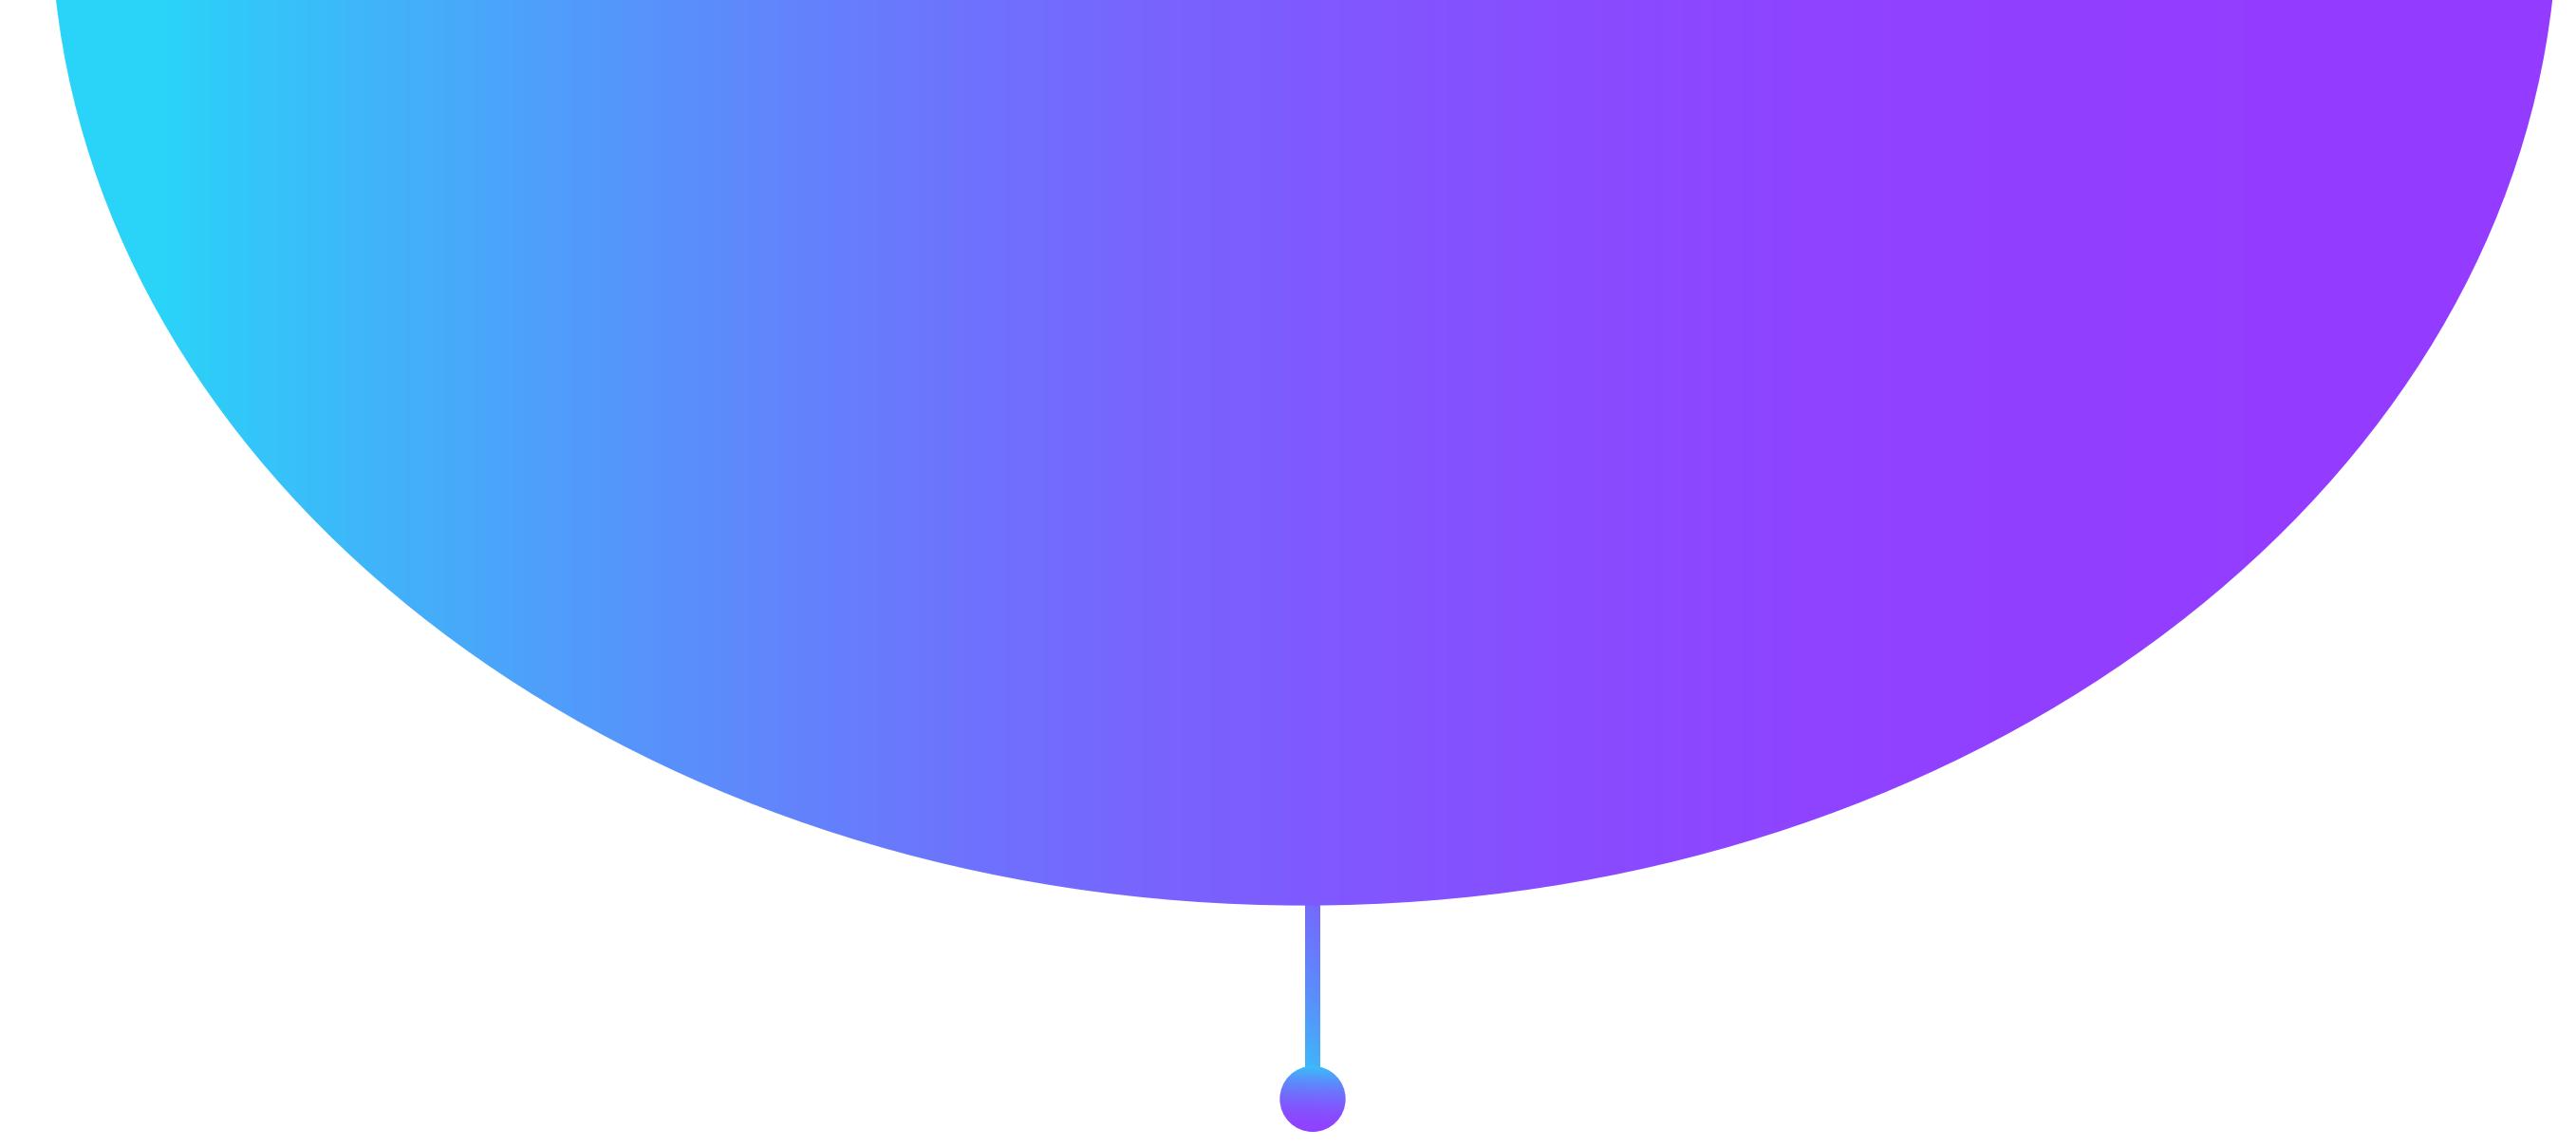

HALIS WORLD

Metaverse

The metaverse is here. With global adoption of the metaverse spurred by the entrance of many of the world's largest technology players, the likes of Meta, Microsoft, and Google – in addition to industry and societal leaders like Nike, Disney, and South Korea's government, there is more than an argument that web3 is very real and here to stay.

Metaverse

The metaverse will mean different things to different people. Many will be attracted to the social aspect or gaming, while others will see the opportunity for business, acquisition, and investment. This utopian idea that we will be able to do everything in the metaverse that we do in real life, but without restrictions, allowing you to really expand your mind, will naturally attract every type of person. At its core, much like everything else in our world (physical & digital) locations will need to be developed in order to organize and manage interests.

Much as we have seen throughout history as civilization expands so too does the desire to acquire land in the new frontiers - ultimately creating scarcity and high prices.. If you have doubts, consider the housing markets around the world, or try to buy a domain.

The metaverse will be no different, and much like previous frontier expansion, value will be created by scarcity, quality, and location. Halisworld's vision of the metaverse will be one that is mixing Real world and Dream world together, allowing us to take elements from the real world, such as people and objects, and provide the option to add creative elements to the extent your imagination can handle.

HALIS WORLD

Halisworld's Mission and Vision

Mission

Halisworld strongly believes that in the near future, the Blockchain-based will grow exponentially and become one of the major pillars of this digital era. One of our Mission is create a virtual word with human imagination. In addition, integrate it to our life.

Vision

Our vision is to create a persistent virtual world that can offer experiences to any person connected to the internet. Halisworld is an online visual world, which we are developing in Unreal Engine to achieve this massive scale and meaningful persistence

Introduction

This document is designed to introduce the reader to Halisworld, the leading decentralized Metaverse investment organization and inform them about the project's vision, goals and strategies for building the single greatest Metaverse investment ecosystem.

Halisworld's main objective is to lower the barrier to entry for investment in the Metaverse, while also contributing to improving decentralization to ensure that control and influence over "decentralization" projects remains in the hands of the community.

This document will outline the current state of the market, its biggest problems and the trillion dollar opportunity that is the Metaverse. This document will also explain, in great detail, Halisworld's solutions to these problems and how they fit into their ecosystem of products and services offered.

Introduction

On top of this, the document will also delve into the project's team, tokenomics, funding and marketing strategies to transparently outline essential information that is quite commonly ignored by other "decentralized" projects.

Halisworld aims to build an ecosystem that will connect the Metaverse with Universe, through the strategy of developing smart contracts that can be utilized both in our world and the metaverse. Investors will benefit through the valuable features of \$HLS and the ever-growing ecosystem to boost adoption with a long-term vision. Halisworld will enable users to get financial stability and accomplish asset-building goals for long-term success.

The world of blockchain is growing rapidly, and the demand for new, innovative, and more secure blockchain solutions is increasing. Our team of experts is going to present a new blockchain solution that addresses the current limitations of existing blockchain solutions and provides advanced features that cater to the needs of modern businesses and individuals.

Features

Our world will allow ownership of property and **custom-built metaverses**. Abandoned buildings in the wastelands will be purchasable, and by fortifying floors or buildings, or building fences around them, players can limit access only to authorized players. Properties will have safes and storage boxes to store virtual items. These will be cryptographically locked so that other players cannot hack them.

Players will start on foot unless they have purchased virtual items in advance, and will be able to find and repair vehicles, or purchase them from other players and trading posts. Players will also be able to pay NFT's to fast travel to other locations.

Token Metrics

Token Information

- Token name: HALIS
- Ticker: HLS
- Total supply: 1,000,000,000 HLS
- Token Type: Utility
- Decimals: 18
- Blockchain Network: Binance Smart Chain
- Token type: BEP-20
- New tokens will not be issued

● Fairlaunch: 15%	● Foundation: 10%
● Marketing: 20%	● Liquidity & Listings: 10%
● Team: 10%	● Advisors: 5%
● Development: 20%	● Rewards: 15%

Token Metrics

Budget Allocation

- Technical development: 54%
- Business development: 22%
- Marketing and PR: 20%
- Legal and finance: 4%

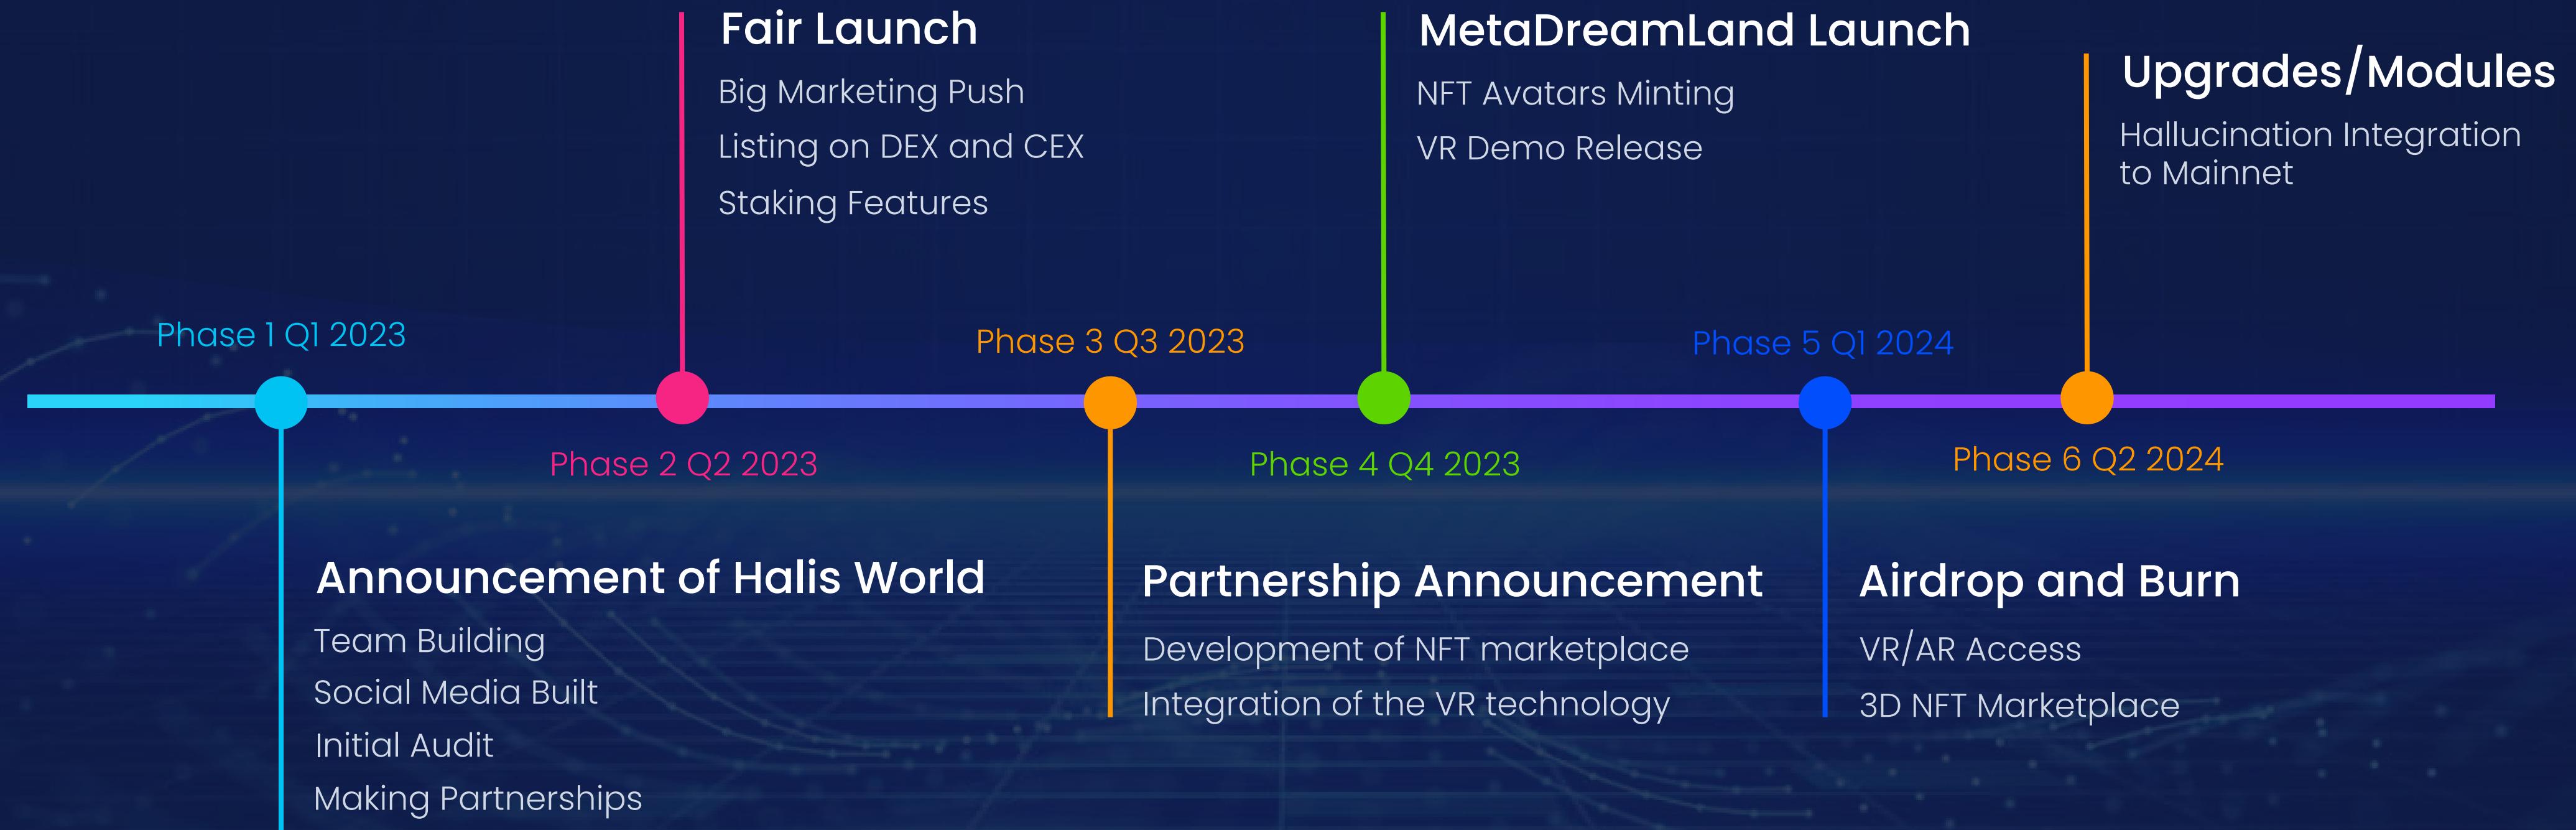

Allocation	%	Tokens(Mln)	At TGE	Vesting Period
Fairlaunch	15%	150	100%	No Locks
Marketing	15%	150	-	3 MONTH CLIFF AND MONTHLY RELEASE FOR 3 YEARS
Development	20%	200	-	6 MONTH CLIFF - MONTHLY VESTING FOR 3 YEARS
Foundation	10%	100	-	3 MONTH CLIFF AND MONTHLY RELEASE FOR 5 YEARS
Liquidity & listing	10%	100	-	1 YEAR CLIFF AND MONTHLY VESTING FOR 3 YEARS
Rewards	15%	150	-	MONTHLY RELEASE FOR 5 YEARS
Team	10%	100	-	1 YEAR CLIFF AND 3 YEAR VESTING
Advisors	5%	50	-	6 MONTH CLIFF AND 1 YEAR VESTING
	100%	1000*	-	

On pinksale, "Presale" we must set a lower and upper limits, the lower must be half the upper limits, for example 50 to 100 BNBs, no guarantee that we will reach any one of them.
So we think in "Fair Launch" our project can get it's fair value which, people who will decide it

*IT IS EXPECTED ALL TOKENS WILL BE CIRCULATED AFTER 5 YEARS. STAKING REWARDS WILL BE RELEASED AS AND WHEN NECESSARY TO REWARD LONG TERM HOLDERS OF THE TOKEN.

* IT IS ANTICIPATED STAKING REWARDS WILL COMMENCE IN MONTH 3 AFTER GO LIVE HOWEVER, WILL REQUIRE USERS TO HAVE TO LOCK TOKENS IN ORDER TO BE REWARDED

Roadmap

Core Team

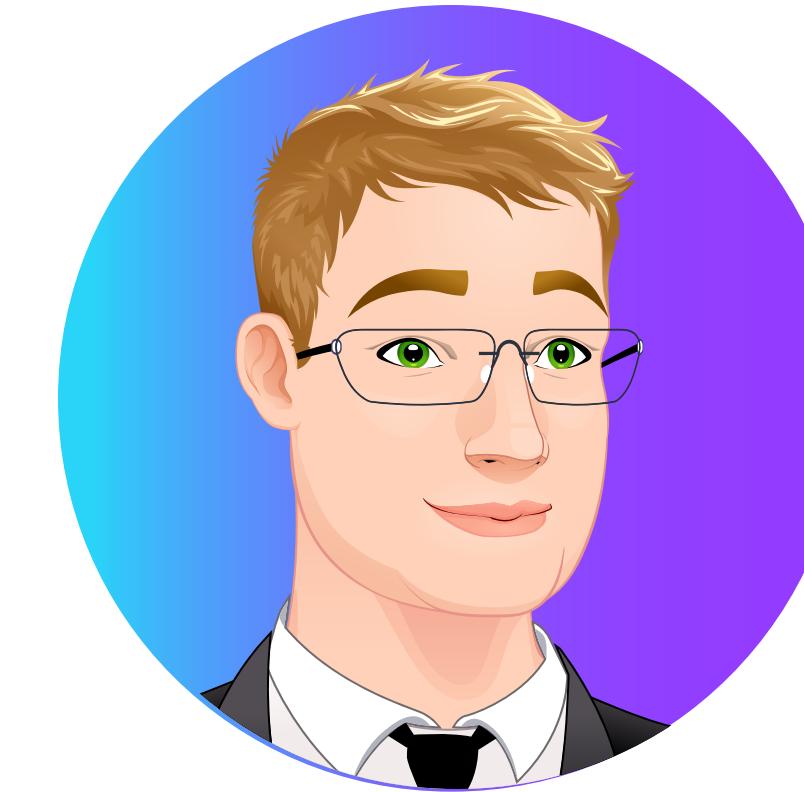

Ali
Chief Executive Officer

B.Sc. CEO and Founder. He has worked in many global companies. 8+ years of experience in the Blockchain industry. Moreover, focused on early-stage startups. He will bring to Halisworld a wealth of experience and vision marketing strategy, business operations and lead generation.

Mehman
Full Stack Developer

M.Sc. Full stack DEV and Co-founder. He has starts carrier as website developer. He also worked in Finance&Bank sector many years. 10+ years experienced in engineering and 5+ years in blockchain Technology as well.

Orxan
Chief Operating Officer

M.Sc. CFO. With 5 years focused on early-stage tech startups. He is also experienced in Artificial Intelligence, Machine learning, Internet of Things and Augmented Reality with Blockchain Technology and there for, brings this rare combination to Halisworld

Nicat
Chief Marketing Officer

M.Sc. CMO. He has worked in the marketing and blockchain industry for more than 6 years and for web3 projects across DeFi, GameFi, the metaverse, and NFTs. Experienced with leading technical and business teams.
