

Transitioning to ChainBounty: Important Updates on the UPP to BOUNTY Token Swap

Sentinel Protocol Team · [Follow](#)

Published in Sentinel Protocol · 2 min read · Oct 31, 2024

We are excited to announce the rebranding of Sentinel Protocol to ChainBounty, a pivotal move in our mission to enhance security and user experience in the blockchain space will unfold as detailed in our white paper, bringing forth a new era for our community. As part of this evolution, we will be migrating to Arbitrum One, commencing tomorrow, October 31, 2024, and continuing until December 30, 2024.

Next Steps for Web3 Users

Attention to all the web3 users holding web3 wallets we have done our best to make the process as simple and seamless as possible.

All you need to do is to access our [swap service](#) and simply follow the migration [guide](#) to swap all your existing UPP tokens into our new BOUNTY tokens.

Please note that this service is best accessed on a PC, as the mobile experience may not be optimal.

If you face any difficulties contact us on any of our social media platforms highlighted below.

Important Note for Exchange Users

For our users on exchanges, please refrain from utilizing the swap service directly. Migrations for exchange users will be managed through our collaboration with the exchanges. This approach ensures a seamless transition and maintains the integrity of your assets.

A New Chapter with ChainBounty

As we make this significant transition to the new BOUNTY token, we want to thank our community for your continued support and understanding. This rebranding represents not just a new name, but a renewed commitment to providing top-notch security solutions and a more robust ecosystem for our users.

Stay tuned for further updates as we progress through this migration. Your trust is paramount to us, and we are dedicated to making this transition as smooth as possible. Welcome to the future of ChainBounty!
