Project Overview

PREME is a crypto project with the aim of enabling companies and freelancers to enter Web3. We see ourselves as the bridge between Web2 and Web3. By using NFC technologies, we also have the possibility to connect physical items to Web3. Our partnerships with in real life business that need NFT support and transition skills from Web2 to Web3 will be where we separate our project from the pack.

Background and Motivation

When businesses want to enter the crypto world, they often face regulatory uncertainties, security challenges, lack of understanding about blockchain technology, and difficulties in integrating crypto with existing financial systems. Understanding the complex technology behind cryptocurrencies and blockchain is crucial for successful implementation. Our motivation is to help everyone onboard to Web3, and we are offering all the solutions to make that happen.

Technological Details

PREME bridges the gap between Web2 and Web3 through extensive training (IRL, YouTube, and website seminars) with our partners, while providing them with a platform to sell their products, services, or business shares in the form of NFTs (Non-Fungible Tokens). We also assist them step-by-step in implementation and marketing through our dedicated online shop or their preferred outlet. NFTs enable them to sell their artwork or company shares directly to their target audience without the need for an agency or gallery as intermediaries. This provides a tremendous cost-savings, and offers greater control over their sales process and prices. Our NFTs also provide benefits for both businesses and their attendees of trade shows, cataloging attendance and offering perks and bonuses.

Use Cases

Our PREME token serves as the native payment method for our upcoming Marketplace and offers discounts compared to traditional payment methods. Our partners either buy and burn PREME or invest in it, to help grow our ecosystem.

The PREME NFT collection allows its holders to vote for their rewards. Each PREME NFT (holder) has a vote, orange and black. Rewards will be SHIB and/or PREME ecosystem-related. Voting takes place monthly, and the entire collected tax for NFT holder rewards for that month is used for purchases. Full transparency: NFT marketing wallet address for this project (keep tabs via Etherscan) - 0x49685d5C5163D58f344D825912c4789bCE42496C Black NFTs will be fulfilled first, and the remaining NFT rewards will be distributed among the orange NFTs through a lottery system. If the community votes for token rewards, both NFTs will be equal and receive the same amount of Tokens.

Governance Model

In addition to rewards, NFT holders can also bring proposals for project development to a vote. Therefore, we will create a DAO. Every orange and black NFT has one vote.

Regulatory Compliance

The legal status of cryptocurrencies and blockchain-based assets, including PREME tokens, may vary in different jurisdictions. It is your responsibility to comply with all applicable laws and regulations in your country of residence.
