Vision

We are steadily moving towards a world where everyone uses digital money, payments for goods and services will be made via digital means and not with physical money. The global change in the means of payment will bring with it development and momentum for the technology industry in general and for blockchain technology in particular. At the same time, cryptocurrency trading will continue to evolve, Institutional and capital markets adopt currency trading and adapt regulation. The TBC currency will be a leading currency in the crypto market with high liquidity and trade volumes.

Missions

To register and issue 12.5 million TBC coins for trading on crypto exchanges. To be the leading currency in the crypto market while emphasizing technological and digital innovation, a quality human team, and the constant pursuit of excellence.

Values

Caring and daring

Caring is expressed in the attention and concern for our partners, our environment and the community in which we operate.

Daring reflects our desire to face challenges and difficulties and to seek out new ideas for future success.

Caring neutralizes the risks involved in daring and gives us the courage to act with strength and courage.

Passion and Professionalism

Our passion is expressed in the joy of creating innovation, in the real passion for trading in the crypto market. We take pride in the professionalism that accompanies us during our work as a company working for the TBC community and the entire crypto community.

Roadmap

The problem that the TBC currency solves

New investors and traders do not understand the different currencies and the technology behind them and therefore find it difficult to understand which currency to invest in.

In addition, there are large players in the crypto market such as arbitrage players, trading robots, and traders holding a large number of coins and need to transfer large orders in many currencies simultaneously.

Furthermore, traders in the traditional capital market, such as investment funds, investment houses that manage capital and are interested in investing in leading digital currencies have to deliver multiple purchase orders for the various currencies, which makes it difficult and cumbersome to complete the transactions.

The Solution

TBC- Ten Best Coins

A currency linked to the ten best coins in terms of market cap

From now on, traders and investors can be exposed to a wide range of cryptocurrencies in one simple operation of purchasing a single coin.

Roadmap

On the TBC currency

Characteristics

The price of the currency is linked to the market value of the ten largest cryptocurrencies in terms of market value, change in the percentage of the ten largest currencies is reflected in the price of the currency TBC.

Each currency receives an equal weight of 10%.

When a currency drops in market value and exits the list of the ten largest currencies, it is automatically replaced by a currency in its place. Currencies issued for circulation will be backed by at least 30% in cryptocurrencies.

TBC tokens were created on the Ethereum ERC-20 blockchain network.

Roadmap

The use of coin funds

The funds from the issuance of the coins will be used:

For website development- presentation of trading tools, information and advanced graphs that will be used by community members

To develop and upgrade TBC code

To upload content and news from the world of crypto to the press, various media and social networks - which will help the general public in adopting cryptocurrencies

For the purchase of the ten best currencies in terms of market capitalization.

Amount of TBC coins

The number of TBC coins created on the blockchain network is 25,000,000. The number of coins is fixed and cannot be changed.

Each coin can be divided by 18

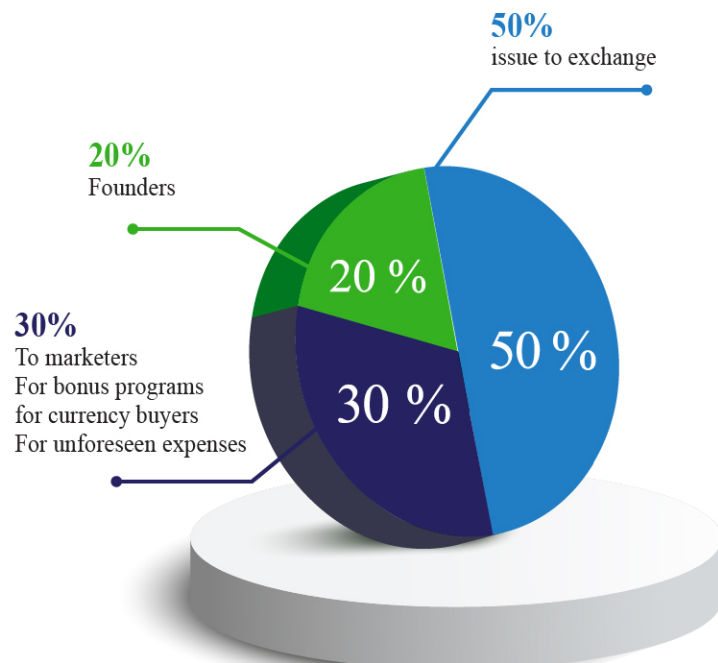

Example:

One TBC coin is worth \$ 2,500

$2500/18 = 138.8$
