

Distribution

The total supply of THL is 100,000,000 tokens. The token distribution is designed to ensure that active users of the protocol earn THL tokens. Emissions will accrue to depositors of the TSP (Thala Stability Pool), liquidity providers on ThalaSwap, and any future implementations and products under Thala Labs.

The distribution can be found below:

THL Tokenomics Pie Chart

Contributors & Advisors: 20%

- 20,000,000 THL is allocated to the current and future core contributors, community contributors, and advisors of the Thala protocol.

Investors: 20%

- 20,000,000 THL is allocated to Thala's investors who supported the protocol in its infancy. This includes Thala's recent seed round and future raises.

Treasury: 15%

- 15,000,000 THL is allocated to the reserves for future treasury swaps and other key actions necessary for the protocol's success, dictated by governance. 20% is unlocked from TGE, with a linear vesting schedule of 5 years.

Community: 35%

- 35,000,000 THL is allocated to incentivize usage of the CDP and AMM, among other future products.

Token Generation Event (TGE): 10%

- 10,000,000 THL will be available as part of the genesis circulating supply.
