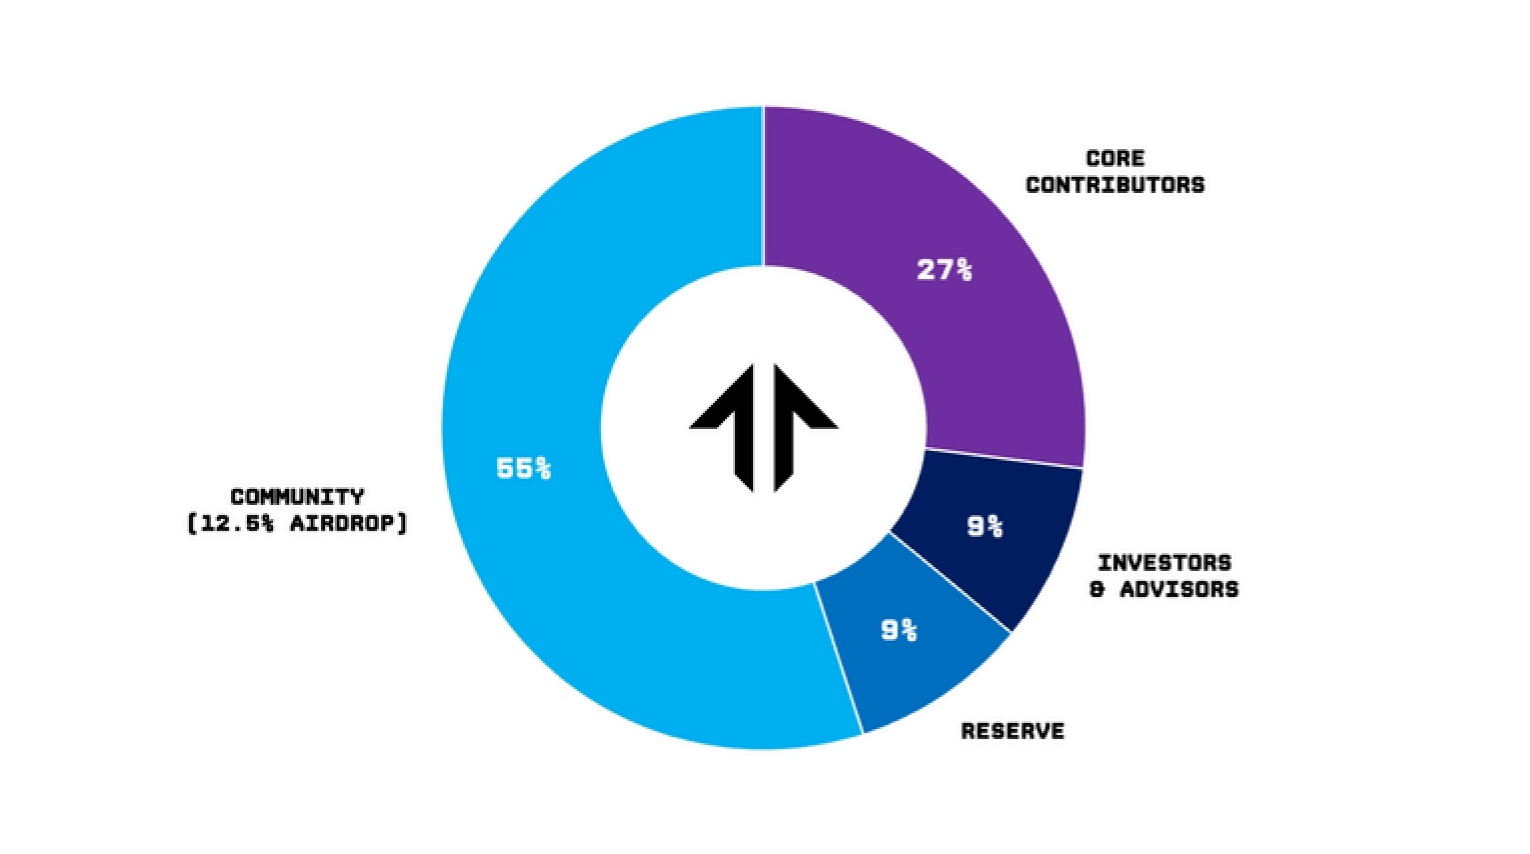
Tokenomics

Distribution

$TNSR has a total supply of 1 billion tokens. The initial $TNSR distribution is as follows:

- 55% or 550,000,000 $TNSR to the community
  - of which 12.5% is the initial airdrop
- 27% or 270,000,000 $TNSR to core contributors
- 9% or 90,000,000 $TNSR to investors & advisors
- 9% or 90,000,000 $TNSR reserve for future fundraising & development



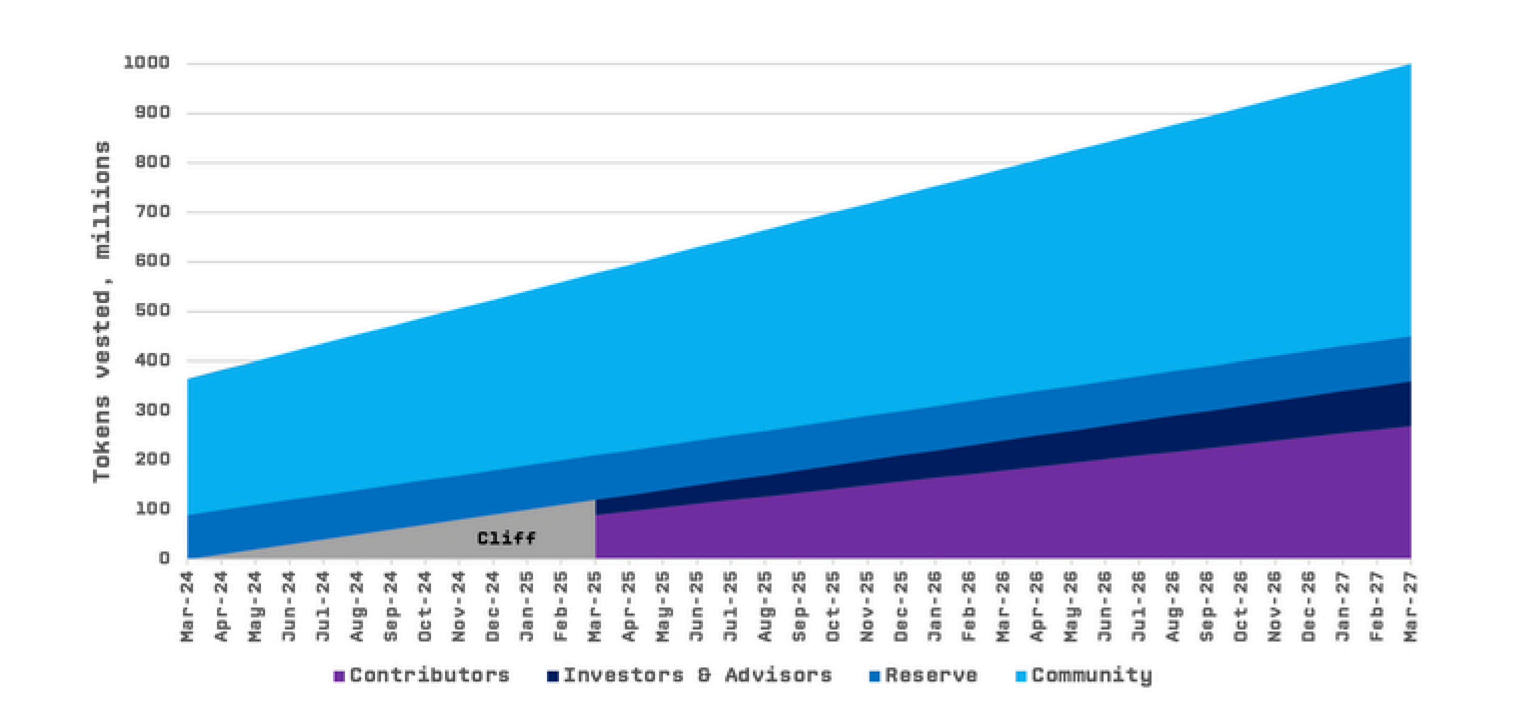
$TNSR distribution.

Contract address is `TNSRxcUxoT9xBG3de7PiJyTDYu7kskLqcpddxnEJAS6`.

Vesting

Vesting is split into three buckets:

- Core contributors, investors & advisors: 3 year linear vest with 1 year cliff
- Half of community treasury: 3 year linear vest, no cliff
- Half of community treasury and reserve: no vest



Vesting starts in March 2024 when $TNSR SPL token was deployed.

Community Treasury

12.5% of the total supply will be immediately distributed through the first airdrop to owners of Treasure Boxes and Tensorians.

The remaining 42.5% will be used for incentive programs, liquidity provisioning, and grants beneficial to the Tensor ecosystem.

As $TNSR tokenholders control the supply of the $TNSR tokens, tokenholder governance can decide to vote in a reasonable inflation rate when the community treasury runs out.
