

Important PAAL Token Migration Announcement

PAAL AI · Follow

2 min read · Jul 17, 2023

Dear PAAL community,

We are excited to announce an important update that will take our token ecosystem to a new level. To facilitate more significant features, we are migrating our PAAL tokens to a new version: PAAL V2. Here are the crucial details you should know:

Migration process

The migration process will be automatic, requiring no action from token holders. Your PAAL tokens will be migrated to PAAL V2 tokens via a migration contract/dapp without the need for you to manually send us any tokens. The conversion rate will be 1:1, meaning you will receive an equal amount of PAAL V2 tokens for each PAAL token you currently hold.

Staked tokens

If you have staked your PAAL tokens, don't worry. The migration process will take care of your staked tokens as well. After your staking period is over, you can simply withdraw your PAAL V2 tokens from the same staking pool without losing any rewards.

Purchasing tokens

Yes, you can still buy PAAL tokens! Any tokens you purchase before the migration deadline will be automatically converted to PAAL V2. Since the migration will be a 1:1 process, all tokens bought will carry over to the new system.

Deadline for migration

The deadline for the migration is scheduled for July 18th, 11:59 pm EST. Please note, this is subject to change, and we advise all members to stay tuned for any updates or changes.

Please understand that this migration process is a significant step towards growing and enhancing our platform. We are grateful for your support and patience during this transition period.
