Dear Community,

We thank you for your patience with the launch of the PAID v2 token and appreciate all the support we have been receiving from our community, investors, and strategic partners.

It is with great pleasure to announce the PAID v2 token contract address below:

`0x1614f18fc94f47967a3fbe5ffcd46d4e7da3d787`

Top highlight

To note we have contacted Coinmarketcap, Coingecko, and other platforms to update to the new token contract address. Please only use the contract address above until they have updated.

There are two airdrop categories:

1. The first airdrop finished at 13:10 UTC on March 10th, 2021 which includes only liquid tokens from the snapshot taken the block before the attacker's first sell order on Uniswap, Block Number: 11979858 @ Mar-05-2021 06:07:13 PM +UTC. The remainder of the locked tokens will be airdropped following the same predetermined vesting schedule.
2. The second airdrop will take place in the next few days, distributed to various affected parties. More details about who is considered an "affected party" can be found in the [FAQ](#).

If you were holding your PAID v1 at Gate.io or staking on Launchpool or Unifarm at the time of the snapshot, please note that this is taking us longer to reconcile these balances due to the extensive data analysis required. We are diligently working with these platforms to retrieve all relevant data points, and will update the community as soon as possible.

We are currently only airdropping liquid (unlocked) tokens. Vested tokens will be airdropped shortly after.

Thank you again for your support, and here's to an amazing year together with PAID!

Best,

PAID Team
