The new **SSV token upgrade** is here!

You can now upgrade your CDT to SSV token

We're thrilled to announce that following yesterday's successful multi-sig committee, where all six participants signed using the upgraded smart contract, where the first SSV tokens were minted by the ssv.network. Check out the first **SSV Committee Call** we held yesterday.

How To Upgrade My Tokens?

All you need to do is connect your wallet and deposit your CDT to the smart contract. As a reminder, you will then receive SSV tokens in a 1:100 ratio directly to your deposit address (100 CDT = 1 SSV).

The process is simple and straightforward, in case you need further details, you can follow the guides we created:

Video Guide — https://youtu.be/5_JLunFe-p4

Step by Step Guide — <https://docs.ssv.network/ssv-token/upgrading-to-ssv>

You can also follow the FAQ at the bottom of the upgrade page for more information

• • •

Please make sure you use the **correct URL** for upgrading your CDT! *Double-check the URL is the correct one:* **<https://ssv.network/token-upgrade/>**

Also, please make sure that the **smart contract** you're interacting with is the correct one: **0x2bf73A478cc6a7bA4E6758A3A52AbDc8CDBa735E**

In case you still need to refresh your memories, last week the SSV DAO **agreed** on upgrading CDT tokens to SSV, paving the way for the successful mint that took place.

You can reach the team on **Discord** if you still have questions
