BNS token V3 migration complete

BNS · Follow
1 min read · Apr 18, 2022

As per our previous announcement

https://medium.com/@bitbns/upgrade-of-bns-contract-to-v3-eedcf0881abd

The migration of BNS token was done to a new contract

The new contract address on ETH chain is
0x19e2a43fbbc643c3b2d9667d858d49cad17bc2b5

The token is also live on polygon and the new polygon chain token contract address is

MATIC — 0x064ba185868e06af1bfabdc0e942b6d6f54d06a0

Soon would also be live on BSC chain

Every holder of BNS would get tokens in the ratio 1:100

So for example if your wallet had a balance of 95 BNS tokens now the balance would show up as 9500 BNS tokens

What do you need to do as a token holder ?
As a user holding the token on exchanges or on a private wallet, you have to do absolutely nothing.

- Bitbns has migrated to the new contract
- Other exchanges would soon do this and announce it
- We would then open up deposits and withdrawals for BNS, post the migration is complete
- All existing blockchain addresses have got V3 tokens as per snapshot taken at block 14179350.

So now BNS in trading section on bitbns app and website with a 1/100 price as the factor has been changed
https://bitbns.com/trade/#/bns

https://bitbns.com/trade/#/bns-usdt

All features like where BNS is used like SIPs, FIPs etc would also correctly reflect the new BNS values. The trading for the token starts from 7 pm today

The changes would also reflect on coinmarketcap and coingecko soon

Previous Token Contract which is irrelevant from now on
https://etherscan.io/token/0x695106Ad73f506f9D0A9650a78019A93149AE07C
