

INTRODUCTION

MON will be issued as an ERC-20 token. At the token genesis event (TGE), 1 billion MON tokens will be created, establishing this as the final token supply.

TOKEN

** Players will be able to use MON tokens as preferred in-game payment method (i.e. purchasing in-game currencies at a discount) in all Pixelmon games, including Pixelpals.

TOKENOMICS

* Percentage per category is rounded for better readability, refer to the table below for a more precise number.

** The Mon Protocol Team reserves the right to make changes to Tokenomics figures pre TGE should market conditions change or new launch opportunities arise.

TOKEN UNLOCK

MON will be distributed and unlocked as follows:

MON TOKEN EMISSIONS

* The Mon Protocol Team reserves the right to make changes to Tokenomics figures pre TGE should market conditions change or new launch opportunities arise.

** After the 6% TGE release the Community Claim pool will be subject to a cliff and vesting curve established by the Mon Protocol Team. The smart contract vesting curve visualized above represents the upper limit of the tokens from Mon Protocol Team can release at any point in time.

As the first partner of MON Protocol, the Pixelmon Community becomes the de facto launchpad Community for MON.

ECOSYSTEM FUND

The Ecosystem Fund will have the objective of growing the MON Protocol Ecosystem and maximizing licensing flows for Pixelmon IP holders. The Ecosystem Fund allocation will be split across two verticals:

* The Mon Protocol Team reserves the right to make changes to Tokenomics figures pre TGE should market conditions change or new launch opportunities arise.

** The Growth Fund was created for Ecosystem Fund decisions requiring member and centralized decision making, respecting the fund objectives.

OTHER ALLOCATIONS

* The Mon Protocol Team reserves the right to make changes to Tokenomics figures pre TGE should market conditions change or new launch opportunities arise.

DECENTRALIZED IP GOVERNANCE

PIXELMON IP GOVERNANCE

One of MON Protocol's functions is to enable on-chain IP governance. The first use case of MON's governance model will be that of governing the fractionalized IP of Pixelmon's 200+ monster characters.

MON DAO will enable a series of features:

These features constitute a decentralized incentive system aimed at growing any MON Protocol partner IP across multiple projects and verticals.

The governance system will transition from the MON Foundation into a DAO structure only at a later stage in the future, and it will not be available at or immediately after the token launch.
