

WRAPPED TOKEN SWAP

We have updated the code of the smart contract on the Binance Smart Chain network.

Old contract address: [0x35f3ffffcb622bC9f64fA561D74e983Fd488D90c](#), new contract address: [0xaFCC12e4040615E7Afe9fb4330eB3D9120acAC05](#).

To exchange old tokens for new ones in a **1:1** ratio, you have two options:

- We have created a liquidity bridge, allowing you to exchange old tokens for new ones directly on [PancakeSwap](#).
- Send the old tokens to [@piratecash_bot](#) and then transfer them back to your wallet through the bot.

If you have created a liquidity pair, we recommend dismantling it and creating new liquidity for the new token.
