ERC-20

Why $SMI Is a ERC-20 Token?

The invention of Ethereum was revolutionary to the blockchain ecosystem as a whole, as for the first time ever people gained a way to launch their own tokens and smart contracts. For years, the Ethereum network was the default place for launching innovative blockchain-based projects.

There are many benefits of the ERC20 standard. It makes it possible for developers to develop DApps on the Ethereum blockchain. It also helps streamline the whole standardized process.

This is the reason that $SMI use the technology of ERC-20 Token.
