XIDO Finance

DeFi Ecosystem

XIDO is XIDO FINANCE governance token.

XIDO is designed to Oneway yield farming DeFi ecosystem to drive the creation of a fully transparent, community-owned, and open-source oracle platform on Ethereum & Binance Smart Chain

Q : Do I need to claim these distributed tokens?

A : No. The tokens will just show up in your wallet after each transaction.

Tokenomics

Total Supply

100,000,000 XIDO

Initial Distribution: 40,000,000 XIDO(40%) was sent to the main farm contract used for farms and pools. These tokens are locked in the contract and cannot be removed by developers. 5,000,000 XIDO (5%) was sent to the TEAM address to start the XIDO process. And 40,000,000 XIDO(40%) for liquidity, the remaining 15,000,000 XIDO(15%) were supplied to the marketing.

Token

More Incentives

Provide Best Prices

XIDO Finance is a decentralized AMM with yield farming incentives, no mints, and a unique token distribution design. XIDO Finance is powered by XIDO token which adds a governance layer and powers the self-sustaining pools and farms without ever minting a new token.

Q : Another yield farm protocol, really?

A : DeFi protocols are popping up left and right, yield farming, yield mining, BSC, AMM's, clones, scams. It's hard to tell the difference between a genuine project and one that may not be quite what it seems.

XIDO stays away from unsustainable short-term yield programs and instead leverages open-source technology from some of the leading-edge projects in DeFi such as Uniswap, Pancakeswap, Sushiswap, and Reflect. Finance to deliver a truly innovative and unique solution to yield farming aggregation.

Characteristic

Faster burn rates

Farming Rewards

Brief Tokenomics

1. XIDO has a fixed total supply of 100,000,000 and there is no mint functionality in any of the code.
2. XIDO did not launch on BSC strictly for the 'hype', BSC's low fee transactions is exactly what XIDO needs to leverage its token distribution design to the fullest extent. More volume on XIDO means faster burn rates and holders receive more XIDO.

Triple Yield

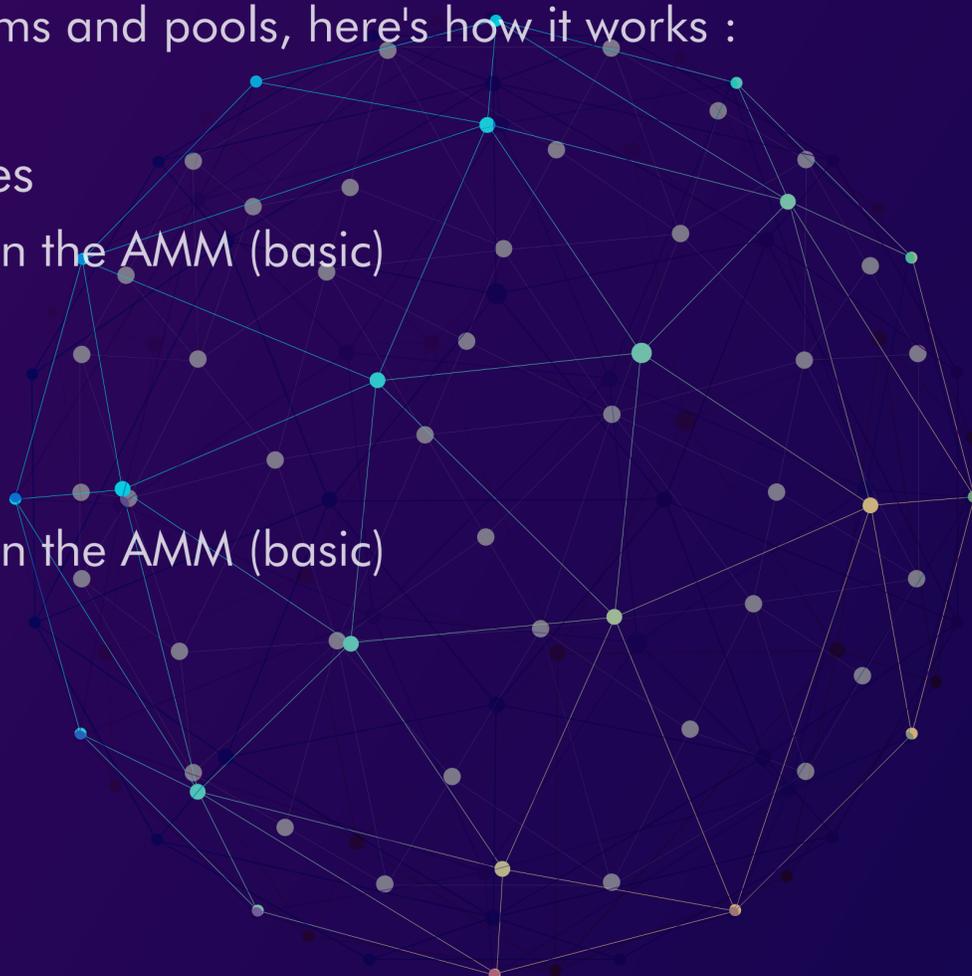

Most DeFi protocols offer yield farms to incentivize liquidity for their assets. XIDO offers triple yield on all of its farms and pools, here's how it works :

The 'regular' yield farming incentives

1. Earn tokens for providing liquidity on the AMM (basic)
2. Yield farming rewards

XIDO yield farming incentives

1. Earn tokens for providing liquidity on the AMM (basic)
2. Yield farming rewards

Holder Security

XIDO Finance

Supporting System

1. No mint functionality in any of the code
2. Automated burns that don't rely on devs or manual processes
3. No migrator code
4. Support for emergency withdraws from all pools & farms

Yield Farms & Pools

1. XIDO offers a suite of yield farms and pools, at launch we are supporting 5+ and plan to aggressively add more.

Roadmap

Project Vision

Launch Farming Pool

2020.Q4

- project setup: Complete creating a team with professional and experienced talents; complete whitepaper, product design, economic model, etc.

2021.Q1

- Technology development, and launch testnet.

2021.Q2

- V1 launch farming pool mainnet
- Listed on the exchange (DEX & CEX)
- Creating more strategic partners
