9 1

The transition from the old $MATTER token to the new **$TUNE** token. This move represents a strategic decision to enhance the platform's capabilities and go hand-in-hand with the new identity of Bitune. There are multiple ways to execute the swap:

If you hold your tokens on KuCoin, they will complete the $MATTER to the $TUNE token swap automatically. KuCoin will take snapshots of users' MATTER assets at 16:00:00 on January 4, 2024 (UTC) and convert them to $TUNE at a ratio of 1:1.

More details: https://www.kucoin.com/announcement/en-kucoin-will-support-the-token-swap-of-antimatter-matter-to-bituneai-tune-20240103

The Gate.io exchange will also support the swap similarly at a later date.

If you have your $MATTER in your wallet on Ethereum Network, starting today, you can swap your tokens at a ratio of 1:1 here:
https://token.bitune.ai/

If your tokens are on B2, you will have to first bridge them to Ethereum Network using this bridge: https://dao.antimatter.finance/#/bridge

Guide on using the bridge: https://antimatterdefi.medium.com/how-to-bridge-b2-ethereum-4802c17bb0d8

The swap page we provide is available indefinitely, so you do not need to rush. How long Gate.io will support a token swap is unclear at this moment.

. . .

❗ Apart from these options there is currently no other form to execute the token swap. Please be aware of potential scams. The only valid $TUNE token address is: 0x1Fac00CceE478eCeD6A120a50Ed2Ab28EE7FE32b

The Token Swap

The token swap from $MATTER to $TUNE is a carefully planned and executed process designed to ensure minimal disruption to users and maintain the continuity of the platform's tokenomics.

Maintained Tokenomics:

One of the crucial aspects of the token swap is that the fundamental tokenomics remain unchanged. The transition from $MATTER to $TUNE does not alter the core economic principles governing the ecosystem.
