### 3. Tokenomics

**Ticker:** \$KPAW

**Total Supply:** 1,210,000,000 \$KPAW

KasPaw is all about keeping it real. No team allocations, no pre-minting, and the mint function is locked down tight. This token is as fair as they come, and we're here to make sure it stays that way.

- **No Pre-Sale:** Everyone's on equal footing—no one gets a head start.
- **No Pre-Minting:** Every \$KPAW is minted fair and square.
- **Revoked Mint Authority:** Once the cap's hit, that's it. No more \$KPAW can be minted

A. **Distribution:** No initial handouts here. Every token is up for grabs, and it's first come, first served. You want in? You better hustle.

B. **Mint Mechanics:** Here's how it works:

- **1 Kas = 2000 \$KPAW**

Mint as many batches as you can, but remember—once the supply cap is hit, it's game over for minting. What's minted is minted, and nothing more.

C. **Key Features:** KasPaw's tokenomics are as solid as they come. No fees, no funny business—just pure, unfiltered \$KPAW.

- **No Additional Fees:** Only the network costs apply—keep your gains, no extra charges.
- **Immutable Tokenomics:** Once we're live, the rules are set in stone. No changes, no tweaks.
- **Capped Supply:** 1,210,000,000 \$KPAW—get 'em while you can.

KasPaw's built to be as fair and secure as a top DA(W)G should be. We're here to run the game, and we're doing it right.
