Pups 🌍 ☮️ 🛡️ ✅
@PupsToken

Pups has officially moved from the BRC-20 token standard to Runes to align with Bitcoin's dominant token standard created by the founder of Ordinals, @rodarmor

Holders of the BRC-20 token can migrate to Runes using OrdKit (directly on Bitcoin).

Holders of the wrapped BRC-20 token on Solana can migrate to wrapped Runes using RuneMine (directly on Solana).

The deadline: November 5, 2024, approximately 2 months from now to give everyone the time to do so.

All existing liquidity pools on Solana, future liquidity pools on Bitcoin, exchange listings and support will be for the Runes-based token to ensure compatibility with the growing Bitcoin ecosystem.
