

# TRUF Token Migration: Portal Walkthrough & Migration Guide

 **Trufation**  
Oct 29, 2024 • 6 min read

Dear TRUF Holders,

The migration portal is now live!

Please visit: <https://governance.trufation.com/migration> to migrate.

Please only use official channels listed below or on Trufation.com and be aware of scammers. You should not trade the old token, and always ensure the correct token address.

Official Whitepaper: <https://whitepaper.trufation.com/truf-token/get-truf-token>

Official Contract Address: 0x243c9be13faba09f945ccc565547293337da0ad7

Get TRUF: <https://whitepaper.trufation.com/truf-token/get-truf-token>

Official Uniswap Pool:

<https://app.uniswap.org/explore/tokens/ethereum/0x243c9be13faba09f945ccc56554729337da0ad7>

Base pair CA: 0x3c6523265123e60cAC94e7E51813667E315361a3

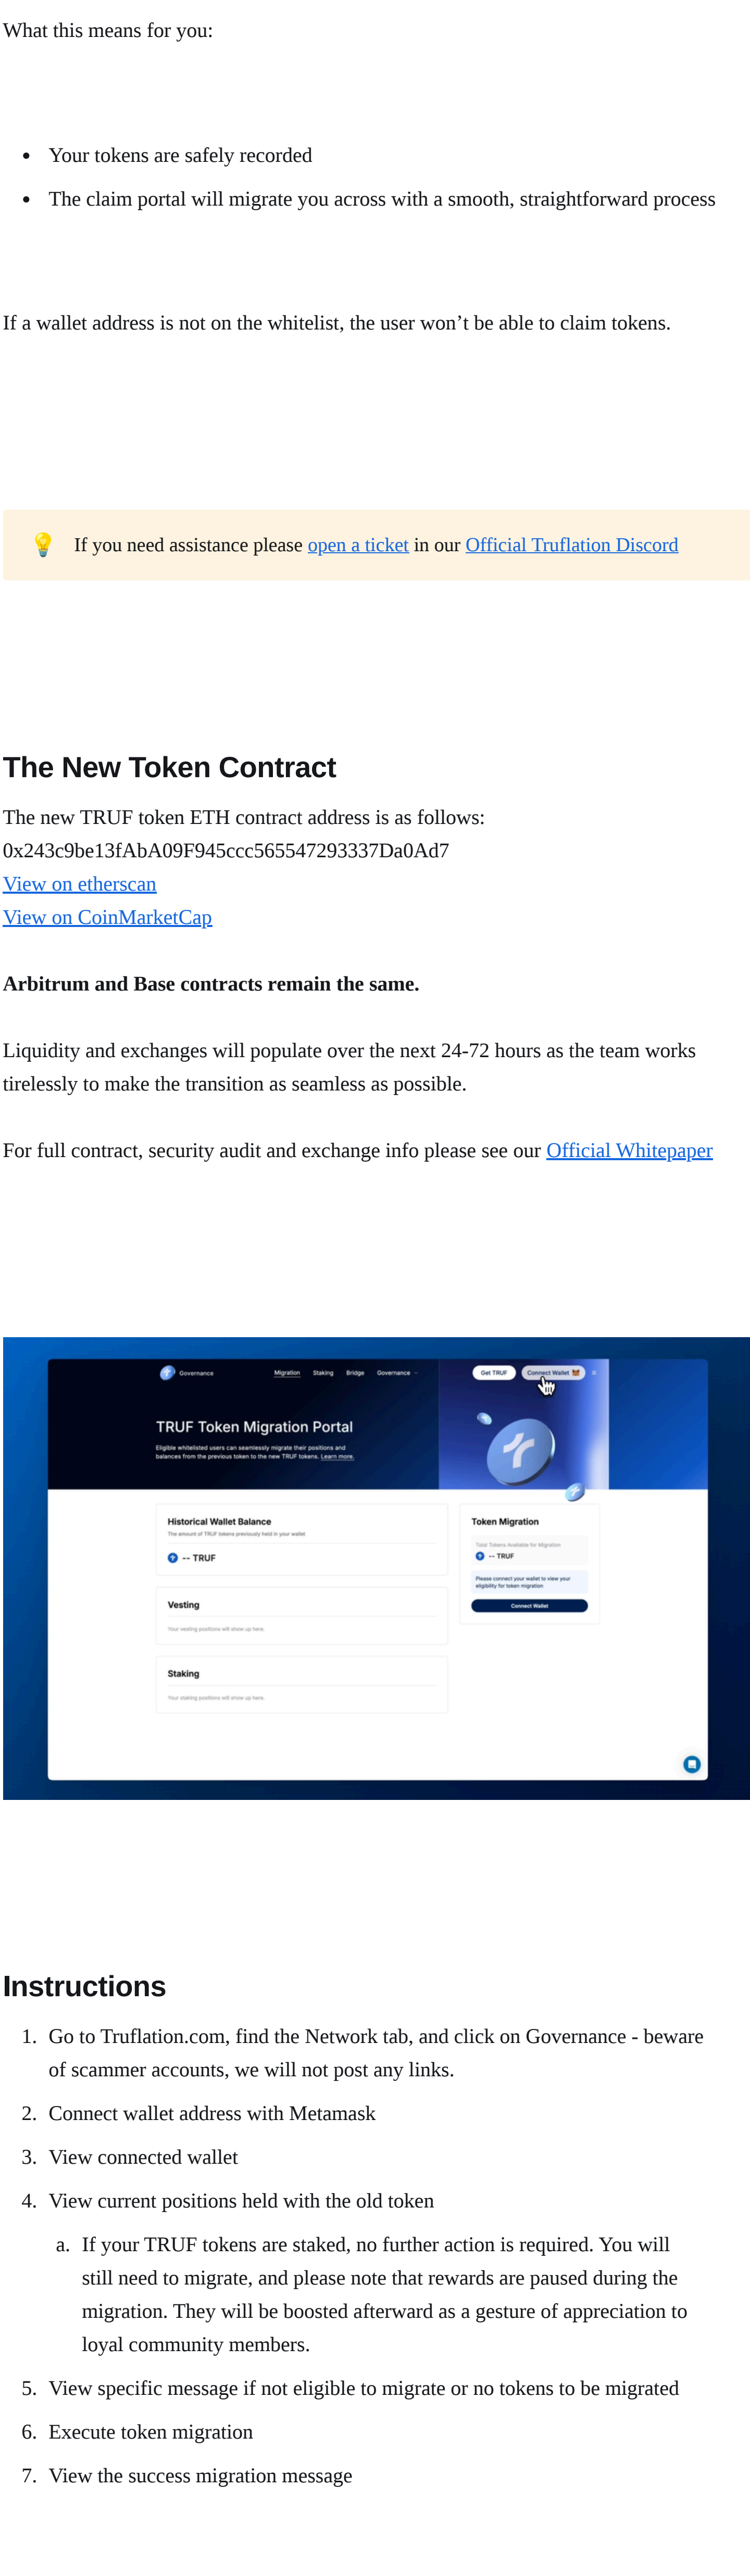

Aerodrome pair CA: 0xcE2D4E04e3d782EcB8bf2e265f421bA510F4e8F7

Ethereum CA: 0x243c9be13fAbA09F945ccc565547293337Da0Ad7

Arbitrum CA: 0xB59c8912c83157a955f9D715E556257F432C35D7

Here's a walkthrough tutorial on how to seamlessly migrate in one minute.

For further instructions and FAQs please scroll down.

 If you need assistance please [open a ticket](#) in our [Official Trufation Discord](#)

## The Snapshot

Great news for our community - we successfully captured today's wallet snapshot at 10:00AM UTC, Tuesday 29 Oct. If you're holding TRUF tokens, you're already set for the migration process.

What this means for you:

- Your tokens are safely recorded
- The claim portal will migrate you across with a smooth, straightforward process

If a wallet address is not on the whitelist, the user won't be able to claim tokens.

 If you need assistance please [open a ticket](#) in our [Official Trufation Discord](#)

## The New Token Contract

The new TRUF token ETH contract address is as follows:

0x243c9be13fAbA09F945ccc565547293337Da0Ad7

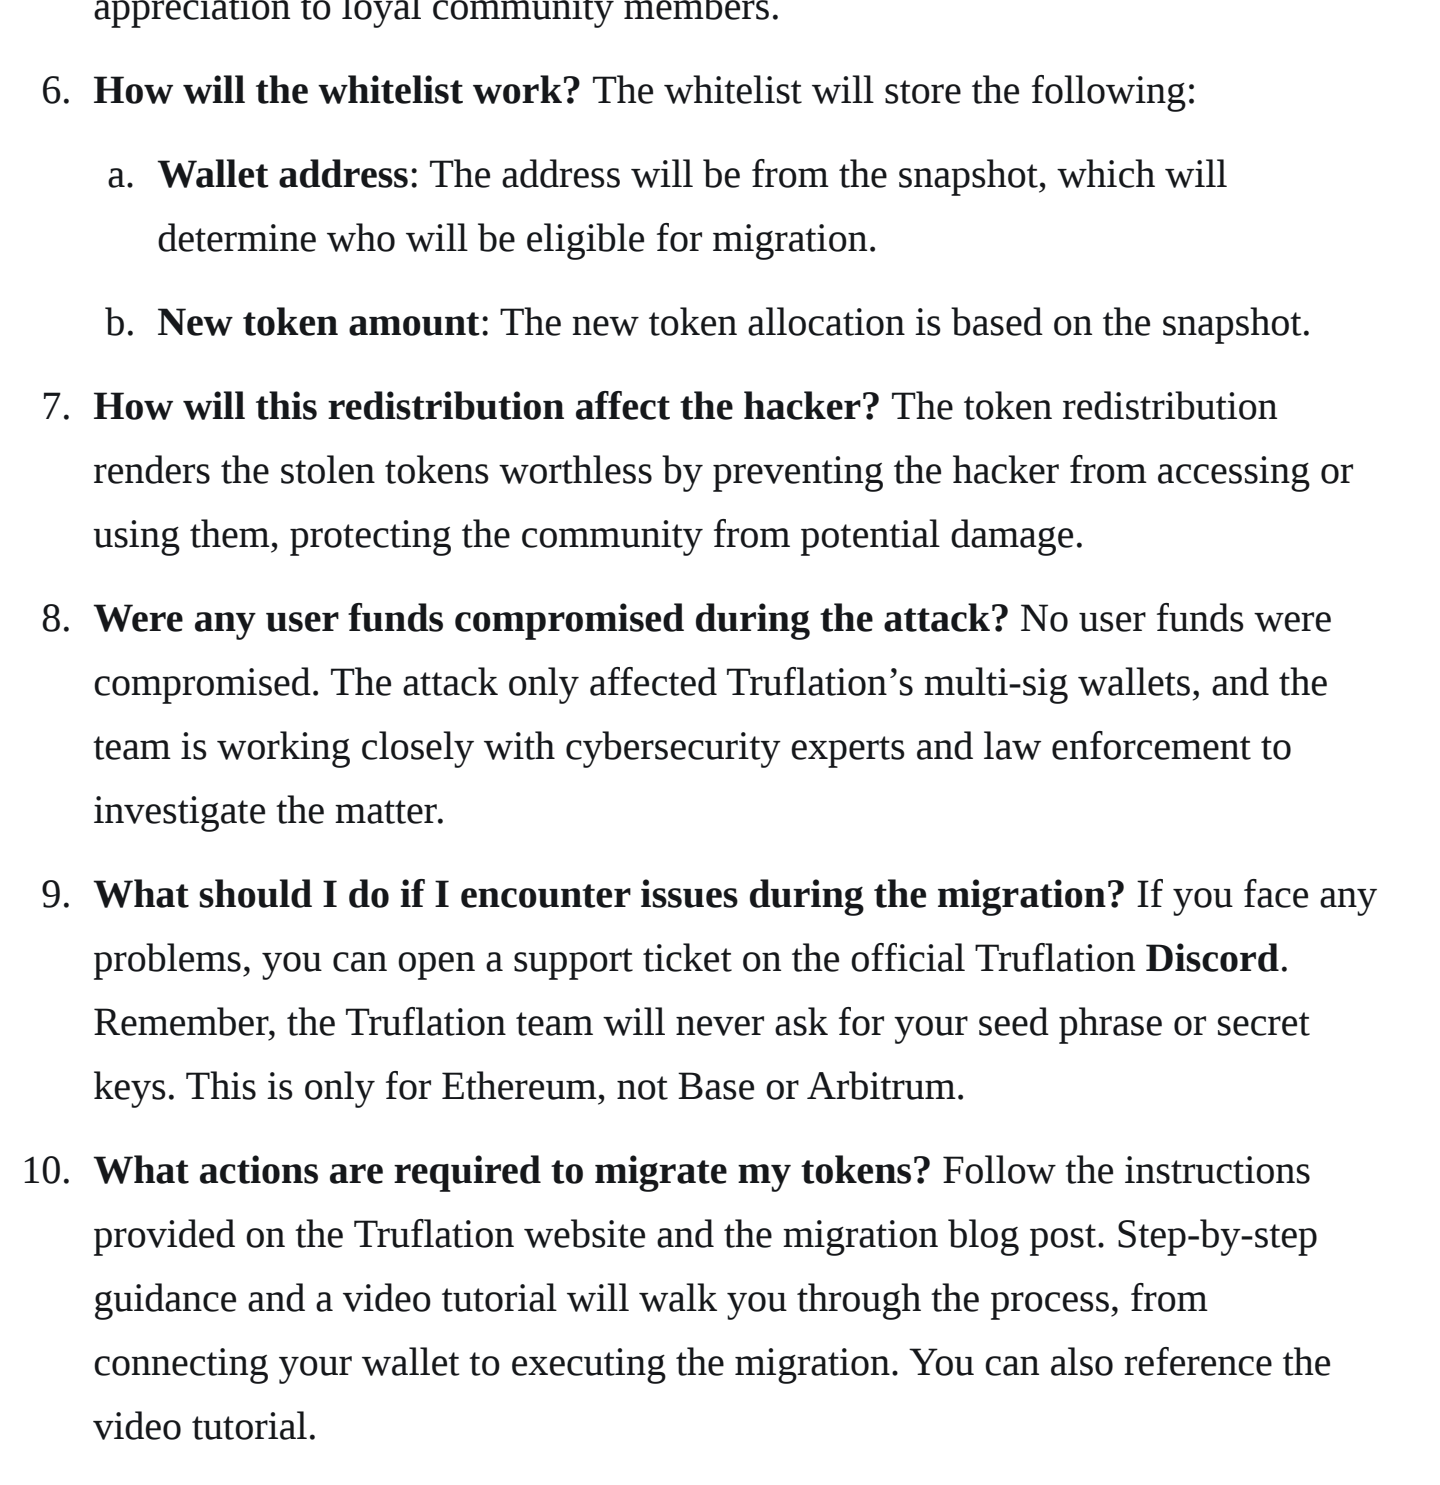

[View on etherscan](#)

[View on CoinMarketCap](#)

**Arbitrum and Base contracts remain the same.**

Liquidity and exchanges will populate over the next 24-72 hours as the team works tirelessly to make the transition as seamless as possible.

For full contract, security audit and exchange info please see our [Official Whitepaper](#)

## Instructions

1. Go to Trufation.com, find the Network tab, and click on Governance - beware of scammer accounts, we will not post any links.
2. Connect wallet address with Metamask
3. View connected wallet
4. View current positions held with the old token
  - a. If your TRUF tokens are staked, no further action is required. You will still need to migrate, and please note that rewards are paused during the migration. They will be boosted afterward as a gesture of appreciation to loyal community members.
5. View specific message if not eligible to migrate or no tokens to be migrated
6. Execute token migration
7. View the success migration message

 If you need assistance please [open a ticket](#) in our [Official Trufation Discord](#). We will never ask for your seed phrase or private key.

## Staking

If your TRUF tokens are staked, you will still need to migrate the tokens. Please note that rewards are paused during the migration. They will be boosted afterward as a gesture of appreciation to loyal community members. No new rewards will be issued until the staking campaign is completed, however, we will bump up rewards post-migration to make up for this loss and as a thank-you to our loyal community.

Please only use our official website, do not click on any suspicious links. There are a lot of scammers trying to capitalize on users' trust, so please be vigilant. The following information about the whitelisted entity will be stored in the claim contract:

- **Wallet address.** The address of the token holder that had a certain balance during snapshot time. Wallet addresses will be verified using a signature.
- **New token amount.** The amount of new tokens to be received by the user after migration.

We're deeply grateful to the Trufation Nation, our community members, whitehats, and partners who have rallied behind us with unwavering support and expertise. We will be rewarding the community for their continued support.

## Trufation Migration FAQ

1. **Why is Trufation migrating TRUF tokens?** This decision was made to mitigate the effects of a recent attack on Trufation's multi-sig wallets. By migrating tokens, the stolen funds will become unusable for the hacker, protecting the community and stakeholders.
2. **What is the new official contract address:**  
The new contract address for TRUF is:  
follows: 0x243c9be13fAbA09F945ccc565547293337Da0Ad7
3. **How will the migration process work?**  
Eligible users will need to access the migration portal to migrate their tokens. Only whitelisted wallet addresses, which were part of the snapshot taken at a specific time, will be able to claim new tokens. The whitelist balances will be based on the snapshot. This is only for Ethereum, not Base or Arbitrum.
4. **What are the steps to migrate my new tokens?**
  - a. Visit **Trufation.com** (do not trust or click any unofficial links)
  - b. Connect your wallet via Metamask
  - c. View your wallet's old token holdings
  - d. If eligible for migration, execute the token migration
  - e. If you encounter any issues, visit the **official Discord** for support (avoid sharing sensitive information like seed phrases or secret keys)
5. **What if I have my tokens staked?** If your TRUF tokens are staked, no further action is required. You will still need to migrate and please note that rewards are paused during the migration. They will be boosted afterward as a gesture of appreciation to loyal community members.
6. **How will the whitelist work?** The whitelist will store the following:
  - a. **Wallet address:** The address will be from the snapshot, which will determine who will be eligible for migration.
  - b. **New token amount:** The new token allocation is based on the snapshot.
7. **How will this redistribution affect the hacker?** The token redistribution renders the stolen tokens worthless by preventing the hacker from accessing or using them, protecting the community from potential damage.
8. **Were any user funds compromised during the attack?** No user funds were compromised. The attack only affected Trufation's multi-sig wallets, and the team is working closely with cybersecurity experts and law enforcement to investigate the matter.
9. **What should I do if I encounter issues during the migration?** If you face any problems, you can open a support ticket on the official **Trufation Discord**. Remember, the Trufation team will never ask for your seed phrase or secret keys. This is only for Ethereum, not Base or Arbitrum.
10. **What actions are required to migrate my tokens?** Follow the instructions provided on the Trufation website and the migration blog post. Step-by-step guidance and a video tutorial will walk you through the process, from connecting your wallet to executing the migration. You can also reference the video tutorial.
11. **What is the new token symbol?** The new token symbol will remain **TRUF**.
12. **What will happen to the old token?** The old token will be deprecated and rendered inactive. Any value previously associated with the old token will no longer be accessible, and only the new TRUF token will retain active listings and liquidity.
13. **Will listings for TRUF change?** Listings will remain consistent across exchanges. A full list of exchanges where TRUF is available can be found in the whitepaper and on the Trufation website. <https://whitepaper.trufation.com/truf-token/get-truf-token>
14. **How will liquidity be handled post-migration?** Liquidity will be restored shortly after the portal is live. Our team is working to ensure that markets remain stable, and the restored liquidity will support continued trading and exchange activities.
15. **What are the potential effects on price and fully diluted valuation (FDV)?**  
While the impact on price and FDV will depend on market factors, the migration and restoration of liquidity are designed to protect token value. The

long-term effects will aim to foster a more secure and resilient TRUF ecosystem, with a focus on growth and sustainability.

16. **How will the circulating supply be affected?** The migration will not increase the circulating supply but may impact token distribution across holders as old tokens are replaced by new ones. The snapshot ensures only eligible tokens are included, and circulation metrics will be updated as migration progresses.
17. **How do I contact support if I encounter issues?** If you face any challenges during the migration, please contact our support team through the official Truflation Discord. Avoid engaging with third parties, and remember, we will never ask for your seed phrase or private keys.
18. **How does this impact Truflation's ongoing development?** This incident does not affect the development of the **TRUF Network**, upcoming product features, or the mainnet launch. Truflation is continuing its plans and remains committed to rolling out new features, including synthetic assets, new indices, and more.
19. **What can the community expect moving forward?** In appreciation for the community's support, Truflation will run a campaign to reward loyal members. Stay tuned to Truflation's social channels for updates.

As we make these changes we will swap the token logo from a blue background to white background as below. We're working with Coinmarketcap and CoinGecko to facilitate this.
