

The Breakdown: $ai16z → $elizaOS

Eliza Labs 0xf449 ben October 8th, 2025 10 Collected Mint

$ai16z migrates to $elizaOS: swap ratio, supply trajectory, and vesting

Migration portal: https://migrate.elizafoundation.ai/

Starting **November 6th at 18:00 UTC**, $ai16z is evolving into $elizaOS. This upgrade will enable multichain availability on Solana, Ethereum, Base, and Binance Smart Chain. After the migration event, the $elizaOS total supply will gradually expand from 6.6B to 11B (+40%), with circulating supply increasing by 882M, from 6.6B to 7.4B (approx. +13%) immediately. This unlocks capital for increased liquidity demands of the token becoming multichain, deepening liquidity, listings, and funding ecosystem growth – including 607M tokens for liquidity & listings, and 275M of Protocol Owned Liquidity.

Key parameters

- **Migration portal go-live:** 18:00 UTC November 6th 2025
- **Whitelist snapshot:** 11:40 UTC November 11th 2025
- **Total supply:** network redenomination **1:10**
- **Holder swap:** 1 $ai16z → 6 $elizaOS.*The other 4* ***$elizaOS*** *are put to work. These tokens are a direct contribution to the new Generative Treasury, seeding the autonomous multichain agents that will generate yield, deepen liquidity, and fund ecosystem growth.*
- **Standards:** BEP-20 (BSC), ERC-20 (Ethereum, Base) and SPL (Solana). **CCIP** enabled day one.
- **Supply policy:** hard cap **11,000,000,000**; no emissions.*The mint and burn authority is given to the token pool through Chainlink CCIP for multichain bridging.*
- **Contract addresses:**
  - $elizaOS SVM: DuMbhu7mvQvqQHGcnikDgb4XegXJRyhUBfdU22uELiZA
  - $elizaOS EVM (ETH & Base & BSC): 0xea17Df5Cf6D172224892B5477A16ACb111182478

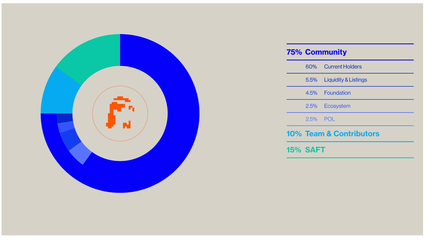

Token Release Schedule

- Pre-Migration: The current $ai16z supply totals 1.1B tokens.
- At Migration: The outstanding 1.1B will be able to convert into 6.6B $elizaOS.
- Post-Migration: Over time, total supply could expand to up to 11B tokens, though actual circulating supply may be less as a large portion is held by the Foundation and Treasury for ecosystem development and liquidity management.

Vesting and Transparency

- **Ecosystem/Community**: 3-month cliff + 9-month linear vest
- **Foundation**: 24-month linear vest
- **Team & contributors:** 12-month cliff from October 21, then 24-month linear vest (total 36 months).
- **SAFT**: locked multisig, minimum 12-month cliff
- **Liquidity & POL**: programmatic for market making
- **Monitoring:** all vesting wallets will be publicly listed with explorer links for real-time tracking; Streamflow contracts enforce cliffs and prevent discretionary early unlocks.

Tokenomics Breakout

Migration flow

1. **Connect:** Your preferred wallet (Phantom, MetaMask, Coinbase Wallet, WalletConnect, etc.)
2. **Configure:** Select the amount of $ai16z you want to migrate into $elizaOS.
3. **Migrate:** Confirm the migration. The migrator retires your $ai16z and issues 6 $elizaOS per 1 token directly to your wallet.
4. **Bridge:** Use the Chainlink-powered CCIP bridge to move your $elizaOS to your preferred chain (Solana, Ethereum, Base, or BNB Chain).
