Dear MovieBloc community,

As MovieBloc onboards Ontology Mainnet, MBL token also needs to be swapped to OEP4 which has the same technical standards as the Ontology mainnet.

Feb 17th 2020, it will be available to swap MBL token (from ERC20 MBL to OEP4 MBL) at moviebloc.com. In addition, for your (token holder) convenience, gate.io extends token swap to 31st of March. Thus, token holders will be able to swap their ERC20 MBL tokens to OEP4 MBL tokens both at moviebloc.com and gate.io by depositing ERC20 MBL tokens at both site.

Please note that token swaps on the other exchanges and agencies are not negotiated yet. Schedule may change due to exchange conditions. Please stay tuned!

As noticed before, all unlock tokens will be distributed in OEP4 MBL token from now on. Within 6 months from now, token swap to OEP4 MBL at all exchanges will be completed: tokens that are not swapped (leftover ERC20 MBL token) will not be used for the service and trading.

Thank you,
MovieBloc
