Travala.com Will Support the AVA Token Swap

24/08/2023 · 1 min read

As announced in this post, Travala.com will support the AVA token swap on the Ethereum (ERC-20) network. The token swap information is as follows:

- On **Monday 28 August at 03:00 AM UTC**, deposits and withdrawals of AVA on the **BNB Beacon Chain (BEP-2)** and **BNB Smart Chain (BEP-20)** to and from the platform wallet and AVA Smart Program will be temporarily suspended to perform the swap. This suspension is expected to last approximately **24–48 hours**.
- Travala.com will handle all technical requirements involved for all users holding AVA in the platform wallet and the AVA Smart Program.
- During this time, users will not be able to use the platform wallet on Travala.com for any services on the platform.
- After the swap is complete, AVA (BEP-2) and AVA (BEP-20) tokens will assume **AVAOLD** as the token name, with the new AVA (ERC-20) token assuming the **AVA** token name.
- Users who had existing AVAOLD (BEP-2 or BEP-20) tokens on the platform wallet or AVA Smart Program at the time of the swap, or users who deposit AVAOLD tokens on the BEP-2 and BEP-20 networks to the platform wallet following the swap, will be able to swap these AVAOLD tokens for new AVA (ERC-20) tokens on the platform on a **1:1 basis**.
- Withdrawals of AVAOLD (BEP-2 & BEP-20) tokens from the platform wallet will not be supported, as these tokens will no longer have any token utility. Only the new AVA (ERC-20) tokens will be available to withdraw following the swap.
- A **separate announcement will be made once the token swap has been completed** and the deposits of AVAOLD (BEP-2 & BEP-20) and withdrawals of the new AVA (ERC-20) tokens are open.
- AVAOLD smart contract addresses:
    - BEP-2: AVA-645
    - BEP-20: 0x13616f44ba82d63c8c0dc3ff843d36a8ec1c05a9

- New AVA smart contract address:
    - ERC-20: 0xa6C0c097741D55ECd9a3A7DeF3A8253fD022ceB9

If you experience any issues swapping your tokens in the platform wallet, please reach out to the team on Telegram or Discord.
