FREQUENTLY ASKED QUESTIONS

What is the New Contract for Luffy V2?

The new contract is:
0x7121D00b4fA18F13Da6c2e30d19C04844E6AfDC8
You may need to add this contract to your wallet in order to see your tokens.

What is the Merger and Migration Swap?

On Feb 22, 2022 we officially announced the merger of all one Alliance projects (Luffy, Goku, Deku, and Chopper). All projects and teams would be merged under the Luffy brand in order to increase development capabilities, create a stronger team, and allow for longer term success. This announcement was posted on all social media channels for every project. We continued to post information about this again and again over the course of the next month. Part of this merger is to combine all tokens under a new contract (Luffy V2). In order to accomplish this we launched a custom swap which went live on April 3. The swap lasted for approximately two weeks to give holders time to migrate their tokens and look for cheaper gas fees. For holders with less than $200 we created an airdrop request form which required no fee.

What if my tokens are on a Centralized exchange (CEX)?

On most CEX's the swap will is automatic. If you hold Luffy it will be automatic on all exchanges. However, if you hold Deku, Chopper, or Goku on HOTBIT or XT please transfer your tokens to a private wallet then use the airdrop request form above. We will airdrop you tokens to compensate for the transfer fee Hotbit and XT imposed.

What if my amount is too small to transfer out of Hotbit & XT?

If you hold an amount too small to transfer out of Hotbit or XT please contact the team in our telegram and we will help resolve this issue.

When will trading for Luffy V2 on Centralized Exchanges begin?

The exchanges are working on migrating the tokens. They will make an announcement when the process is completed and then trading will begin for Luffy V2.

What if I forgot to swap my tokens?

If you forgot to swap your tokens you can use the late swap form above. We will collect the submitted wallets and airdrop tokens to these holders on the **15th and 30th of each month**. Because you are requesting an airdrop after the swap has been closed, the value of your tokens will be calculated based on the fees we need to pay for gas, administrative fees, the market cap of the projects before the swap was closed, and the value of the tokens still remaining in your wallet (since some LP still remains). Do not try to sell or move your tokens until you receive the airdrop. **If you move or sell your tokens you will not receive an airdrop.**

How do I receive the NFT?

You will receive the limited NFT if you swapped your tokens (not airdropped). We are working on this process now and will make an announcement when the NFTs have successfully been airdropped.

When will I receive my airdrop?

We will airdrop tokens on the **15th and 30th of each month**. THE OLD TOKENS WILL REMAIN IN YOUR WALLET. Do not move these tokens or you will not receive an airdrop

What if I have some another issue?

Please join our telegram and describe your issue in detail to our staff. **Please be respectful and they will work hard to answer your questions**. Thank you!

What happens to Luffy V1, Deku, Goku, and Chopper?

We will no longer be supporting those tokens. We strongly reccomend you **DO NOT BUY THOSE TOKENS!** We will only be supporting Luffy V2. **YOU WILL NOT BE ABLE TO SWAP OR GET AN AIRDROP FOR ANY TOKENS PURCHASED AFTER APRIL 17TH, 2022 16:00 UTC**

What if I use Coinbase wallet?

Coinbase Wallet holders must use the web browser built into the coinbase wallet mobile app.

What if I use TrustWallet?

If you use trust wallet you must connect your wallet to the desktop. The TrustWallet browser can be buggy and doesn't work sometimes. Simply open the site on your computer and use "WalletConnect". Go to the settings section of your TrustWallet app and click "WalletConnect" then scan the QR code on the desktop to connect your wallet.
