WHAT IS CRYPTOCURRENCY?

Cryptocurrency is a form of digital or virtual currency that uses cryptography for security. Unlike traditional currencies, it operates on decentralized networks powered by blockchain technology, eliminating the need for intermediaries like banks. This innovation is reshaping how we think about and use money.

THE RISE OF BITCOIN

Bitcoin, introduced in 2009, marked the beginning of the cryptocurrency revolution. Created by an anonymous entity known as Satoshi Nakamoto, Bitcoin offered a peer-to-peer payment system. Its success has paved the way for thousands of other cryptocurrencies, each with unique features and applications.

HOW CRYPTOCURRENCY WORKS

Cryptocurrency transactions are recorded on a blockchain, a distributed ledger that ensures transparency and security. Miners or validators verify these transactions, preventing fraud and double-spending. This decentralized structure makes cryptocurrencies resistant to censorship and tampering.

VISION & MISSION

- Vision: To become the most reliable and profitable DeFi token by fostering sustainable, consistent, and significant value growth.
- Mission: Empower long-term investors by introducing revolutionary tokenomics that reward patience, loyalty, and consistent growth, ensuring maximum returns over time.

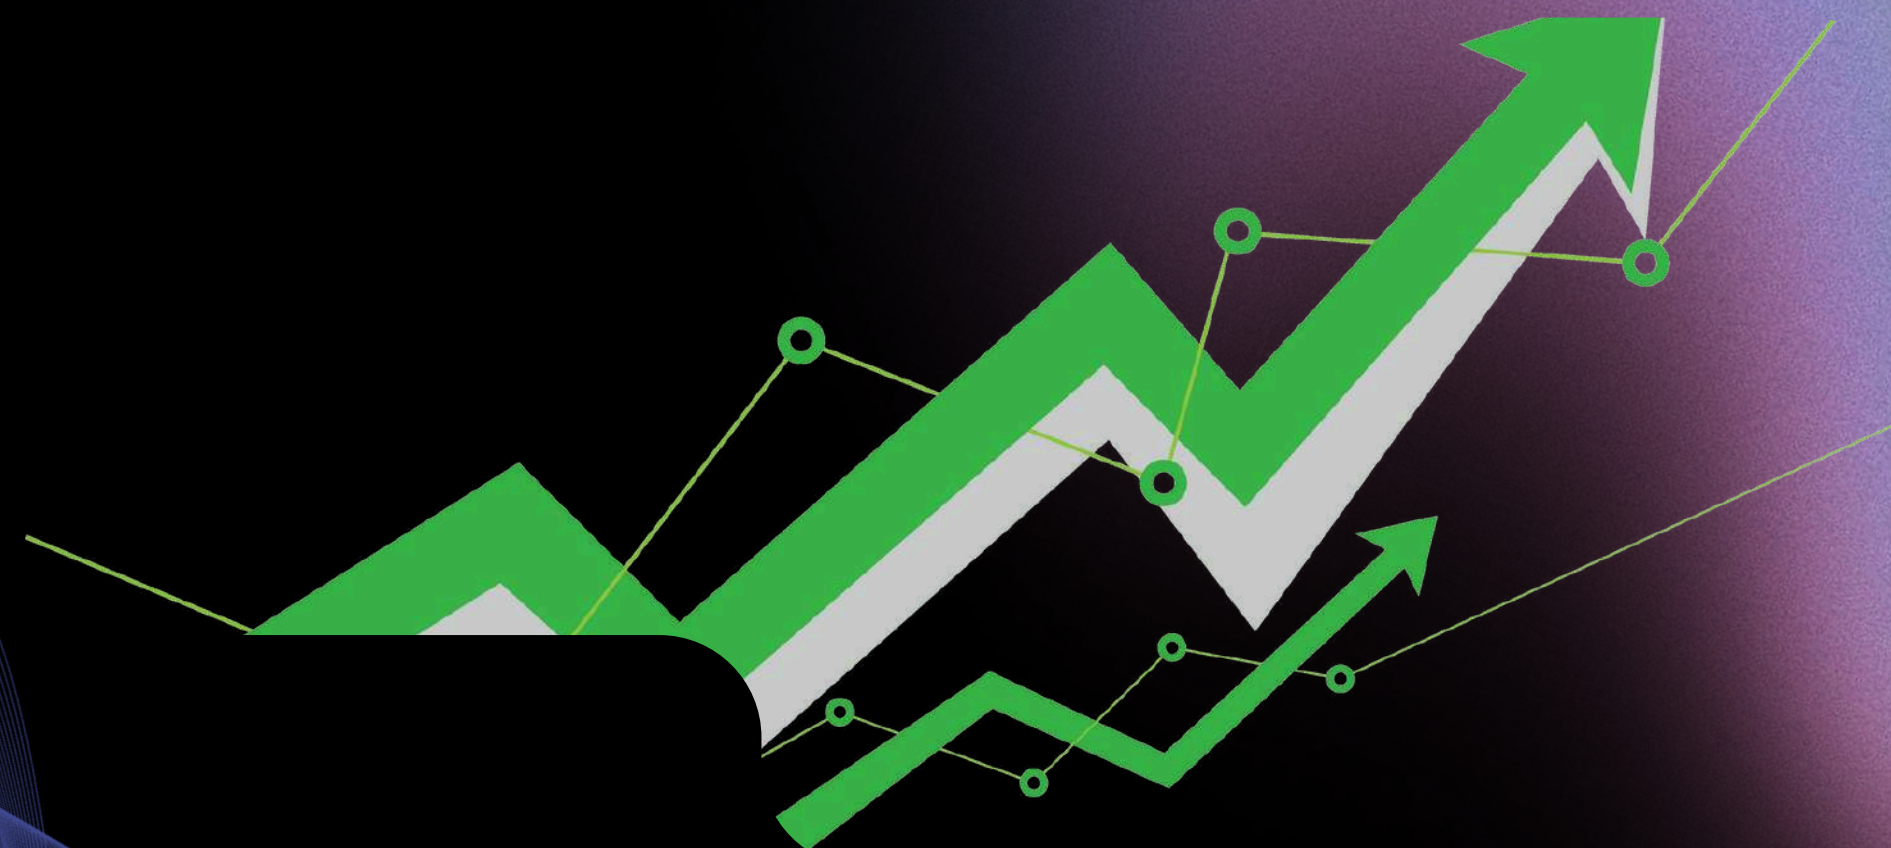

Our groundbreaking feature allows holders to sell only 1% of their holdings every 10 days. This restriction significantly reduces selling pressure, ensures scarcity, stabilizes price volatility, and encourages investors to remain committed long-term.

CORE FEATURE - LIMITED SELL MECHANISM

- Reduced Market Volatility: Controlled selling stabilizes price movements.
- Price Appreciation: Steady reduction of available supply drives consistent upward price momentum.
- Investor Confidence: Prevents panic selling, fostering trust and patience among investors.

WHY THE LIMITED SELL MECHANISM?

- Token Name: SFAGRO
- Symbol: SFAGRO
- Blockchain: Binance Smart Chain (BEP20)
- Total Supply: 50,000,000 tokens
- Initial Listing: PancakeSwap
