Conclusion

Introduction

The metaverse is an often ambiguous term—a placeholder for the future of virtual internet experiences. There's a disconnect between people's hopes and the disparity of the vision of large corporations chasing profits.

Alpha seeks to remedy this with our clear goal of a metaverse that will keep people engaged as an integral part of their daily lives.

The Problem

Today's metaverse virtual environments promise limitless possibilities, but its generally an illusion masked by a wide range of predetermined choices with cryptocurrency tokens are designed for specific metaverse roles, lacking platform integration for transactions, or simply facilitating too narrow a range of needs overall.

Currently available virtual environments target specialized audiences. Virtual worlds with high quality graphics are reserved for primarily co-op video games. Platforms with successful social interactions and shared common areas tend to be limited to poor graphics. Enviroments of any purpose fail to implement a deeper and more engaging space for user interaction. Specialized live events, concerts, and sports are sparse-to-non-eistent in today's metaverse environments.

The Alpha Ecosystem will remedy this by providing a hyper-realistic virtual space with a plethoraof engaging & customizable experiences as well as the opportunity for real-world businesses toexpand their virtual presence and enter the metaverse.

Alpha is the Solution

What if there was a virtual world, complete with all of the most interactive user activities, locations, events, personalized avatars, and collectible items, all being fueled by a fully-integrated & decentralized platform?

Alpha City is that virtual world. The high fidelity, decentralized platform, mated with the best-in-class gaming engine; Unreal Engine 5. America's social lifestyle metaverse is built ready to change the way the world interacts virtually.

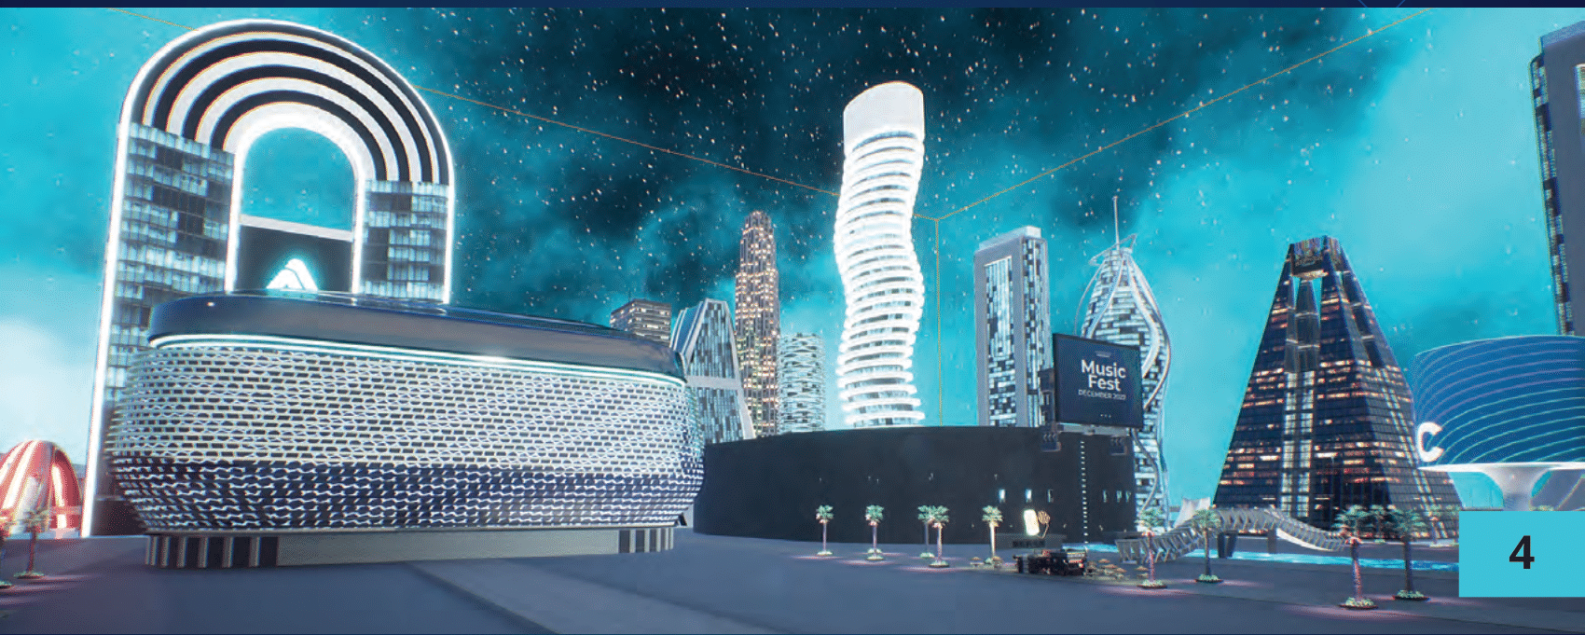

Overview

Alpha City aims to be the leader in the metaverse space, with the utility and vastness of our open-world virtual city, hosting proprietary events, locations, and virtual shopping experiences.

We aim to be the one-stop decentralized metaverse platform with a fully immersive ecosystem, interactive & tailor-made user experiences and multiple brand partnerships that will set Alpha City apart with a multitude of custom user content on available on the Alpha City platform.

Our Mission

Our mission is to define and build what people want in an authentic metaverse experience. Alphawill be the standard-- a vast alternate world where people share the value of high quality entertainment, social interaction, and investments that build deep roots in the future. A robust economy will be developed around Alpha City, where users can enjoy everything the platform has to offer, driving the Alpha Ecosystem to become a leading decentralized metaverse platform.

We're More Than a Token: We're a Community

Alpha is focused on becoming a permanent metaverse community of users. Alpha City will be a metaverse with infinite possibilities, with business meetings, networking, shopping, travel by land and air, meta-dating, gambling, live pay-per-view sporting events, concerts by famous artists, inviting constant activity in its casino, day clubs, nightclubs, virtual golf course, and business and casual lounges.

Alpha City, powered by an Alpha Coin economy, will become a community ecosystem, from the purchase and occupation of real estate to the activities that keep members planted and invested in a future of meaningful social interactions and entertainment.

Alpha Coin: a Cryptocurrency Token Designed to Power an Entire Virtual City

The success of a cryptocurrency with utility requires standing out among thousands of other projects while providing an active incentive for transactional and investment opportunities.

What is the Alpha Coin Token?

Alpha Coin is the native cryptocurrency of the entire Alpha ecosystem. It is simultaneously a proprietary utility and governance ERC20 token on the Ethereum blockchain, allowing all of the interoperable benefits of connecting to the most widely-used market for swapping Alpha Coin against other Ethereum-based tokens.

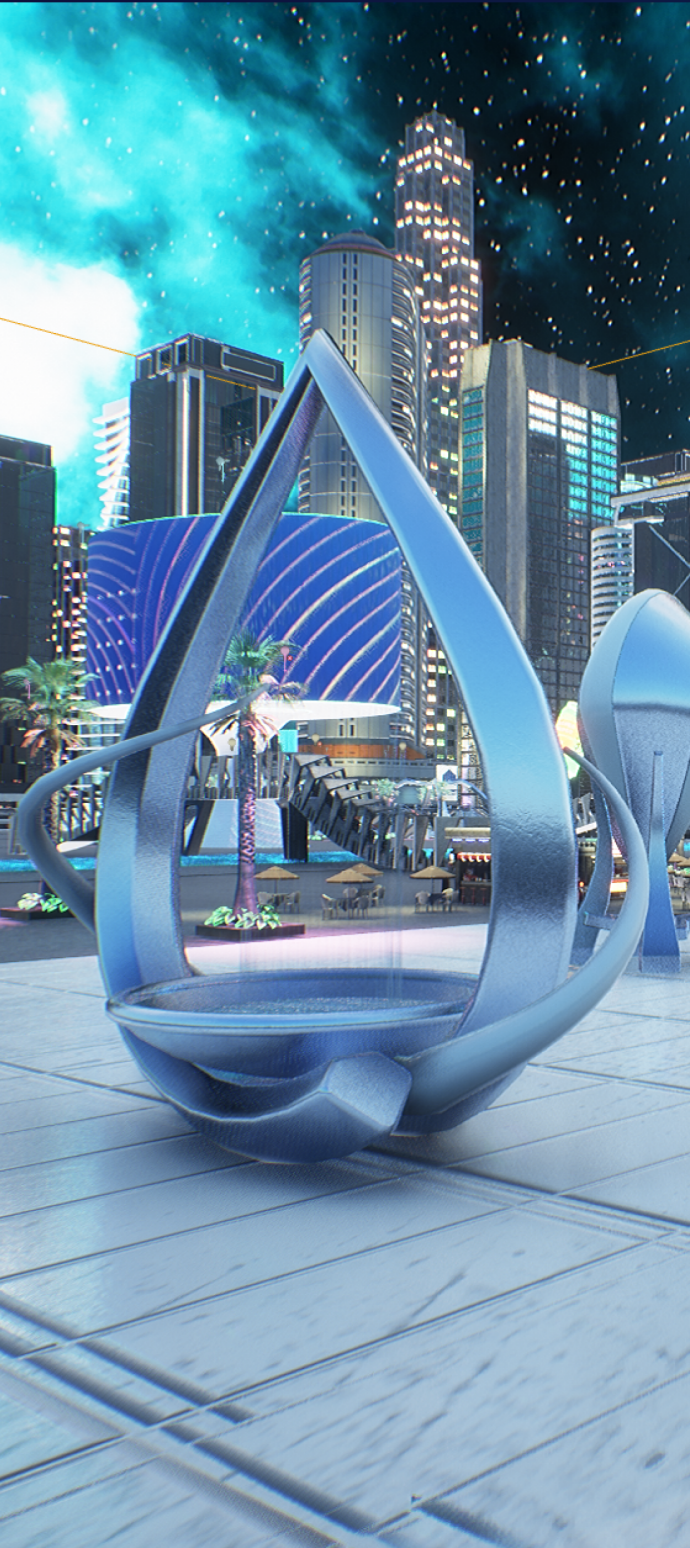

This standard guarantees Alpha Coin's compatibility and integration with third-party wallets, exchanges, and listings. Alpha Coin passed a full safety and security audit by Certik.

Purpose-Built Integration

Alpha Coin will drive all transactional activity for our Alpha City metaverse. Residual income generated in Alpha City will be re-injected into the Alpha Coin ecosystem via buybacks and marketing opportunities.

It will fuel the Alpha City metaverse economy as a decentralized, community-owned token for our income-producing city, where it's used to pay for virtual real estate, NFTs, interactive games, live concerts, and events.

Perfected Tokenomics

Alpha Coin's tokenomics are framed around a fixed supply of 10,000,000,000 tokens minted, with 50% of tokens burned, with a current supply of 4,990,000,000.

Alpha Coin, ticker symbol \$ALPHA, is minted and released to the public without any presale, meaning it's a fair-sale token without any private sale before its launch.

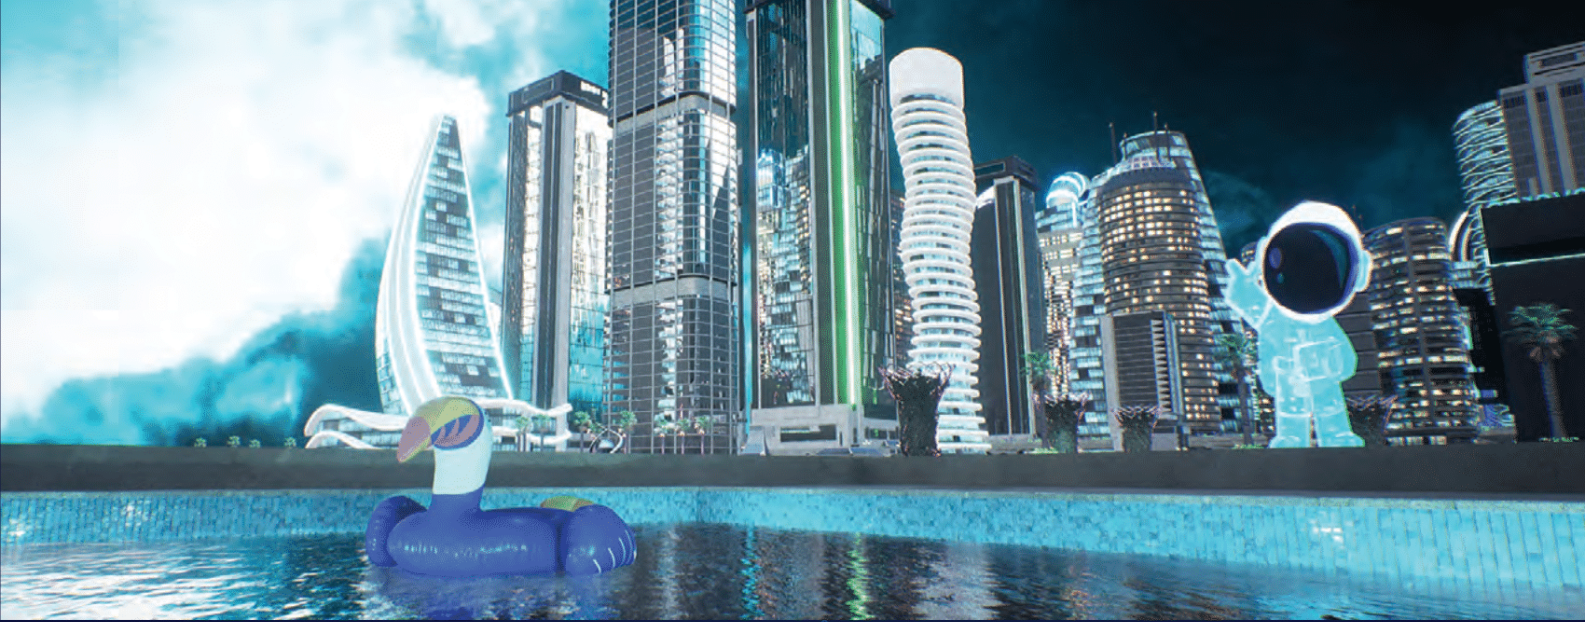

Alpha Coin's Contract Address:

0x138c2f1123cf3f82e4596d097c118eac6684940b

How to Buy Alpha Coin

<https://youtu.be/cFPIHYFg2J0>

At first, Alpha Coin has been sold through UniSwap, using the MetaMask platform. Soon, Alpha will launch AlphaSwap and EZ Swap systems making it even easier for new users to purchase Alpha Coin.

Alpha City

Alpha City Teaser Video:
<https://youtu.be/jRDXxc8DOoE>

Alpha City is where the world gathers to experience the metaverse, a decentralized city infrastructure where businesses, tenants, and event sponsors will be able to make their very-own Alpha City experiences. Virtual space within Alpha City will be readily available, users will be able to build unique living spaces for their avatars, and be able to rent or own office spaces for business purposes.

The metropolitan hub of Alpha City will provide a social business lifestyle with day clubs, nightclubs, casinos, and casual gathering spaces. These social spaces create the opportunity to partake in interactive social games as well as being able to make a social statement by dressing your avatar up in social area wearables. Alpha City plans to also heavily integrate meta-dating into the social aspect of the platform.

Alpha City Real Estate

Alpha City will be one of the first metaverse platforms to create virtual replicas of real homes under construction in the physical world. Alpha City users will be able to vacation at these meta-mansions within Alpha City and in the physical world, where they can experience the best of both worlds bridged by AR & VR interactions.

Alpha Theater

Alpha Theater will host up to 300,000 users virtually. Events will feature celebrity appearances, music performances, radio station shows, professional fighting, influencer podcasts, pay-per-view live events, esports, and more!

Alpha NFTs

NFT sales will be used for special access to events & exclusive area's in Alpha City. Alpha's first original NFT project will be Astro, a total of 10,000 unique NFTs released at launch of Alpha City.

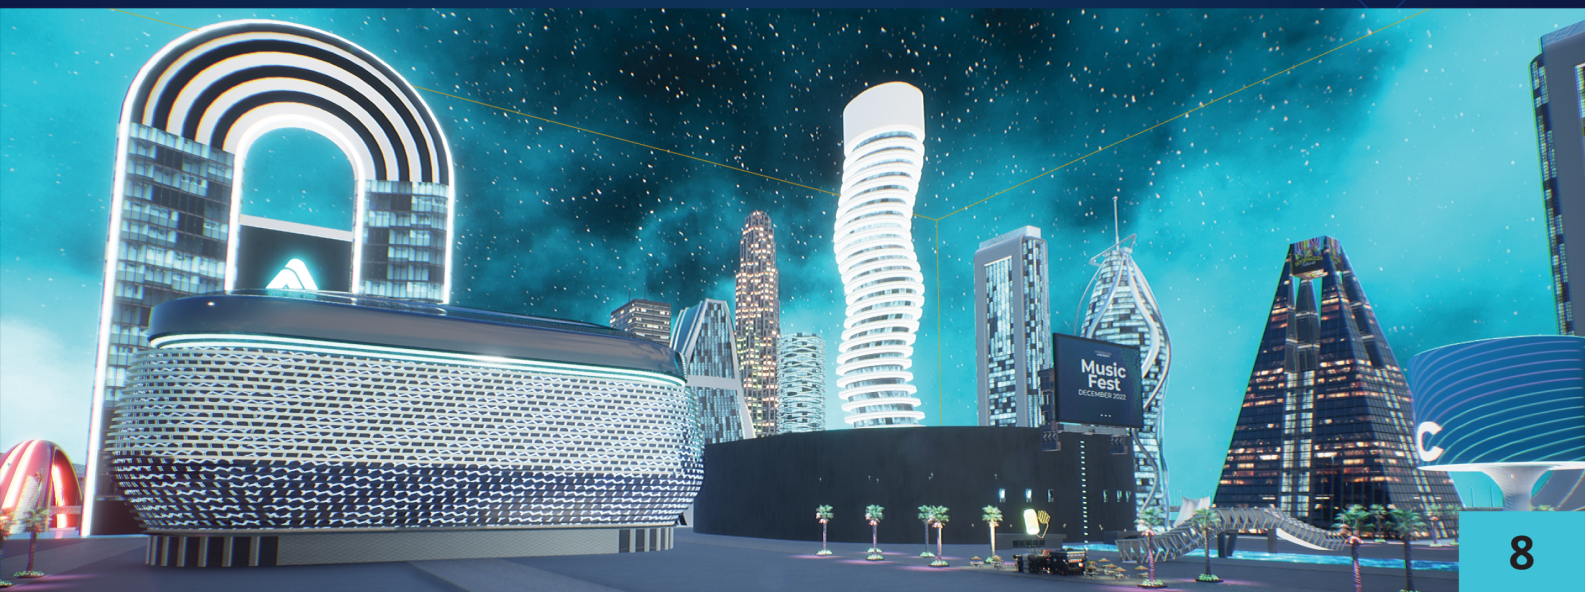

NFT Based Games

Alpha City users have access to Alpha City's NFT games, where they can play & attempt to earn extra in-game tokens.

Alpha City's very first P2E game will be called "Astro: Lost in the Metaverse", which will be based around the Alpha City location. Players can power-up their characters to face obstacles and enemies, with highscore winning players being rewarded periodically in Alpha tokens and NFT assets.

NFT Art and Community Collaborations

The Alpha Ecosystem is striving to build the best, most widely used social business lifestyle metaverse in existence. To make this possible, The Alpha Ecosystem will have multiple NFT collaborations as well as fully integrated purpose-built utility NFT's for various items around the Alpha City space itself. There will be a dedicated NFT Art gallery in Alpha City, as well as art events within both the virtual & physical worlds.

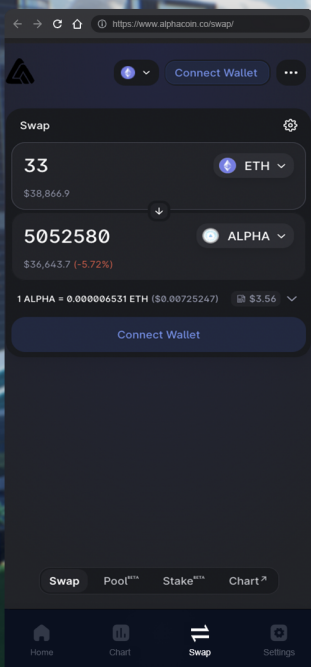

iOS & Android Mobile Application

ALPHA MOBILE

To dive further into our users ease of access, we have developed an All-In-One user friendly Alpha App. Available on both Android and iOS operating systems, this application will allow users to receive & digest the latest news from the Alpha Ecosystem, as well as direct connectivity to our proprietary Swap tool within the app. Users will also be able to navigate through our official Alpha merch store where they will not only find various physical products (hats, shirts, hoodies, etc) but virtual items as well! to be used within Alpha City itself.

Alpha City Road map + Completed Goals

**Milestones are subject to changes and additions.*

Phase 1-5:

- Full Marketing push
- Alpha Merch Store launch
- Alpha City beta launch
- Alpha Swap launch
- NFT P2E game full release
- Exchange listings
- Alpha City Land plots sale
- Real-world Alpha City events
- Alpha Wallet beta
- Alpha City Creator Tool launch

Completed: Alpha City smart contracts, website launch, Certik Audit, NFT Designs, Coinmarketcap & CoinGecko listings.

Meet the Alpha City Team

CEO, Alpha City Mayor

James Cuellar

UI/UX, Web3, and DeFi Developer

Alex Gonzalez

3D and Video Animation, Graphic Design, and Web Design

Conclusion

Alpha is positioning itself to be the premier social business lifestyle metaverse, with virtual real estate, events, and unique opportunities for users around the world. Alpha City is a purpose-built metaverse; an entire ecosystem that promotes fun, interaction, year-round entertainment, social activities, and a real sense of community that is designed to endure for many years to come.
