01 Disclaimer

The liquidity & the related swaps have interactions with each other. Only those who are fully aware of, and agree to these risks should interact with safeswap.online.

SafeSwap.online (or any safeswap.online affiliate assignee of safeswap.online) launched a new Cryptocurrency Swapping platform, called "SafeSwap.online" (SWAP), which gives rise to the Exchange and Swap of

certain Tokens to it's users and any users in the space of Cryptocurrencies through it's Swap platform governed by Safeswap (SWAP) Token platform terms and conditions.

The Aim to provide the safest & easiest token to token swap & exchange experienced ever.

The SafeSwap Protocol is instant, secure and trustworthy for all types of cryptocurrency traders that are looking for a reliable DeFi trading platform.

2

02 Abstract

+100%

DECENTRALIZED PLATFORM: a decentralized trading protocol that allows different types of cryptocurrencies to be swapped & exchanged.

The SafeSwap Online platform therefore provides a seamless and reliable trading experience.

SafeSwap.online is a DECENTRALIZED EXCHANGE PROTOCOL a platform where to swap & trade tokens and coins safe & fast, based on the binance smart chain network (BSC).

Bringing swap & exchange of cryptocurrencies to a clean trading environment.

Brings investments of kind products to a high APY earnings percentage and in a fair distributed system of farming & staking.

Trading digital currencies on SafeSwap is an exciting approach with no execution delays or unnecessary distractions. Every trade is instant and relies on one of the decentral smart contracts that are safely deployed on the blockchain.

An easy tool to swap coins & tokens and provide liquidity to pools to satisfy the power of safe earnings & profits.

3

03 Introduction

Act 1

The launch of Safeswap.online was successful, and many users have the ability to swap and exchange their tokens to different assets based on binance smart chain network (BSC) with safety and ease of mind.

Act 2

With the launch of Safeswap.online staking products many SWAP token users starts to stake their assets to earn on the high APR staking pools provided by safeswap.online with the words stake to earn safeswap.online have achieved what the real means of (STAKE To EARN) words.

Act 3

Yet more to come and more to be achieved. The support of multiple blockchains (Solana, polygon, Qtum, Phantom, Smartbch, etc...). Providing Liquidity boosters solutions through the lease and lending services. Provide multiple dimensional stacking products, Auto and compounded staking pools. The Fiat abilities for the users through the RAMP integration, via a provider in the market which is European approved and regulated. The virtual NFT's assets ownership markets, that includes the real virtual assets of the non fungible tokens NFT's, Art assets, gaming assets, and other NFT's available to the safeswap.online users to start their own virtual ownership markets.

4

04 Ecosystem

The SafeSwap finance protocol is a dedicated trading (DeFi based) DEX that allows people to instantly connect with existing liquidity pools. There are several SafeSwap mirrors in order to secure accessibility at all times. This allows the user to essentially become their own market maker.

The Vision to safely increase the freedom of money globally, in believing spreading that vision in a safe approach, SafeSwap can improve lives all around the world surely but yet safely in a decentralized way, as it's the vision of the current era related to the economic world all around the world, safeswap has achieved way much and more on the way coming to be achieved.

Liquidity providers can yield rewards by providing funding to traders wanting to trade on safeswap.finance, a part of the projected products to safeswap Ecosystem that is considered the main product and source of safest income.

SafeSwap currently using the router and factory smart contracts from PCS2 and not collecting any revenue or trading fees. Whatsoever safeswap.online does earn a percentage of the fees from the staking mechanism, SWAP Liquidity Pool and additional features that safeswap.online provide.

- Backed by BNB
- Automated Market
- Incentive Interest
- Organic Approach
- Doxed Company
- Flexible Services
- Audited by professionals
- High Standard

5

04. Ecosystem
4.1 Safeswap
### 4.2 Use Cases
4.3 Implementation
4.4 SafeSwap Token

4.1 Safeswap

SafeSwap backed by BNB, in an automated market based on the audited and trusted smart contracts, which gives its users the ability to swap their tokens in a safe environment while maintaining the real decentralization aspects, more over to earn incentivised interests by interacting with it's products and services.

4.2 Use Cases

Swap between tokens on the BSC Binance smart chain network, provide liquidity to tokens pairs and earn incentives as interests from the fee's revenue, stake tokens on the available staking pools to earn staking rewards, stake LP tokens on the available LP tokens pairs pools to earn more rewards from the staking products, check tokens data and charts add favorites tokens to watchlist list.

4.3 Implementation

With every release safeswap.online implementing new features, more to come to safeswap.online, the safeswap.online contract implemented using the original source from the well known pancake swap, the aiming to achieve the safiest swap and exchanging experience is the first role for implementation on the safeswap.online.

4.4 SafeSwap Token (SWAP)

Swap Token is a digital asset that connects the SafeSwap Platform and its underlying functionalities, SWAP token the platform asset that combines staking and rewards and the official pair token on the safeswap.online platform.

4.1.1   SWAP Token   Lock mechanism

30% of the total supply is locked over the next 10 years,   in different   pools and   different periods,

The main lock is the SafeVault SWAP Token LP staking 150.000 SWAP 15% of the total supply will be locked every year for the SafeVault pools to date 19-Aug-2031

The secondary lock is the SafeEarn pools 50.000 SWAP 5% of the total supply

Will be locked in 3 different pools for different periods of time
1. Stake SWAP/EARN SWAP to 01-Feb-2024
2. Stake BTCA/EARN SWAP to 17-FEB-2022 Ended
3. Stake MUXE/EARN SWAP to 25-Nov-2021

The third lock is the SafeNFT holders pool 100,000 SWAP 10% of the total supply will be locked for the SafeNFT holders staking pools and mint events.

5

4.2.1 Swap & Exchange

SWAP between Coins and tokens using Safeswap on multiple blockchains

.

4.2.3 Providing Liquidity

Provide Liquidity of your owned coins pairs or create your own pools pairs

4.2.2 Fiat Getaway

Buy Digital currency with fiats using your credit cards or debit cards easily using Swap Fiat Getaway through banxa

4.2.3.1 Liquidity Pool lock mechanism

By providing Liquidity of the pool pairs chosen and or created Liquidity Pools a LP token will be generated and stored in the wallet performed the action, to withdraw the Liquidity provided or the rewards for providing Liquidity, the LP tokens increases based on the pool, the amount of the LP increase is the amount of the rewards, when withdrawing the Liquidity provided, the LP token created is the lock and the rewards calculator for providing Liquidity.

4.2.4 Staking

Stake Digital Assets in terms of available pools provided by SafeSwap staking. Single Asset Pools, Dual/Paired Assets Pools, LP Tokens Pools, NFT Assets Pools. Staking Pools are subjects to finish/end or renewed and/or new staking pools created to take. The advantage of most profits and earnings keep following up with Safeswap.finance live channels.

4.2.4.1 Staking Lock mechanism

Staking lock mechanism depends on the staking pool featured by safeswap.finance, when decided to start staking to earn rewards take information of which pool staking to, Major things to keep in mind when staking, **Staking pool end time (**No of blocks the pools runs before ended**), Staking pool lock time, Minimum staking limit & Maximum staking limit.**

4.2.4.2 Staking Rewards mechanism

Staking rewards mechanism depends on how safeswap.finance provided the staking pool, Manual harvesting rewards or Auto harvesting rewards, when deciding to stake on manual pools rewards harvest must be triggered manually by clicking the harvest button on the DAAP, Auto pools are pools with rewards automatically harvested, to the wallet of each pool participants or Auto combined to the staking amount of each pool participants, [**For further info on how pools runs check the staking page from safeswap.finance DAAP**]

4.2.4.1 & 4.2.4.2

Ex. Of Stake lock Mechanism

1. Fresh staked on pool with 3 Days lock time - Staking can be moved (Withdrawn) from pool after 3 Days. [**Any attempts to remove staking before lock time ends will fail**]
2. Harvested rewards after staking - before lock time ends or after lock time ends - Staking lock time will re-apply after each harvest. [**Any attempt to remove staking after harvesting and lock time re-apply will fail until lock time period ends**]
3. Raise staking by adding more to pool will re-apply lock time - [**lock time does not stak when it's re-applied by functions; it just starts the lock countdown timer**]
4. Remove (Withdraw) staking, Automatically Harvest (Withdraws) rewards to the same wallet in function.

4.3.1 Multi Blockchains support

Safeswap.finance, Safeswap.online Aiming to support Multiple Blockchains to give its users the ability and flexibility to invest and earn in different and wide ranged possibilities, to raise its functions for its users and gives them the ability to Swap & Exchange in different markets based by blockchains network, which in return will give them the ability to invest, store, buy & sell Safeswap.finance and other digital assets on Multiple Blockchains Network. Currently Safeswap.finance, Safeswap.online available on Binance Smart Chain (BSC blockchain) and Polygon Chain (MATIC blockchain).

4.3.1.1 BSC Binance Smart Chain Network

Binance smart chain BSC Network is one of the very famous blockchain started earlier backed and owned by the binance BNB Network, Safeswap.finance, Safeswap.online first ever launched on the BSC Network and with its major successful launch, followed up to launch Swap & Exchange on its second major Blockchain.

The details of Safeswap on the BSC Blockchain, Contract Address of the SWAP Token and further information.

Asset Name: Token SafeSwap Token
Symbol: SWAP
Decimal: 18
Contract Address: 0xe56a473043eaab7947c0a2408cea623074500ee3
Safeswap Website: SAFESWAP DAAP & WEBSITE

4.3.1.2 Polygon Matic Chain Network

Polygon Matic chain is also one of the famous blockchains, with its Matic currency as the main source of the polygon blockchain. Safwswap.finance, Safeswap.online launched its service for its users to Swap & Exchange on Polygon blockchain. Currently only available to Swap & Exchange only.

The details of Safeswap on the BSC Blockchain, Contract Address of the SWAP Token and further information.

Decimal: Not Applicable
Contract Address: Not Applicable
Safeswap Website: SAFESWAP DAAP & WEBSITE

4.3.2 DEFI Supported by Safeswap

One of the implementation as a services Safeswap offers, is a DEFI supported by safeswap sponsoring DeFi platforms for projects want to launch their TOKENS, COINS, or a whole DeFi Platform or projects, as a subsidiary under the management of Safeswap.finance, Safeswap.online.

4.4 Safeswap Tree plan

Supporting the world environment by planting trees all over the world, Safeswap by its Tree Plan with the help of some of the leading Environmental supporting organizations are collaborating to make the earth more greener, and to help the world become more efficient energicaly by supporting the CO2 movement and the climate change movement, Safeswap planning to plant 1,000,000+ Trees over the world with the Ecology organization on the next few years.

Numbers of the TRUE View

Planted 30,000+ Trees
Aiming to plant 1,000,000+ in the coming years
Minimum 1,000+ monthly trees targeted
To get more insight of the Numbers achieved by Safeswap Tree plan visit **MUXE BV | ECOLOGY**

4.5 Safe Audit

Safe Audit runs the **AUDIT.SC** services, one of the most reliable costly and executed by professionals on the blockchain, Auditing smart contracts of the many blockchain available and providing wide range of auditing reports services, Project teams KYC's (KYCT), and other auditing report services related.

4.6 Safeswap Mobile Application

The Safeswap Application released with the capability to connect wallets with the app and use the whole functions of safeswap platform in one place, not a wallet but yet a decentralized app with much more than capabilities.

04 Ecosystem Overview
ES Overview

SafeSwap.finance Protocol governed by SWAP Token, that controls safeswap.online protocol with it's provided features, and future available features like in protocol voting, etc.....

- SWAP Token total supply 1,000,000
- No pre-sale or private sale.
- Providing Liquidity to pool pairs feature available.
- SWAP Staking features available.
- Other Tokens staking features available.
- LP Tokens Staking features available.

The charts below shows real data of safeswap.online Ecosystem since the date of launch to the release of whitepaper.

05 SafeSwap NFT

SafeSwapnft.com is one of the uniquiest features related to Safeswap.finance Platform, plus never minus launched with it's uniquiest approach. Providing SWAP Token holders with special ability to own the holders Safeswap NFT and the upper class version Safeswap Plain NFT with the ability to gain access to earlier Safeswap platform hub, and gain access to special perks and discounts for future NFT sales and Safeswap NFT markets.

05 SafeSwap NFT

First editions of Safeswap.finance Nft's

Description
What is SWAP TOKEN Holder NFT?

The SWAP Token Holder NFT stands symbolic for those that own SWAP Tokens. We introduced this NFT Series for people that wanna confirm that they are holding SWAP by purchasing the Swap Token Holder NFT.

This token has **no additional perks or rewards** attached to it and is purely symbolic. There are currently 10,000 SWAP Holders so we decided to have 10,000 pieces of the SWAP Token Holder NFT.

SAFESWAP.FINANCE

5.1 MetaVerse

   Safeswap Metaverse:

SafeSwap Metaverse is the 3D Digital world were Safeswap users can hangout, communicate, play with each other and compete against each other to collect in the metaverse assets and playground tools including a leaderboard list for best competitors competing against each other, a virtual world in 3D Digitalized mode were the users can be hanging out searching for new adventures in the Safeswap Metaverse world, from the lands to the hill's and mountains, to the sea and what's under, there are many adventures with the advantages to conquer the metaverse in a peace state, with events and much more of activities.

The Safeswap Metaverse will play major role and be the background of the safeswap Ecosystem, introducing safeswap majority, culture, partners, protocols and functions in a Decentralized, Digitalized, Dynamic way, with the E-learning advantages in a fun and anti-boredom way.

BRINGING UP SOME MAIN FEATURES OF SAFESWAP METAVERSE, were it's more friendly and launching in the peace state, integrating a ways to hangout with safeswap team, developers, and friends in the metaverse where it will be a hub for the safeswap community but in a modern way where it's more a playground to walk-around and find latest news about safeswap and other major news inside the metaverse world, using swap functions from within the metaverse world and find information about safeswap liquidity pools and staking pools inside the metaverse world, access the swap functions inside the metaverse and swap, stake, unstake, harvest (claim staking rewards) from within the game world.

WHERE THIS WILL BE THE FIRST LAUNCH WHEN THE METAVERSE LAUNCH CURRENTLY THIS WILL BE THE MAIN FEATURES OF THE SAFESWAP METAVERSE, were in the future more implementation are coming with the updates of the metaverse, were there will be a NFT collectables, major earning events, rewarding schema, NFT stores, a P2P stores for NFT and other in metaverse assets and more and much more.

Adding the adapting of the Ecology / Eden forest which is the safeswap tree plan, in the metaverse in the future where it's coming with the major updates of the safeswap metaverse world.
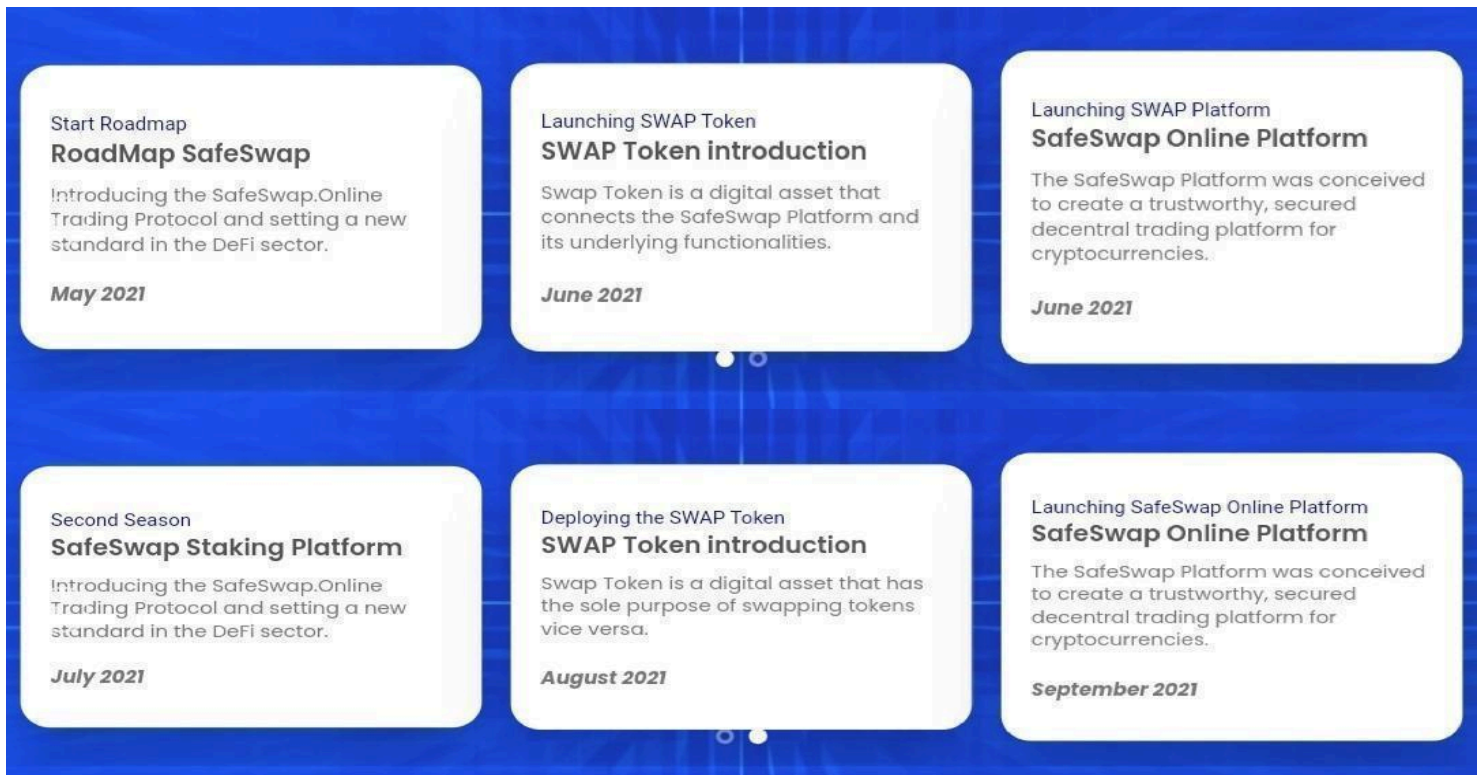

06 Aiming for Successful

Vision. SafeSwap is unique and sustainable and has a great potential to set a new standard in the DeFi industry. By refactoring traditional functionalities from alternative DeFi platforms in combination with fresh new ideas and features that have never been seen among DeFi platforms in the past SafeSwap Online will try to distance itself from available competitors in the market.

The aiming standards of safeswap.finance is to become one of the uniquest safest secured and easiest to use, decentralized services providers out to it's audience and all other users on the cryptocurrency space, using it's safe features from swaps to staking and NFT's markets to voting and issue a governance solutions to better scope the Aim for successful in the future of achievements.

08 Team

Jaimy de Vries

I like to make my decisions carefully and consider several viewpoints to ensure the best solution to any problems that may arise.

I'm very creative and have a sharp eye, very fast thinking and good at communicating and connecting.

I have a large network and a large network connection which is what helped me start this project.
