League of Kingdoms >>Arena-Z: Smart Contract, Token Swap & Tokenomics Update

In March 2025, **League of Kingdoms (LOKA)** officially began its transformation into **Arena-Z (A2Z)**, marking a significant evolution from a single-game token to a comprehensive gaming platform token with a full capability gaming L2 called AZ Chain. This update provides essential details on the smart contract migration, token swap, DAO voting outcomes, and relevant token operations in 1H 2025.

🔄 Project and Token Rebranding

- **Current Project Name:** League of Kingdoms
- **New Project Name:** Arena-Z
- **Current Token Ticker:** $LOKA
- **New Token Ticker:** $A2Z

The rebranding reflects a shift from a game-specific asset to a platform-level token powering multiple games and services within the Arena-Z ecosystem.

🧠 Smart Contract Migration

- **Current Token ($LOKA) Smart Contract:**

0x61e90a50137e1f645c9ef4a0d3a4f01477738406

🔗 $LOKA on Etherscan

- **New Token ($A2Z) Smart Contract:**

0x08dCb9B5989fb09efB0E85567ec1F49577a70D29 Top highlight

🔗 $A2Z on Etherscan

The new smart contract has been deployed on the Ethereum Layer 1 & will be subsequently bridged to Arena-Z Layer 2 chain (OP Superchain), which is designed for low-cost, scalable Web3 game operations.

🔁 Token Swap Ratio

- **Swap Ratio:** 1 LOKA = 20 A2Z

The redenomination was implemented to optimize token utility and accessibility while maintaining proportional ownership for all existing holders.

🗳️ DAO Voting Results

The transition to Arena-Z was authorized through a series of community-approved governance proposals:

- **AIP-001:** LOKA to power the new Web3 gaming ecosystem (Arena-Z)
  🗳️ **Voting Period:** Dec 20, 2024 — Jan 3, 2025
  ✅ Passed 100%
  🔹 *Approval of project & token rebranding: migration to Superchain, swap ratio, swap method, and merger of Ecosystem & Staking allocations.*
  View Proposal
- **AIP-001B:** wLOKA to power the new Web3 gaming ecosystem (Arena-Z)
  🗳️ **Voting Period:** Jan 10, 2025 — Jan 24, 2025
  ✅ Passed 97.55%
  🔹 *Approval of the same agenda as AIP-001, including wLOKA holders for participation.*
  View Proposal
- **AIP-002:** Aligning with industry standards: Circulating supply update & staking re-lock
  🗳️ **Voting Period:** Mar 28, 2025 — Apr 11, 2025
  ✅ Passed 99.09%
  🔹 *Approval of circulating supply update, minting of remaining tokens, multi-sig wallet locks, and re-lock of 65,000,000 $LOKA.*
  View Proposal

📊 Tokenomics Changes

Following the token operations approved in April 2025 (AIP-002), there will be **no structural changes to tokenomics** when the rebranding from **$LOKA to $A2Z** takes effect — **except** for:

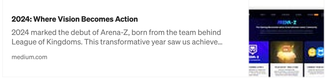

- **20x Redenomination:** The total and max supply will be scaled 20x in accordance with the swap ratio (500M $LOKA to-be 10B $A2Z)
- **Re-Lock Implementation:** 65,000,000 $LOKA (equivalent to 1.3 billion $A2Z) already unlocked from the staking allocation has been re-locked with a renewed vesting schedule through January 2027, aligned with the original vesting timeline.

All other token allocations, emission logic, and vesting structures will remain unchanged, ensuring transparency and continuity under community governance.

2024: Where Vision Becomes Action

Published: Jan 17, 2025

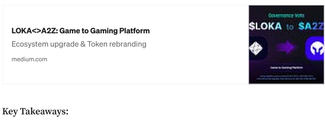

Key Takeaways:

- Arena-Z & AZ Chain launched as a gaming-focused L2 on Optimism's Superchain.
- New titles like *LOK Chronicle* introduced; strong focus on NFT interoperability and developer support.
- $LOKA → $A2Z (1:20) rebrand completed with full audit.

LOKA<>A2Z: Game to Gaming Platform

Published: Feb 19, 2025

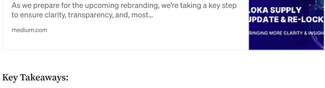

Key Takeaways:

- $LOKA will be rebranded and redenominated (1:20) into $A2Z as part of the Arena-Z rollout.
- A2Z enables gas fees, SDK tools, NFT drops, and multi-game utility across the Arena-Z platform.
- Token contracts are fully audited and changes are implemented through DAO governance.

$LOKA Supply Update & Relock: Bringing More Clarity & Insight

Published: Apr 14, 2025

Key Takeaways:

- Circulating supply adjusted to match industry reporting standards.
- All tokens minted and locked per the original vesting terms — no unexpected emissions.
- 65,000,000 $LOKA staking allocation re-locked through early 2027 to ensure ecosystem stability.
