PLAY Token Migration to Base Chain & Ecosystem Upgrade

9

13K

Dear PlaysOut Community,

After careful evaluation, the PlaysOut team has made the decision to migrate PLAY from BSC to Base Chain and permanently reduce total supply. This is a deliberate step to strengthen the structural foundation of the PLAY token economy, reducing circulation pressure, concentrating liquidity and building toward the next phase of PlaysOut’s growth.

What Is Changing

- PLAY will migrate from BSC to Base Chain. All BSC holders will receive PLAY on Base Chain at a 1:1 ratio — your position is fully protected.
- Base Chain will be the only chain where PLAY circulates going forward.
- Upon completion of the migration, total supply will be permanently reduced from 5 billion to 4 billion tokens.

Supply Breakdown (Before vs After)

Category	Before	After
Active Chains	BSC + Base	Base only
Total Supply	5,000,000,000	4,000,000,000
Base Supply	4,000,000,000	4,000,000,000
BSC Supply	1,000,000,000	0
Burn	—	1,000,000,000

Onchain Holders - Binance Wallet (Alpha 1.0) & Other Wallet Users

- A snapshot has been taken at 1:29:59 PM SGT to record all BSC PLAY wallet balances.
- All wallets holding BSC PLAY at the snapshot time will receive PLAY on Base Chain at a 1:1 ratio.
- The minimal requirement to obtain the airdrop is to hold at least \$1 USD worth of PLAY token based on the snapshot timing
- Important: *DO NOT purchase BSC PLAY tokens after this announcement.***

After the snapshot has been taken. Any BSC PLAY acquired after the snapshot time will NOT be eligible for the 1:1 migration.

Binance Alpha 2.0 — Automatic Migration

- Binance Alpha 2.0 will automatically migrate all eligible BSC PLAY holdings to Base Chain at a 1:1 ratio. No manual action is required.
- No action is required for assets held on Binance Alpha 2.0.

Timeline

Process starting 23/03/2026

- Migration initiated
- On-chain snapshot completed
- BSC suspension of PLAY trading, deposits and withdrawals
- All BSC holder addresses and balances compiled
- PLAY distributed on Base Chain at 1:1 to all snapshot addresses
- Binance resumes trading, deposits and withdrawals

Important

- Do not conduct any PLAY transactions on BSC until the migration is officially confirmed complete.
- Do not trust any information or private messages from unofficial sources.
- All updates will be communicated exclusively through official PlaysOut channels.

Why This Matters

Every durable token economy requires disciplined supply and clear infrastructure. This upgrade delivers both: a tighter supply profile and an infrastructure upgrade aligned with the next phase of scale.

This is a structural repositioning for what comes next. It concentrates liquidity across the ecosystem. Execution will be precise, with clear communication throughout.

Thank you for your continued trust and support.

PlaysOut Team

*Official Support Channels

To ensure a secure and transparent migration process, all PLAY holders including Web3 wallet users and DeFi participants should rely exclusively on the official PlaysOut communication channels listed below.

For any questions regarding snapshot eligibility, migration status or token receipt on Base, users may contact the team directly through:
