GOGLZ | SONIC 🕶️ 💥 ✅
@GOGLZ_SONIC

What is going on with $GOGLZ and the impending SONIC launch/migration? 🕶️ 💥

We got the details here.

$GOGLZ will able to go back and forth between $FTM and SONIC at initial launch via a @LayerZero_Core OFT bridge. (a 🧵)

You will be able to access the bridge directly through our site or through @StargateFinance.

$GOGLZ will swap 1:1 and be able to go back and forth for a limited time until we eventually make bridging one way only from FTM - SONIC.

Watch our X for official links to avoid scams.

As there is sizeable liquidity on FTM we will also be able to open with large liquidity on SONIC to keep the pools in check while people migrate. Migration for everything on FTM will not be an over night process so this feels best to protect holders and LPers.

We are still waiting for SONIC to be available for developers, but as soon as we have chain details from Layer Zero our bridge will be ready as it is completely built/tested!

So, keep those $GOGLZ on. We have a battle tested bridge coming via the most secure standard available and want this to be hopefully as painless as possible.

The move to SONIC is going to be beyond worth it, time to come home!

The real fun is about to begin.

THEY STAY ON
