General Questions

1. What is the NEOPIN token migration?

The migration is when NEOPIN switches its token from $NPT to a new one called $MAY on the Solana blockchain. This migration starts on June 16, 2025, with Bithumb suspending NPT deposits/withdrawals in order to perform the migration.

2. Why is NEOPIN changing from NPT to MAY?

NEOPIN is upgrading to MAY to use Solana's fast, low-cost network and add cool AI-powered DeFi features like staking and yield farming, making it better for everyone! You can learn more about the vision/mission here: x.com/NeopinOfficial...

3. When is the migration deadline?

You need to complete the migration by December 18, 2025 at 23:00 UTC, but check Mayflower AI's official website or Twitter for any updates.

4. What happens if I miss the deadline?

If you miss the deadline, your NPT tokens will not convert to MAY, and their value or use could be affected. Act before December 18, 2025 to be safe!

5. Is the migration free?

The migration itself is free, but you'll pay small gas fees (e.g., $0.50–$5 in ETH, POL, KAIA, or SOL) for transferring tokens and burning NPT on the portal.

Exchange-Related Questions

1. Does my exchange automatically swap NPT to MAY?

Some exchanges like Bithumb will swap NPT to MAY for you. Log into your exchange, look for MAY or NPT news in the "Announcements" section, or contact support with, "Will you swap my NPT to MAY?"

2. What if my exchange doesn't support the migration?

If your exchange doesn't swap for you, refer to the migration step-by-step: x.com/Mayflower_AI/s...

3. Can I leave my tokens on the exchange if it supports the swap?

Yes, if your exchange handles it, just follow the instructions your exchange provides!

Wallet Setup and Transfer Questions

1. What wallet do I need for the migration?

If you are executing the migration yourself, you'll need a self-custody wallet (for Kaia, Polygon, or Ethereum) to transfer your NPT AND Phantom Wallet (for Solana) to receive the newly migrated MAY tokens.

2. How do I transfer NPT from my exchange to my self-custody wallet?

Copy your wallet address, go to your exchange's "Withdraw" section, paste the address, pick the right network, and send your NPT. Check twice to avoid mistakes!

3. What if my NPT doesn't show up in my wallet?

Add NPT manually in your self-custody wallet. For example in your non-custodial wallet: Click "Add Token," enter the
NPT contract address:

Ethereum: 0x306ee01a6bA3b4a8e993fA2C1ADC7ea24462000c

Polygon: 0x306ee01a6bA3b4a8e993fA2C1ADC7ea24462000c

Kaia: 0xe06597d02a2c3aa7a9708de2cfa587b128bd3815

4. How do I set up a Solana wallet for MAY?

Download Phantom from phantom.app, create a wallet, save the recovery phrase, and send a little SOL (e.g., $1–$2) for fees.

5. How do I connect a NEOPIN wallet?

Select "WalletConnect" option from the wallet list and scan the QR code to connect your wallet.

Migration Process Questions

1. How do I use the migration portal?

Go to migrate.mayflower.fyi, connect your MetaMask wallet, choose how much NPT to burn, enter your Phantom address, and click "Burn NPT and receive MAY on Solana."

2. What does 'burning' NPT mean?

Burning means swapping your NPT tokens for MAY. Your old tokens are removed, and you get new MAY tokens on Solana in return.

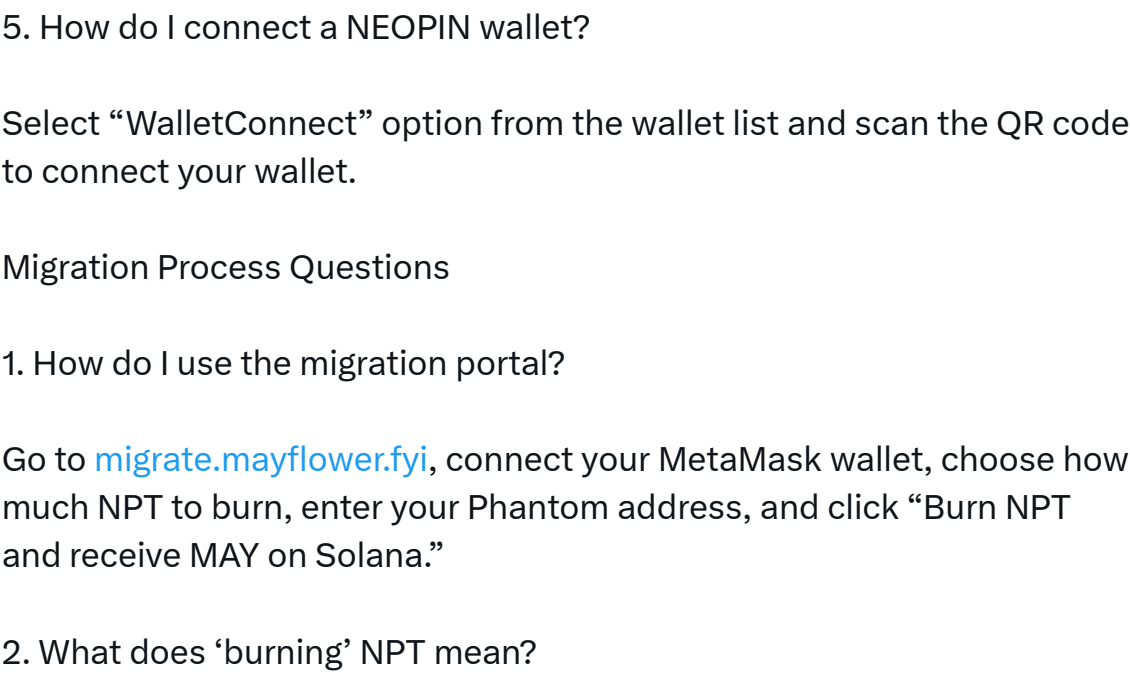

3. What if MAY doesn't appear in my Phantom wallet?
Add MAY manually in Phantom:
Click "Manage Tokens," enter the MAY contract address (FJz7ptUR1FwxSHbb8Sfd5Cn6Zt4TqucJZKLqU4n66gdq), and confirm.

4. How long does the migration take?

The process takes ~5–20 minutes after you confirm the transaction, depending on network speed. Check Phantom after to see your MAY.

Due to the time to finality of Polygon, transactions may show as succeeded immediately, but it will take around ~10 minutes before your MAY is received on Solana.

For questions reach out on Twitter, Discord, or email us at support@mayflower.fyi - be aware of scammers, so please verify.
