UniDex Exchange (🌋,🌋)
@UniDexFinance

As of this moment, a snapshot has been taken and balances have been recorded.

You will receive a new UNIDX token on ETH with the following ERC20 address 👇
0xf0655dcee37e5c0b70fffd70d85f88f8edf0aff6

The old UNIDX token on the chains Optimism, ETH, BOBA, zkSync, FTM, and METIS are no longer officially recognized by the protocol

We have already seeded an equal amount of UNIDX backing the amount on Arbitrum to the Synapse bridge. Arbitrum is unaffected and as Synapse re-enables the bridge, people can freely move in and out of Arbitrum with the new UNIDX token on ETH.

Optimism and other chain deployments are to come this week with Synapse as well to allow for liquidity to come back on Velodrome under a NEW erc20 on optimism.

Once again the OLD erc20 token on every chain expect arbitrum is no longer recognized by the protocol and you have received a new UNIDX token on ETH which you can bridge to your favorite chain soon with synapse.
