WHO IS KINGDOM?

Kingdom is a sustainable utility token on the Ethereum Network (ERC-20). Our ecosystem consists of 500 unique NFTs alongside an incredibly fun medieval-based staking game that rewards players with a generous annual percentage yield (APY) based on their performance. Our team is composed of seasoned blockchain experts and entrepreneurs from around the world who understand what it takes to build a successful long-term project. We also have all the resources and connections to make it happen. We happily invite you to join us as we begin our new journey at Kingdom!

KINGDOM'S VISION

Kingdom's vision is to create a token that offers the perfect balance between utility and security.

We believe in creating an ecosystem where you can feel confident about your investment in a highly volatile market, all while having fun!

We want our investors to feel immersed in an interactive, reward-based game that offers great returns. And by playing, you'll be helping with the sustainability and growth of the project!

We plan on developing our game so that players genuinely feel rewarded for their efforts and dedication.

KINGDOM TOKENOMICS

Kingdom's tokenomics will help keep the ecosystem sustainable. A portion of the taxes will automatically go into our LP to reduce volatility and attract larger investors. The remainder of the taxes will be used for continuous marketing and development of the project to grow the chart and surprise our holders with new and exciting features.

Total Supply: 400,000,000,000

Buy Tax: 8%
2% Automatically to LP,
3% to Marketing,
3% to Development

Sell Tax: 8%
2% Automatically to LP,
3% to Marketing,
3% to Development

8/8

Kingdom NFTs

Kingdom will have 500 NFTs that will leave you speechless! Our NFTs will be recognized as the most beautiful in the industry. The talented NFT designer behind Kingdom has produced NFTs in some of the most recognizable projects in the space.

Our collection is very limited as there are only 500 NFTs available, so you'll want to mint some before they sell out!

When the NFTs are minted and traded, a percentage of the transactions will go to the Kingdom ecosystem to provide stability and growth. The cost of each mint will be 0.10 Ethereum.

Test your luck to see if you're able to secure one of our legendary Kingdom NFTs!

KINGDOM STAKING GAME

The Kingdom staking game follows the same tokenomics of the project to help with sustainability. The game goes way back to medieval times and was inspired by a popular game called "Age of Empowers."

The aim of the game is to upgrade your kingdom and fend off the opposing empire. The empire sends waves of troops to invade your kingdom, dropping loot in the form of gold when defeated. You'll be able to exchange your gold for Ethereum which you can withdraw as a reward.

The game will have several in-game features you'll want to check out, such as compounding to increase your rewards and various tower upgrades that can earn you a higher yield. There's also an upgradeable treasury that holds your income. It's not unlimited so make sure to claim your rewards when it gets full!

To play the game, you'll need a Defi wallet such as MetaMask. Ensuring you're on the Ethereum Network (ERC-20), simply connect your wallet when logging into our dApp and follow the steps listed on the screen.

KINGDOM ROADMAP

Phase 1

- 500 Telegram Members
- CMC Listing
- CG Listing
- Kingdom NFTs
- Kingdom Staking Game
- New Website

Phase 2

- 2000 Telegram Members
- Centralized Exchange Listings
- Partnerships
- Mass Marketing
- Staking Game Expansion

Phase 3

- Not Revealed
