

Stablz

A NEW VISION FOR DEFI

OUR MISSION

THE ORIGIN

STABLZ was born boldly asking one question. How can we create a sustainable and ever evolving protocol, stable in all markets.

We are proud to present a new vision for DeFi.

Welcome to the **EVOSYSTEM**

THE PROBLEM

FARMING ISN'T ALWAYS GUARANTEED,
EVEN ON STABLE PAIRS

APY ISN'T REAL UNLESS TOKEN VALUE
REMAINS CONSISTENT OVER TIME

FARMING IS RESOURCE HEAVY AND
REQUIRES CONSTANT MONITORING

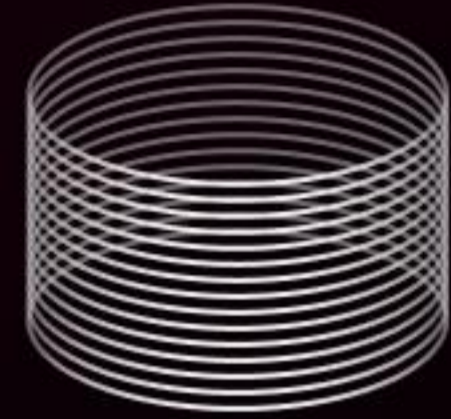

THE SOLUTION

OUR STABLE ECOSYSTEM ADAPTS TO
AN EVER CHANGING LANDSCAPE

OUR PROTOCOL AUTOMATICALLY CONVERTS
REWARDS TO STABLE ASSETS FOR YOU

OUR PRODUCT OFFERS A FULL SUITE OF REAL
YIELD WITH AUTOMATED HARVESTING AND A
SIMPLE AND INTUITIVE UI

THE PILLARS

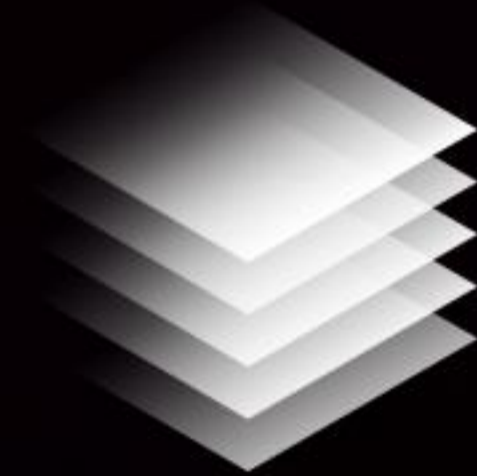

Real yield.

Converting your token emissions into real value with tried and tested stable coins, in real time.

Stable Rewards.

Realizing, and stabilizing profits through automated harvesting on your behalf.

Above Farms

We don't compete with your favourite farms, we build on top of them, offering you the full suite of real yield.

Ecosystem Evolution

Stability in uncertainty, means agility in adaptation. Stablz is built for evolution in an ever-changing market.

REVENUE

Platform fees

*Platform fees are generated from user yields, so these are in stablecoins and not taken directly from deposits.

Staking Rewards

10%

Incentivizing and rewarding users to lock up their tokens into our staking pool; rewards are first in \$STABLZ, followed by USDT when allocated supply runs out. This ensures there will always be some rewards for users as soon as it is live.

Buybacks

20%

Platform fees will help stabilize the price of the token through the form of buybacks.

Referral system

10%

The referral system will help incentivize influencers, friends and family, and other networks to spread the word and increase the TVL on the platform, which in turn generates more revenue.

OPERATING SYSTEM

USERS WHO STAKE IN THE STAKING POOL WILL RECEIVE OPERATING SYSTEM (\$OS) TOKENS AS A RECEIPT. THESE WILL BE ISSUED 1:1 UPON DEPOSIT.

ONCE THE GOVERNANCE PORTAL IS LIVE, ANY USERS WHO HAVE \$OS WILL CREATE PROPOSALS (WITH A CERTAIN HOLDINGS THRESHOLD) AND BE ABLE TO VOTE. A PROPOSAL MAY BE AS A FEE CHANGE, POOL ADDITION OR REMOVAL, INCENTIVIZATION OF DEPOSIT INTO A CERTAIN POOL, OR DE-INCENTIVIZATION THEREOF.

AS THE PROTOCOL ACHIEVES MORE TVL AND BECOMES A MAJOR USE CASE FOR DEFI USERS, THE ABOVE POSSIBILITIES IN PROPOSALS WILL DRIVE FURTHER DEMAND FOR THE TOKEN IN ORDER FOR THEM TO RECEIVE MORE GOVERNANCE TOKENS. THIS IS BECAUSE THE GOVERNANCE TOKEN WILL NOT BE TRADABLE.

THE ONLY WAY TO GET IT IS BY STAKING \$STABLZ BY YOURSELF. GOVERNANCE SHOULD POWER THE KEY ASPECTS OF THE PROJECT, WHICH SHOULD DRIVE DEMAND.
