01   Abstract

Small size, big dreams.

DOGEKAKI, aims to be a fun and decentralized project.

KAKI is named after the Corgi dog. It is a traffic distribution platform dedicated to linking with the traditional internet via blockchain for traffic sharing and helping the traditional internet to access our decentralized exchange KAKISwap blockchain industry.

The first partner under the KAKI ecosystem is Doge Quantitative System, which promises to provide 1USDT = 1DQS = 100000KAKI to provide exchange services and that the exchanged KAKI will be permanently destroyed by entering a black hole address, leading to ecological deflation.

TRANSPARENCY

DOGEKAKI is decentralized and supported by its community of enthusiasts. We encourage open communiDOGEKAKIion and believe trust, transparency, and community are the 3 pillars to building longevity.

COMMUNITY

DOGEKAKI is one of the fastest growing and most loved communities in crypto we believe that only together we are strong. Community is everything and DOGEKAKIstrives to include everyone from around the globe. We have multiple telegram channels dediDOGEKAKIed to our international communities.

TRUST

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security e orts. DOGEKAKI has been audited by a third party   and has burned and locked majority of the LP tokens. No rug pulls here onlycutedoges.

TRANSPARENCY

DOGEKAKI is in for the long haul. The decentralized community is fostering and adopting long term development of the ecosystem and foundation in e orts to drive real use cases, and greater rewards beyond any temporary trends.

03   **BSC CHAIN**

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and e iciency than other, competing chains. With decentralized exchanges on BSC o ering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the BinanceTeam called BEP-20. Known for 5 second block speeds much faster than doge with 1 minute block speeds. These 2 articles compare block speed:

1 Minute:

It's a proprietary blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communiDOGEKAKIion and scaling of high-pe ormance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

ECOSYSTEM

Community-Powered

DOGEKAKI is decentralized andowned by its fun, vibrant community.
We welcome and embrace diverse perspectives to build DOGEKAKI into the best community in crypto.

Instant Rewards

For every transaction in the DOGEKAKI network a fee is distributed to existing holders. That means you earn more DOGEKAKI just by holding it in your wallet. Watch your DOGEKAKIgrow every transaction!

Locked LP

Liquidity tokens are burned and locked. Additionally, 0% of all transaction fees are added to liquidity.

Mechanisms

DOGEKAKI employs 3 simple functions:

0%   0% fee = redistributed to all existing holders

90%   To date, 90% of the total supply has been punched into a black hole

06 Challenges & Opportunities

Opportunities and challenges always coexist. A more objective view of the current and future of DOGEKAKI doge can allow us to make more correct strategies and actions. Long time, DOGEKAKI to real prosperity and further appliDOGEKAKIion, DOGEKAKI itself mode and technology and the underlying blockchain technology, there are many problems to be solved: technical fundamental constraints, business constraints and transformation costs, the overall block chain industry coordination and cannot ignore the supervision, etc.
