

INTRODUCTION

Volt Inu (\$VOLT) is a hyper-deflationary token whose aim is to invest in multiple asset classes such as NFTs, nodes, altcoins, staking & farming of stablecoins. Unlike FaaS projects, this investement diversity allows to mitigate the risk.

UTILITY AND USE CASES *

Utility is at the heart of our considerations as it will drive the gathering of a community, foster the use and ownership of our token, increase the attractiveness and exposure of our token, but above all build a growing ecosystem for the VOLTARMY.

Among the multiple use cases that we have developed or plan to develop, we can mention:

- Partnership with Crypto Cart: this allows any VOLT holder to buy real-world goods from more than 1,700 sellers worldwide. Through this partnership, there is no longer any need to convert VOLT into fiat currency or other cryptocurrencies and no need for KYC to buy goods.
- P2E game: VOLT is also intended to be used as an ingame currency in our game. Not only, the VOLT token will allow to acquire more advanced characters and features giving significant advantages when competing against other players but the VOLT token will also be used as a currency to reward the winners.

- Launchpad/incubator: Given the impressive growth that the VOLT community has enjoyed since its inception, the development of a launchpad/incubator could only create a win-win scenario. Indeed, given the size of the VOLTARMY, it can bring a very interesting input and exposure to new and promising projects. In exchange, the VOLTARMY will be able to benefit from early investments in projects that have been previously approved by the VOLTARMY; the aim being to prioritize quality over quantity. Concerning the utility of VOLT in this tool, only the holding of a certain amount of VOLT tokens in combination with NFTs from our collection will allow access to reserved allocations.
- Gamified social activity: given the involvement of our community members, it was a must to find a mechanism to reward them. This tool incentivizes the involvement of VOLT holders by implementing a ranking and reward system according to the number of tasks completed to increase the exposure and visibility of VOLT. In addition, in order to be eligible for weekly rewards, it is required to hold VOLT tokens.

ROADMAP

STAGE 1

>>>>>

- ▶ Telegram launch
 - ▶ Twitter launch
- Website development
- Contract deployment
- Stealth and fair launch on Uniswap
 - CoinGecko listing
- CoinMarketCap listing
- ▶ Etherscan verification
 - ▶ 1,000 holders

STAGE 2

- ▶ NFTs acquisition
- Nodes acquisition
 - Altcoins trading
- First buyback & burn round
 - ▶ Re-brand
 - Community contests & giveaways
 - NFTs Fractionalizations
 - ▶ FEGEX listing
 - Shibaswap listing
 - Whitepaper release

STAGE 3

- Smart contract audit
 - BSC bridge
 - CEX listings
- Treasury staking & farming
- Global marketing campaigns
- Billboards, celebrities, press releases
 - ▶ P2E game release
 - VOLT Merch
 - ▶ 10,000 holders

STAGE 4

- Dashboard
- ▶ Automated social activity
 - ▶reward system
 - Legal opinion
 - ▶ NFT Collection
 - ▶VOLT-Fiat gateway
 - **WOLTSWAP**
 - ▶Launchpad/Incubator
 - ▶50,000 holders

TOKENOMICS ETH

1% - Reflection

4% - Added to liquidity

4% - Marketing & Development

- ERC20 contract address: 0x3f7aff0ef20aa2e646290dfa4e67611b2220c597
- The total supply amounts (across both ETH and BSC chains) to: 69,000,000,000,000,000,000,000 tokens
- 35% of the liquidity is locked for 1 year on Unicrypt
- The rest of the liquidity is locked forever since it is generated by the 4% liquidity tax of the VOLT smart contract which sends the newly created LP tokens

TOKENOMICS BSC

4% - Marketing & Development

- BEP20 contract address: 0x07EC61Ae90860641972E9B41A706325a1E928BF8
- The total supply amounts (across both ETH and BSC chains) to: 69,000,000,000,000,000,000,000 tokens
- 100% of the liquidity is locked for 1 year on Unicrypt
