

DogPad Finance, Introduction ⋮

DogPad is a cryptocurrency ecosystem built on the Ethereum network with a focus on providing a one-stop-shop for token creation and management on Shibarium network. The main utility of DogPad is the LaunchPad, which enables projects to launch their initial DEX offerings (IDOs). However, the DogPad ecosystem offers a range of additional tools and services to streamline the token creation process

DogPad's LaunchPad is the central hub for projects looking to launch an IDO. The LaunchPad provides an easy-to-use interface for managing the IDO process, including token distribution and fundraising

The utilities provided by DogPad generate revenue, with 70% of this revenue used to buy and burn \$DOGPAD monthly. This helps to maintain the stability of the DogPad ecosystem and provide long-term value for token holders.

We are a comprehensive cryptocurrency ecosystem built on the Ethereum network, offering a range of tools and services to simplify the token creation process. With our focus on revenue generation, buy and burn, and community rewards, DogPad is poised to become a leading player in the crypto space.

Tokenomics

Information about \$DOGPAD token

Official contract:

0x6f3277ad0782a7da3eb676b85a8346a100bf9c1c

DogPad's initial liquidity was burnt and ownership was renounced. A 13.5% vesting lock was implemented from the initial buybacks, with these tokens being used to reward the community during the migration phase to Shibarium.

Type	Info
Contract	0x6f3277ad0782a7da3eb676b85a8346a100bf9c1c
Total Supply	1T or 1,000,000,000,000
Name	DogPad
Ticker / Symbol	DOGPAD

Type	Total
<i>Total</i>	1T (100%)
Initial Liquidity	865b (86.5%)
CEX Listings & Shibarium Migration	135b (13.5%)

DogPad has a 3% tax, with 1% used to increase liquidity pools and 2% allocated to marketing and development. This helps to ensure that DogPad continues to grow and evolve, providing the best possible experience for its users.

Roadmap

A generalized overview of what's been accomplished and what is to come

Phase 1:

- \$DOGPAD Deployment & stealth launch
- Liquidity **burn** & ownership **renounce**
- Telegram** community creation (*closed*)
- #1 Medium: **Twitter** & ideas/goals
- Telegram community opening
- New website & Dashboard V0.1
- CMC & CG Listing
- Community growth; Small organic marketing push (*ongoing*)

Phase 2:

- Website upgrade; V1
- Staking launch
- Bridge launch
- Farming launch
- Locker launch
- Initial CEX Listings
- Website Deployer & TG Deployer
- Launchpad (*with initial features*)
- First marketing campaign
- Launchpad (*full*)
- Shibarium launch: migration to Shibarium

Phase 3:

- Building on Shibarium

NFTs: Doggies

⋮

There are 500 total Doggies, with different rarities & with the same set of utilities on the DogPad ecosystem. After receiving feedback from the community regarding their interest in our ecosystem & their utilities, we have compiled the following utilities for our NFTs

The minting will take place on Wednesday at **22UTC**. 475 Doggies will be sold for **0.05 ETH**. 70% of total **#ETH** will be used to buy & burn & 30% will be used to add liquidity

- **Locker**

Holders of Doggies are **exempted** from paying for the **locker fees**, also having an **unique referral** which makes the locking price **50% cheaper** for developers using his referral. The owner of the referral/Doggie also receives **25%** of the total price as referral payment

- **Contract Deployer**

Holders of Doggies are **exempted** from paying for the **contract deploying fees**, also having an **unique referral** which makes the locking price **50% cheaper** for developers using his referral. The owner of the referral/Doggie also receives **25%** of the total price as referral payment

- **Staking (Gem Presales)**

Doggie holders get a **50% reduction** in the total needed to be staked in order to access the exclusive presales performed on our Launchpad, which are only available for those staking at least **\$2,500 worth of \$DOGPAD**. Those who hold an NFT will be granted this rank after staking at \$1,250

- **Staking (APY Boost)**

NFT holders can access a new staking pool, which has a total **APY of 75%** instead of the basic one with 50% APY

- **Bridge**

There are two ways to be exempted from fees while bridging from Shibarium to Ethereum or vice versa: holding a **Doggie NFT** or holding **100\$ worth of \$DOGPAD**

Launchpad!

DogPad's LaunchPad is the central hub for projects looking to launch an IDO. The LaunchPad provides an easy-to-use interface for managing the IDO process, including token distribution and fundraising.

— Presales:

Developers can create their presales on dapp.dogpad.finance. The creation of presales has a fee, which can be paid on BONE and stored in our marketing wallet through which we would spend 50% on buying \$DOGPAD and burning it (weekly) or they can instead, pay this fee with \$DOGPAD coins, being 50% cheaper and burning them instantly on the same transaction

This fee would be 300\$ in \$BONE or 150\$ in \$DOGPAD

— Gem presales:

Our staking currently has just one level, normal staking with **50% APY**. Before Shibarium we'll have a higher tier, "Master" tier, where holders can stake \$2500 worth of \$DOGPAD in order to get into presales with whitelist without having it, just by holding \$DOGPAD in their locked staking pools

— Contracts:

Developers can create their contracts on our website or our telegram bot. Simple for normies who wouldn't know how to use remix. They can either pay with \$BONE a fee of 40\$ or 20\$ in \$DOGPAD. Same way as the presale, burning \$DOGPAD

Staking

It's easy: **buy \$DOGPAD** and stake it in dapp.dogpad.finance in order to earn **\$DOGPAD passively**. These given \$DOGPAD coins come from the usage of our utilities and from the buybacks done from our team, so it's always healthy

There is no lockup, so you can stake & unstake anytime whenever you wish. The **APY**, yearly rewards, is **50%**

Liquidity Farming

The liquidity farming of \$DOGPAD will be available on the start of the 30.01 - 05.02 week, so stay active on our socials to be updated. You can add liquidity now too!

DogPad offers a platform for creating farming pools, where token holders can add liquidity and generate income from holding liquidity tokens. This creates a win-win scenario for both the project and its supporters.

The screenshot shows the DogPad Finance interface for LP Farming \$DOGPAD. On the left is a navigation sidebar with icons and labels for Home, Staking, Bridge, LP Farming (highlighted), Launchpad, Contract Deployer, Telegram Bot Deployer, and Locker. The main content area features a header with the DogPad Finance logo and the title 'LP Farming \$DOGPAD'. Below the header is a prominent orange button labeled 'Create Your Custom Farming Pool' with a 'Coming soon' badge. A step-by-step guide follows, starting with '1 Add LP \$DOGPAD', which includes instructions to use Uniswap and a note that LP tokens will be staked for rewards on \$DOGPAD. Below this, it states 'Your LP tokens balance is -' and shows two dashed boxes: one labeled 'Continue' and another labeled 'Open Uniswap'. A second step, '2 Stake your LP Tokens (Soon!)', is partially visible at the bottom.

Bridge

DogPad's Bridge is a simple and intuitive tool for bridging tokens between the Ethereum and Shibarium chains. The bridge operates with a low 0.5% fee, which is stored in DogPad's treasury

Holders of \$DOGPAD can enjoy bridging with 0% fee!

DogPad Finance

Bridge \$DOGPAD

CONNECT

This feature will be functional once Shibarium launches. Stay tuned!

Bridge

\$BONE (Ethereum) to \$BONE (Shibarium)

You'll send

Enter value \$BONE

Ethereum Mainnet

BONE (\$BONE)

You'll get

0 \$BONE

Shibarium

BONE (\$BONE)

No fee (only \$DOGPAD holders)

Bridge

Locker

DogPad's Locker is a fast and effective utility for locking liquidity tokens and creating vestings. Projects can pay a fee in \$BONE to use this utility, which will help to differentiate DogPad from other projects in the market.

Every project must lock their tokens & liquidities in a platform. In ethereum, we have Unicrypt or TeamFinance, also Pinksale. In BSC, we have either Mudra or Pinksale. There are hundreds of tokens locked daily, giving an average of 10,000\$ of daily income to Unicrypt, for example

As we grow, more and more people will talk about us, which they already do, and we'll be the main locker of the chain, starting with the lowest fees possible of just 40\$ in \$BONE or 20\$ in \$DOGPAD. From the \$BONE payments, 20\$ would be bought into \$DOGPAD and burnt weekly
