INTRODUCTION:

Fidle is the official token of the Fidle network. It is a better and more efficient payment and reward alternative that is also money in a new way.

It is a digital token that is totally tradeable on global exchanges and can also be exchanged for digital and physical goods and services on the Fidle platform. Shareholders of social media platforms made billions of dollars from user-generated content.

The content creators? They made nothing. Fidle flips the model, and returns the value to the people who contribute the most. Earning cryptocurrency as rewards for each contribution they make.

Fidle token can be stored in a digital wallet, traded, swapped, exchanged and fully decentralized. This is the NO CENSORSHIP platform of the world; totally decentralized and open. Each post, comment, like or multimedia content has an equal opportunity on the Fidle network to be converted into an NFT (Non Fungible Token) and exchanged for Fidle, seamlessly and in real time.

WHAT ARE OUR GOALS?

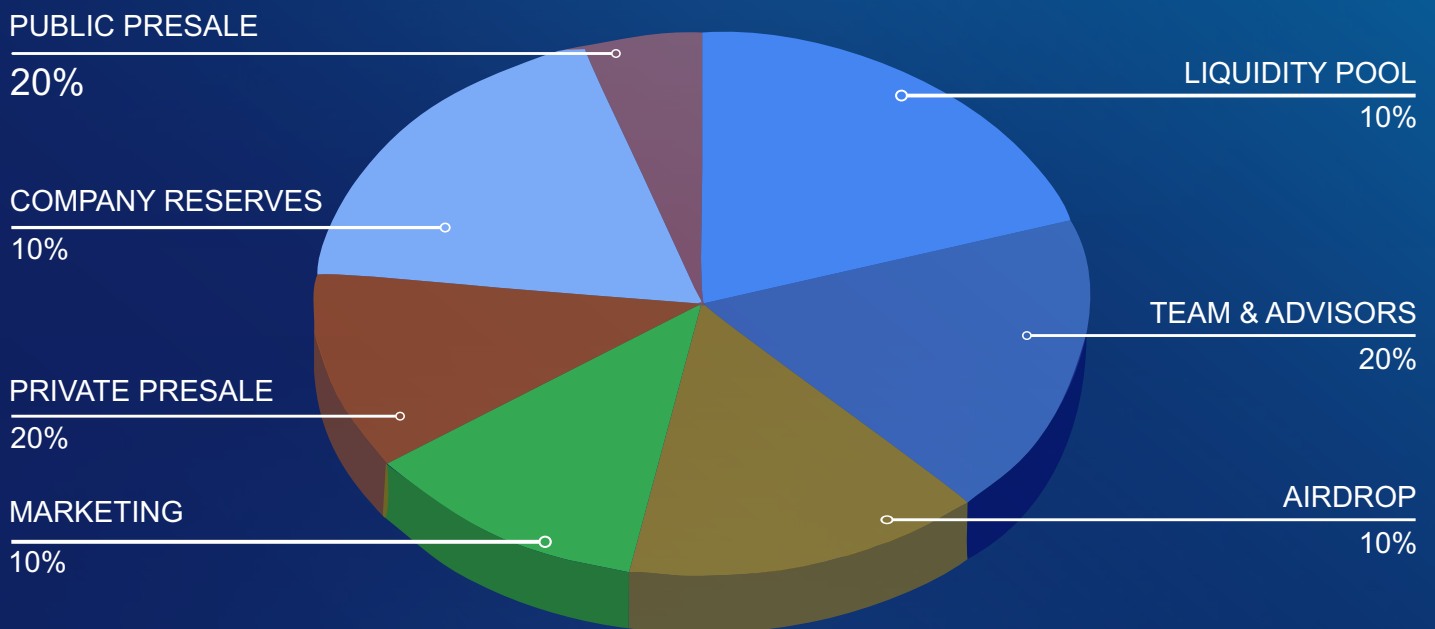

Our goal is to create a totally decentralized social network of communities built on Blockchain technology where people or users can explore their interests, passion and hobbies and earn Fidle token while connecting with loved ones, friends and families and also keeping them in control of their data.

These tokens earned can then be traded, for physical and digital goods on the fidle platform.
