WOID BRC20

Introduction

Introduction As the only credential of World ID Ai on Bitcoin Ordinals, WOID plays a very important role. Firstly, WOID is a governance credential in the World ID Ai ecosystem. Users holding WOID can participate in the governance and decision-making of the ecosystem, ensuring fairness and transparency. Secondly, WOID can also be used for transactions and payments in the World ID Ai ecosystem, providing fast, convenient, and secure transaction methods. In addition, WOID is also a value scale in the WorldCoin Ai ecosystem, reflecting the value and development potential of the ecosystem. The limited issuance of WOID ensures the scarcity and security of the token. In summary, as the only credential of World ID Ai on Bitcoin Ordinals, WOID has important value and functions, providing strong support for the development and progress of the ecosystem. In addition to the above important functions, WOID also has an important incentive function. WOID holders can participate in the WorldCoin Ai ecosystem through pledging, voting, and other methods to receive World ID rewards, promoting the development and growth of the ecosystem. Moreover, WOID can also serve as a credential in the World ID Ai ecosystem, which can be used to access and use other DApps, such as accessing, publishing, and purchasing data. In summary, the multiple functions and roles of WOID will provide more extensive and in-depth support for the development and progress of the World ID Ai ecosystem.

Roadmap

WOID is committed to becoming the most popular digital economy project on the BSC chain. To achieve this goal, we will continuously innovate and launch more diverse and innovative digital economic products and applications, providing users with more comprehensive digital economic services.

Q1, Identity System

We will launch a global digital identity authentication system, aiming to provide users with more secure and reliable identity authentication services. The system will adopt the most advanced blockchain technology and encryption technology to ensure the best protection and security of users' identity information.

WOID will launch a global digital identity authentication system based on the BRC20 protocol to achieve digital identity authentication and management. The system uses blockchain technology and encryption technology to ensure the best protection and security of users' identity information.

Specifically, users can register and generate their own digital identities through the WOID platform, which will be stored on the blockchain. Users can use their digital identities for various online transactions and services without the need for identity verification every time. Digital identities use encryption technology and distributed storage to ensure the best protection and security of users' identity information.

In addition, the WOID digital identity authentication system also supports users to independently manage their own digital identity information, including personal information, transaction records, etc. Users can choose to share their identity information with other platforms or individuals to achieve multi-scenario applications of digital identity.

By using the BRC20 protocol, the WOID digital identity authentication system will achieve more efficient, secure, and transparent digital identity authentication and management, providing users with more convenient, secure, and reliable digital identity services. At the same time, the BRC20 protocol also supports smart contract functions, which can add more application scenarios and functions to the digital identity authentication system.

Q2, Insurance Services

We will launch a global digital asset insurance platform to ensure the security of users' digital assets. The platform will provide comprehensive digital asset insurance services for users, covering various types of digital assets, providing users with more comprehensive protection for their digital assets.

The digital asset insurance platform will provide the following insurance services:

Contract risk insurance: Protects users from asset losses caused by contract vulnerabilities, security issues, etc. when using smart contracts.

Wallet risk insurance: Protects users from asset losses caused by wallet theft, password leakage, etc. when using digital wallets.

Transaction risk insurance: Protects users from asset losses caused by hacker attacks, fraud, etc. in digital asset transactions.

Other risk insurance: The platform will also provide corresponding risk insurance services for other digital asset usage scenarios, such as ICO, STO, etc.

Users can use WOID tokens to purchase corresponding insurance products. During the insurance period, if the user incurs losses due to behaviors such as contracts, wallets, and transactions that have been evaluated and approved by us, we will provide full compensation. At the same time, the platform will also provide online claims services to enable users to receive compensation in a timely manner when they suffer digital asset losses.

The WOID digital asset insurance platform will provide users with more comprehensive digital asset protection services, providing guarantees for the safe use of digital assets.

Q3, Investment and Financial Management

We will launch a global digital asset investment platform to enable users to make digital asset investments more conveniently. The platform will provide users with diversified digital asset investment choices, as well as rich investment tools and services to help users achieve better investment returns.

We will adopt various digital asset investment strategies, including stable investment strategies, value investment strategies, etc., to achieve asset preservation and appreciation of digital assets. At the same time, we will strictly control investment risks to ensure the security of users' digital assets.

We will provide users with the following secure digital asset financial management products:

Stable Value-Added Digital Currency Financial Management Products: Use a stable digital currency investment strategy, mainly investing in low-risk digital currencies to achieve asset preservation and appreciation.

Value Investing Digital Asset Financial Management Products: Focus on value investment as the core strategy, select digital assets with good performance and potential through in-depth research and analysis of digital asset fundamentals to achieve asset appreciation.

Fixed-Income Digital Asset Financial Management Products: Invest in low-risk digital assets using fixed-income investment strategies to achieve asset preservation and appreciation.

Users can choose the digital asset financial management products that are suitable for them for investment, and we will ensure the security of users' digital assets through strict risk control and investment strategies. At the same time, we provide full risk assessment and investment advice to help users make wiser investment decisions.

WOID's secure digital asset financial management products will provide users with more secure and reliable digital asset financial management choices, providing guarantees for the preservation and appreciation of users' digital assets.

Users can choose the digital asset financial management products that suit them for investment, and we will ensure the security of users' digital assets through strict risk control and investment strategies. At the same time, we provide a full risk assessment and investment advice to help users make wiser investment decisions.

WOID's secure digital asset financial management products will provide users with more secure and reliable digital asset financial management choices, providing guarantees for the preservation and appreciation of users' digital assets.

Q4, WEB3 Social Networking

A decentralized architecture will be adopted for the social networking platform based on WEB3 technology, where users will have control over their own data to ensure privacy and security. Additionally, smart contract technology will be utilized to automate the management and operation of the platform, ensuring fairness and transparency.

Our WEB3 social networking platform will offer the following features:

Social Identity: Using WEB3 identity verification mechanism, users can establish their own decentralized identity to safeguard their privacy and data sovereignty.

Social Network: Users can build their own social network on the platform and communicate with friends, family, colleagues, and others.

Social Content: Users can post various forms of social content such as text, images, and videos, to share their lives and thoughts with others.

Social Trading: Users can conduct decentralized digital asset trading on the platform, such as buying, selling, exchanging digital assets, etc.

We will launch a global WEB3 digital social networking platform that allows users to communicate and interact better. The platform will be based on blockchain technology, providing users with more secure, decentralized, and anonymous social services, enabling users to express themselves more freely and establish closer social relationships.

Q5, Artificial Intelligence Services

WOID will launch digital asset trading services based on artificial intelligence technology, using multi-dimensional data such as big data, the latest market trends, fund flows, K-line trends, etc., to provide predictions of future trends and quantitative trading strategies for mainstream market tokens.

Digital asset trading services based on AI technology will use technologies such as deep learning and machine learning to analyze and mine massive digital asset trading data, establishing comprehensive, accurate, and real-time market data models.

For different digital assets, we will use different prediction models and quantitative trading strategies to provide users with more accurate predictions and optimized trading strategies. We will monitor market trends and digital asset trends in real-time, provide real-time trading recommendations and risk alerts, and help users make wiser investment decisions.

Our AI digital asset trading services will provide the following features:

- Digital Asset Market Analysis:** Analyzing and predicting multi-dimensional data such as price fluctuations, trading volume, and market capitalization of mainstream market tokens, helping users understand market trends and trends of digital assets.
- Quantitative Trading Strategy:** Using machine learning and deep learning technology, and real-time docking with digital asset trading platforms, providing users with quantitative trading strategies to achieve efficient trading and value preservation and appreciation of digital assets.
- Risk Control and Warning:** By monitoring market trends and digital asset trends in real-time, providing real-time trading recommendations and risk alerts, allowing users to conduct digital asset trading with peace of mind.

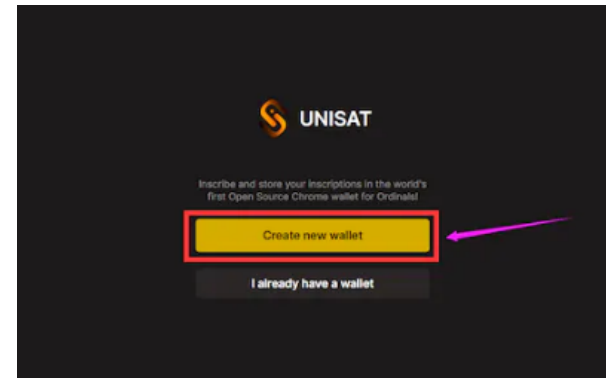

Our AI digital asset trading services will provide users with more comprehensive, accurate, and real-time market data and trading strategies, helping users achieve value preservation and appreciation of digital assets.

Terms of Use

Welcome to our WOID Ai website! Before using this website, please read the following terms and conditions carefully:

Acceptance of Terms and Conditions

By using our website, you indicate that you accept these terms and conditions and agree to be bound by them. If you do not agree with any part of these terms and conditions, please do not use this website.

Service Description

To use our services, you must have a digital wallet. We do not provide digital wallets, and you must register and create a digital wallet on another platform.

Terms of Use

When using our services, you must comply with the following terms:

- You may not use our services for illegal activities or fraudulent behavior;
- You may not attack, damage or attempt to hack our services;
- You may not abuse our services, for example, by sending spam emails or other meaningless information;
- You may not post any illegal, obscene, defamatory, abusive, threatening, discriminatory, or other harmful content;
- You must comply with all applicable laws and regulations.

Security

We strive to ensure the security and stability of the website but do not guarantee its complete security. You should take reasonable measures to protect your account and computer system, such as protecting your password and using security software.

Legal Liability

You must comply with applicable laws and regulations and may not use this website for any illegal activities. We reserve the right to restrict or terminate your access to this website in accordance with applicable laws and regulations.

Disclaimer

We are not liable for any direct or indirect losses incurred by your use of this website. We reserve the right to limit or terminate this website in accordance with applicable laws and regulations.

Privacy Policy

We will comply with applicable privacy laws and regulations and take reasonable measures to protect your personal information. Our privacy policy can be found on our website.

Intellectual Property

This website and all its contents are protected by copyright and other intellectual property laws. You may not use or copy this website or any of its contents unless you have our express authorization.

Modification and Termination of Service

We reserve the right to modify or terminate our services at any time without prior notice to you. We may limit your access to the service or require you to stop using our service if you violate these terms or applicable laws and regulations.

Thank you for using our WOID Ai website. If you have any questions, please feel free to contact us.

Privacy Policy

Welcome to our WOID Ai website! Before using our website, please read the following privacy policy carefully:

Information We Collect

When you use our website, we may collect the following information:

- IP address: We may record your IP address to identify your computer and provide services;
- Browser type and version: We may record the type and version of the browser you are using to optimize our website;
- Operating system: We may record your operating system type to optimize our website;
- Cookies: We may use cookies to collect information about your visits and usage of our website. Cookies are small text files that are stored on your computer or mobile device;
- Device information: We may collect information about the device you are using, such as the unique device identifier of your mobile device.

How We Use Your Information

We may use your information to provide and improve our services, including but not limited to the following purposes:

- Identify your location and provide specific services;
- Optimize our website;
- Send communications about our services and products;
- Prevent fraud and security issues;
- Comply with applicable laws and regulations.

How We Share Your Information

We may share your information with the following third parties:

- Service providers: We may share your information with third-party companies that provide services to us so that they can provide services to us;
- Legal requirements: We may share your information in accordance with applicable legal requirements, regulations, or legal proceedings;
- Merger or acquisition: If we are acquired or merged, your information may be transferred to the new owner.

How We Protect Your Information

We will take reasonable security measures to protect your information, including but not limited to:

- Using encryption technology to protect your information;
- Limiting access to your information;
- Regularly monitoring our systems for potential security vulnerabilities.

Your Rights

You have the right to access, correct, and delete your personal information. If you wish to exercise these rights, please contact us through our website.

Changes and Updates

We may update this privacy policy from time to time. We encourage you to check this page regularly for any changes we make to this privacy policy.

Thank you for using our WOID Ai blockchain website. If you have any questions, please feel free to contact us.
