

HXM - Here is the Future

Cryptocurrency has a demonstrated ability to change the world as we know it. In recent years, cryptocurrencies have made peer-to-peer currency trading easier than ever. Now, we believe it's time to harness cryptocurrency's capabilities to change the way we do business.

What is HXM Coin?

HXM Coin is a decentralized utility token built on Ethereum (ERC-20) blockchain. The coin is designed to be as accessible and user-friendly as possible so that users worldwide can make safe and convenient transactions daily.

Like other cryptocurrencies before it, HXM Coin aims to eliminate the issues associated with traditional currencies. Thanks to blockchain technology. By using decentralization, the HXM coin effectively erases borders between cryptocurrency traders.

About HXM Coin:

Token Name:	HXM Coin
Token Ticker:	HXM
Token Platform:	Ethereum Blockchain
Token Standard:	ERC20
New Smart Contract:	0x069f967be0CA21C7D793D8C343f71e597D9a49b3
Max Supply:	4,450,000,000
Burned:	300,000,000
Total	4,150,000,000
Old Smart Contract:	0xec1b7eb3d3cfac7027fa60b5376e5eadef4f1300 *
Max Supply:	100 Billion
Burned:	95.55 Billion Total
Total:	4.45 Billion
* Smart Contract has been replaced by a new one as per CertiK Audit Report.

How Does HZM Coin Work?

HZM Coin runs on Ethereum blockchain, which secures transactions by storing them in ledgers and distributing them across various networks; this makes the currency virtually immune to hacking or interference. The coin is much safer than conventional currencies due to the lack of a single point of contact (typically found in computer-based storing systems used by banks.)

HZM Coin's decentralized blockchain system spreads information across several different 'decision makers' who must all agree that a transaction can move forward. This method creates more privacy because no single entity or person has access to all of your information. The process also makes information harder to track, and thus, more difficult to meddle with.

HZM Coin's peer-to-peer decision-making process offers users a more reliable alternative to traditional coin transactions by protecting anonymity and increasing security. Transactions are recorded at multiple locations and by more than one person. Ultimately, decentralization makes for safer and easier transactions that aren't subject to third-party fees.

What does HZM mean?

HZM "Hazam" stems from the Arabic word for "firmness." The name represents HZM's integrity and commitment to improving safety and well-being worldwide.

Why the Camel?

The camel emblem signifies a long journey, recouping your energy and the ability to persevere in the face of life's challenges. In a broader sense, the emblem represents the potential to overcome adversity and create positive change.

Our Projects:

HZM is backed by many unique projects as refereed below.

Crypto Souq - Crypto Souq is a platform powered by HZM Coin that makes it simple and secure for assets, goods and services to be purchased, sold and rented using crypto currencies. This platform gives users the ability to exchange value, digitally, from person to person ("P2P"), quickly, securely, and efficiently without the need to use third parties. Crypto market is a new business model that transitioning the way we use our crypto, in other word we are not creating a new business model; we are transitioning an entire global Industry.

Camel Sport - Play your favorite sports and earn crypto.

Nemo Land Kingdom - We are building our Metaverse. Nemo Land Kingdom can be described as a place where users can interact, connect, and exchange information. Besides transferring belongings, users may also trade items in this realm.

Mejhool - Mejhool is built on Web 3.0 (third generation of internet services). Built on Decentralized networks which will potentially give you the power over your profile and data. Web 2.0 gives centralized institution the ability to own you and your data. Mejhool is the Arabic name of anonymous which gives the user total privacy over their profile and data.

HZM Basketball - HZM Basketball is a fun game, where any user can compete with all over the world. Tap to score and watch out for the time.

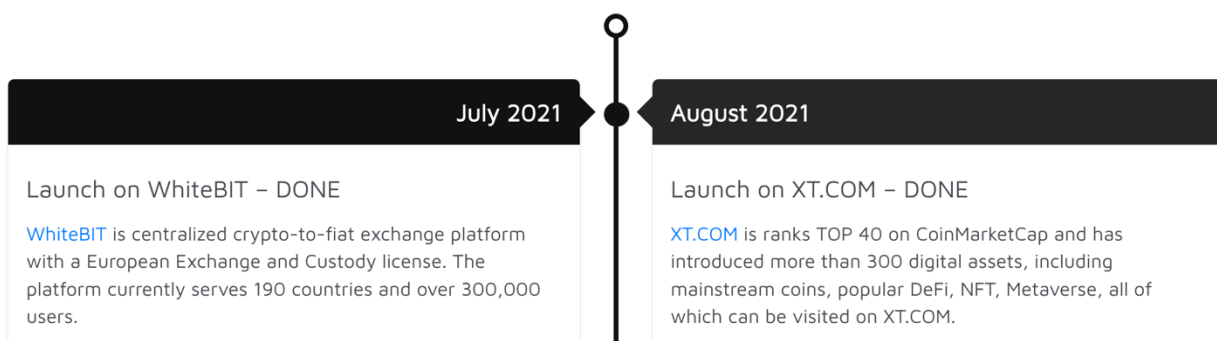

HZM Carrom - HZM Carrom is easy to play a multi-player game. This will give you the experience of playing with a real carrom board. The physics and animation of the game are exceptionally good and it feels like you are playing with a real-life Carrom board. Get ready to pocket the coins & Queen and score as much as possible.

Why and Where can I buy HZM?

HZM Coin will only be available on centralized exchanges from HZM team. To prevent any inappropriate, scam or unknown transactions. We are keen to make HZM the most transparent cryptocurrency that is available on the market. Thus, the number of wallets/holders will not be as much on etherscan, as most of the holders will be under the umbrella of the centralized exchanges.

Roadmap:

Accomplishments: HZM Coin has hit a number of milestones in just a short time, including integrating the coin with online gaming platforms and donating to charitable organizations. Below is just a glimpse of what HZM Coin has accomplished so far.

October 2021

HZM Company – DONE
Establish HZM Company in Cayman Island.

October 2021

Burn 80 Billion HZM – DONE
HZM did a burn of 80% (80 Billion HZM coin) of the total supply.

November 2021

Burn 15 Billion HZM – DONE
HZM did another burn of 15% (15 Billion HZM coin) of the total supply.

November 2021

Hidd Club Sponsorship – DONE
HZM Sponsored Futsal Team.

December 2021
