

# Upgrade NU & KEEP to T

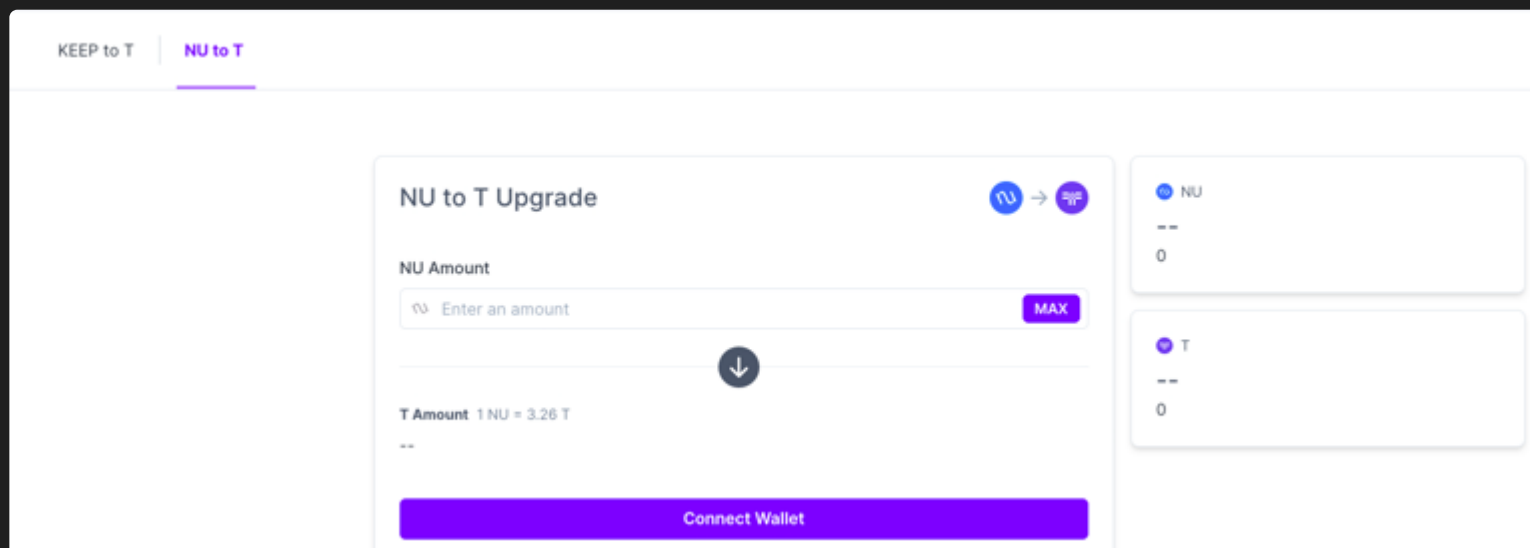

NU and KEEP tokens can be upgraded to T tokens via the Vending Machine contracts.

As decided by the NU and KEEP communities in the [final merge proposal](#), the conversion ratio for each token is based on the total supply rather than price. The final total supply of NU is ~1,380,688,920 and the total supply of KEEP is ~940,795,010.

As a result, the token factors are:

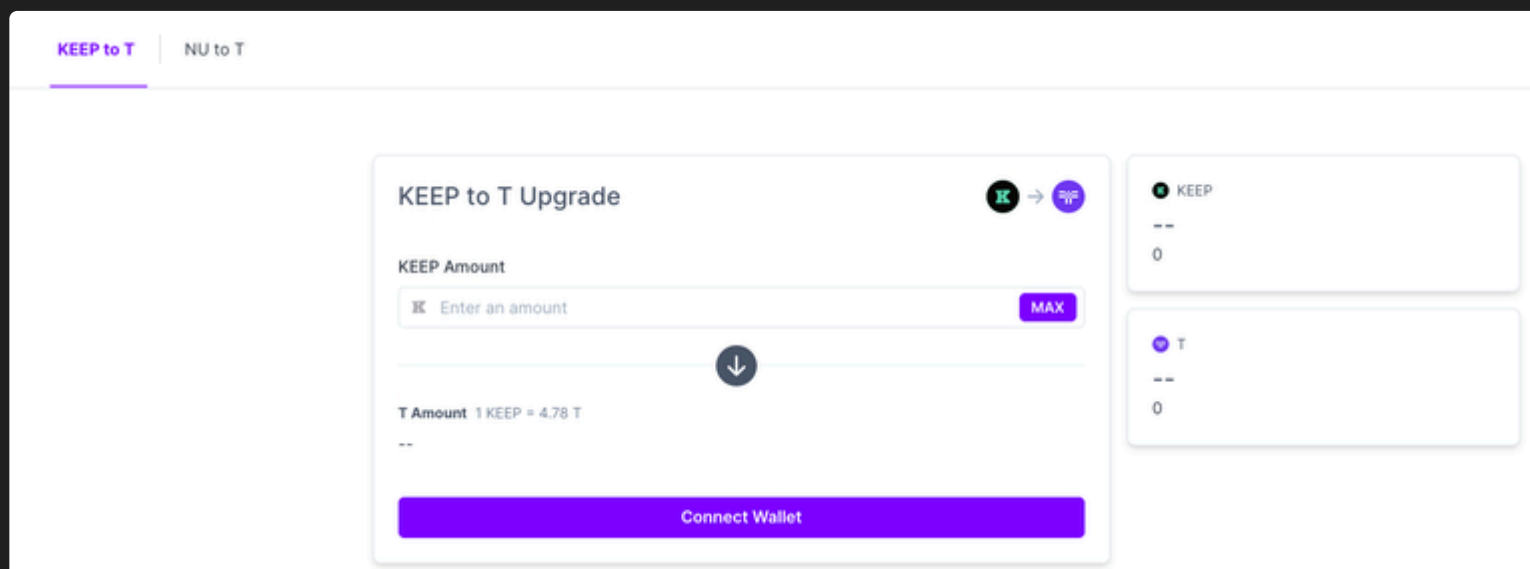

- 1 NU: ~3.26 T
- 1 KEEP: ~4.78 T

Token upgrades can be performed via the [Threshold Dashboard](#) which interfaces directly with the Vending Machine smart contracts.

The screenshot shows the 'NU to T Upgrade' interface. At the top, there are two tabs: 'KEEP to T' and 'NU to T', with 'NU to T' selected. The main area contains a form with the following elements: a title 'NU to T Upgrade' with a conversion icon (NU to T); an input field for 'NU Amount' with a 'MAX' button; a downward arrow; a 'T Amount' section showing '1 NU = 3.26 T'; and a 'Connect Wallet' button. On the right side, there are two panels: the top one for 'NU' with a minus sign and '0', and the bottom one for 'T' with a minus sign and '0'.
