We’re Migrating the CFG Token

Announcements May 20, 2025

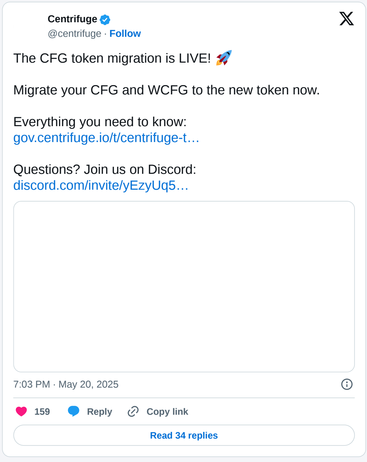

By Graham Nelson, Senior Product Manager, Centrifuge

Centrifuge V3 is moving entirely to Ethereum as a native EVM deployment, bringing full cross-chain composability, modular fund structures, and a host of new features.

The migration was approved by the DAO via proposal CP149 and is the next confirmed milestone in Centrifuge’s roadmap.

To align governance and utility with the upgraded protocol, the existing Centrifuge governance token (CFG) and its ERC-20 wrapper (WCFG) will be consolidated into a single ERC-20 CFG token on Ethereum.

With a native token on Ethereum, CFG becomes simpler for users and stronger for the ecosystem. If you’re a current CFG holder, here’s what you need to know ahead of the migration.

Key dates

May 20, 2025

- New CFG token contract goes live
- Self-service migration **opens**

November 30, 2025

- Deadline to complete migration
- Migration window **closes**

How to migrate

If you hold CFG on Centrifuge Chain

- Migrate 1:1 to the new CFG on Ethereum
- Visit https://app.centrifuge.io/#/portfolio/migrate/cent
- Connect your wallet and follow the on-screen instructions to convert your CFG tokens to the new CFG token on Ethereum.

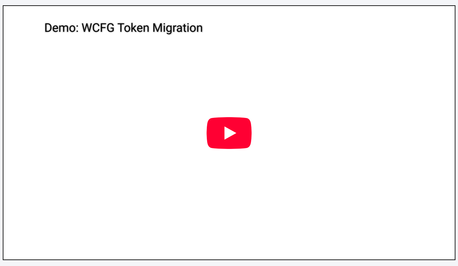

Estimated time: ~20 minutes

If you hold WCFG on Ethereum or Base

- Swap 1:1 to the new CFG on Ethereum
- Visit https://app.centrifuge.io/#/portfolio/migrate/eth
- Connect your wallet and follow the instructions to swap your WCFG for the new CFG token.

Estimated time: ~atomic
