BLOCKCHAIN GENERATION COMMUNICATION PLATFORM

CONTENTS

▼INTRODUCTION

The world is changing rapidly due to Covid-19, privacy issues with widely known applications demand a new approach, and in response blockchain technology is being integrated as a solution.

On a massive scale, this world is in need of a secure communication platform for business, school, and private meetings.

Vaiyo delivers a fully intuitive solution with all the needed features.

▼PROBLEM

In this era of digital meetings, you need an application that is secure, easy to use, and affordable. But you can not find a conference application that combines all these features on the current market.

The result is that people, schools, and companies use multiple applications, use knowingly unsafe applications or spend a lot of money for applications that are not even the right fit.

▼ TECHONOLGY

Open source code of BigBlueButton is used.
The security is already enhanced.
Audio, video, and screen sharing, WebRTC libraries
transmit real-time protocol packets (RTP) over user
datagram protocol (UDP) via Datagram Transport Layer
Security (DTLS), and media packets are encrypted using
Secure Real-Time Protocol (see SRTP). This all adds up to a
high level of built-in security for streaming.
Face filter (AI software to enhance face image) and
background separation through SDK.
Future development is encryption by unhackable
blockchain technology.

▼ WHO IS VAIYO?

We are a startup creating a safe and intuitive
Communication Platform. Paid by the profit of the own
cryptocurrency VAIYO token and gives the option to the
user to invest in Vaiyo with the potential to get a high
return on investment after listing of the token.

▼OVERVIEW

Pandemic showed us that businesses need to embrace a holistic digital approach. Internal communication platform helps companies to streamline workflow and increase productivity of employees. Every exchange of information should be delivered at the right time and to the right recipient.

Internal communication platform helps companies to streamline workflow and increase the productivity of employees. As a result we receive:

- Faster response time to problems
- Increased employee contribution
- Reduce Retention Issues

Not only does internal communication help you steer the narrative about crisis situations, but it also supports short and long-term crisis management.

With Vaiyo organizations will be able to increase internal communication satisfaction and it will allow to do Crypto Payments in a videocall knowing for sure to who you are paying.
