## What is Gacrux.io?

Any artistic work that can be copied by others can be converted to NFT format and sold in a unique way; or  
It is a unique blockchain-based experience that you can rent.

## What does Gacrux.io do?

Artists will be able to bring their unique works of art (movie, music, sitcom, game, visual) to art lovers by paying very low commissions.

## GACRUX.io Benefits

You can sell your blockchain-based NFT projects from anywhere in the world without sharing your personal information.

A large community where seller and buyer meet.

Airdrop events, lottery, events and attractive stakes

Fast and secure shopping.

Low commission rates. Zero transfer fees thanks to the RUX network to be created in the future.

## Basic Concepts

**RUX DEX** : Where users can use automated market generation ("AMM") mechanisms to exchange between FTs and NFTs on the same or cross chains.

**RUX WALLET** : A simple wallet to store all your assets like cryptocurrency, RUX and NFTs.

**RUX Reward System**: There will be many reward systems for users, such as trade reward, referral, airdrop, lottery, NFT launchpad, to increase user interaction in the marketplace ecosystem.

**RUX TOKEN** : Functions as the native currency of the platform and can be locked in the liquidity pool as well as NFT trading or leasing.

# How will RUX tokens be used?

Rental Campaign

Voting

Rewards

Airdrops

Games

Events

Staking

NFT Collateral

RUX tokens offer buyers a share in music royalties. These groundbreaking NFTs will generate monthly royalties and increase in value as an artist's career progresses. ( For music )

NFT trading will continue to be completely dependent on the RUX token.

No commission will be charged on NFTs sold in the first four months following the activation of the sales platforms.

Very attractive commission rates will apply after the fourth month.

Unlike its GACRUX.io counterparts, it will offer rental opportunities for all your NFT projects covering a certain period of time.

Minimum rental for NFT Projects is 15 days and maximum rental will be limited to 6 months. (The leased NFT will be protected against resale or lease.)

## What are the goals of GACRUX.io?

GACRUX.io; It is a unique platform that allows you to sell or rent your movies, music, games, visuals, series and more NFTs you produce, thanks to the RUX token.

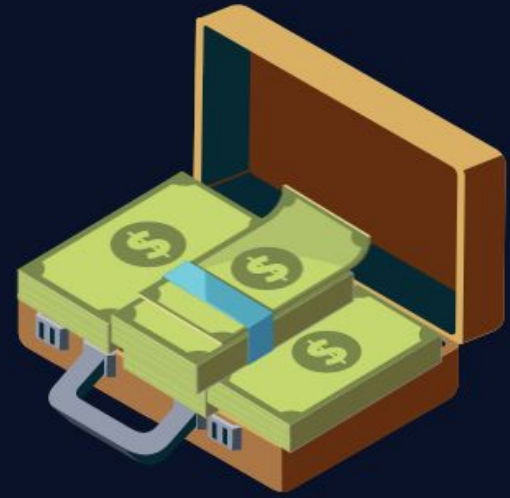

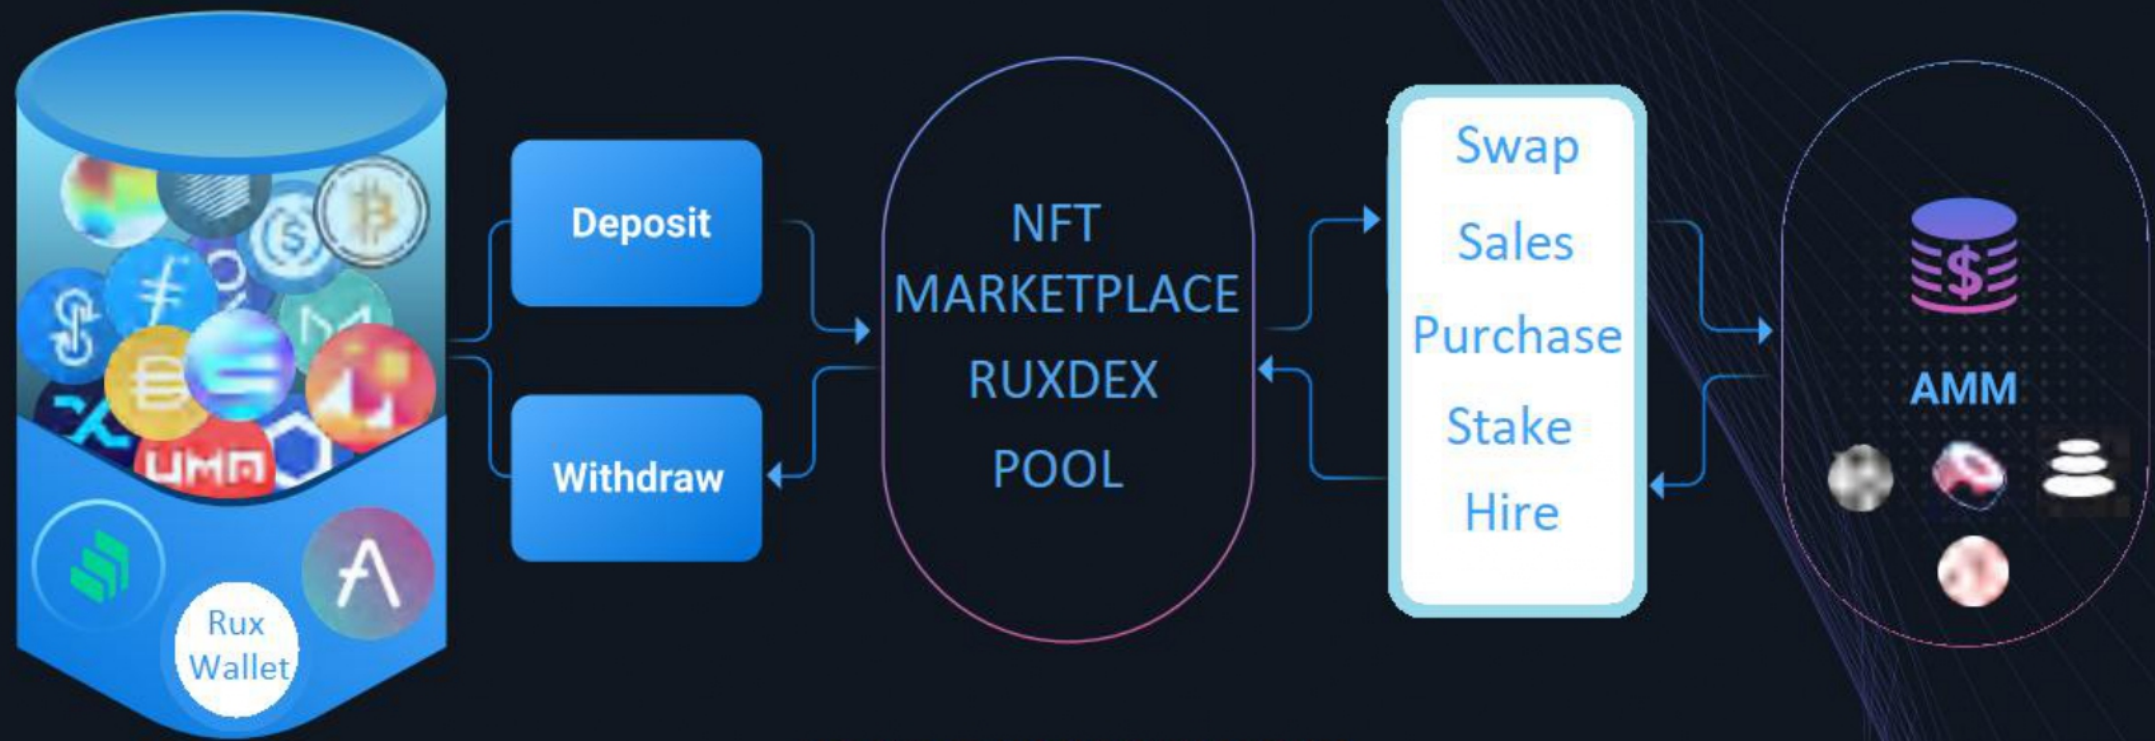

Investors be able to anonymously trade NFTs and exchange with other supported crypto assets thanks to RuxDex and Rux Wallet.

Investors will also be able to benefit from attractive staking rates using RUX tokens.

They can earn extra income by keeping investments in RUX piggy banks.

HOW GACRUX WORKS

## INTRODUCTION

Gacrux.io describes itself as a unique experience where cinema, film, game and art are reshaped.

The current team came up with the idea of Gacrux in 2020 and did market research and some technical work for it.

Our team studied different platforms.

The platform will be built on Solana and Binance Smart Chain(BEP-20) and then ERC-20 blockchains.

The team predicts that the near future will belong to NFTs.

GACRUX is a decentralized arts, gaming and cinema platform built on the Solana&Binance Smart Chain(BEP-20) and ERC-20.

## MARKETPLACE

Decentralized ownership allows users to create and trade their own assets within the platform and earn extra income from the pool thanks to attractive staking rates.

(This marketplace is blockchain-based and ownership belongs to everyone involved.)

Rental: Unlike other NFT Marketplaces, you can rent the product you create or own for 15 days - 6 months.

Your leased NFT products can't be leased again until the lease term expires. The temporary new owner can't sell the leased NFT product, but it is may lease again for a lower period. With the GACRUX leasing feature, NFT aims to increase the popularity of products while increasing their value.

When the rental feature is active, the rental commissions will be as follows.

15-20 days (6.5%) (Your NFT product will be returned to your inventory as of 00.00 UTC on the day you specify.)

20-30 days (4%)

30-60 (3.25%)

Sales: GACRUX Marketplace will not charge any commission for buying and selling for the first six months of its activity.

Then 0.05% for buy orders, 0.1% for sell orders it aims to earn commissions.

Collection Spool : Thanks to the NFT collection event, 50% of the 2 million RUX tokens allocated for the Event will be distributed. In the first 12 months of collection campaign, our team will distribute RUX tokens to those who successfully complete the NFT collection. Also attractive staking it will open its participation in a RUX pool that has opportunities and will be opened for limited people.

Reference Awards : Referral awards are the same rate and 10% for the inviter and the person who is invited during the Seed Sale. This coverage is limited to 4 million RUX allocated.

Referral rewards will not be valid on Private Sale A , Private Sale B and Public Sale.

GACRUX will also enable a decentralized forum. Users will discuss platform activities, understand the upcoming voting schedule within the decentralized system.

(organization, search for new friends, suggestions, etc.)

**Blockchain Architecture:** Blockchain technology is used to record the ownership of tokens and allows owners to transfer/sell/use/rent/buy them without restriction. Ensure the asset can't be changed without owner permission.

Solana for RUX;

BEP-20 for RUX;

ERC-20 for RUX;

ERC-1155 and ERC-721 for the Digital Assets storage and trading.

**The RUX Token**

The RUX token is the native currency on the platform and is reflected as a Solana, BSC (BEP-20) and ERC-20 token.

On the NFT platform of token holders allows active trading.

There is a fixed supply of RUX tokens.

There Are Several Utilities of the RUX Token

It can be used for payments between collectors, creators and art lovers.

NFT products can be purchased from the ecosystem using RUX tokens. NFT products can be rented or sold.

Solana & ERC20 & BEP20 Compatibility

Solana stands out as a shining star. Its secure substructure and ever-growing ecosystem have Gacrux NFT Marketplace to be included in the Solana ecosystem.

Binance Smart Chain act as the second layer for other blockchains and has features for moving tokens between ERC20 and the Binance Smart Chain.

It will be a bridge to move the RUX token back and forth between the Binance Smart Chain and ERC-20 so that platform users can exchange ERC20 to provide liquidity.

One advantage of decentralized ownership is that they can be traded in markets outside the influence of companies. All trading is built on the blockchain for all digital confirmations transactions.

The RUX token can be exchanged for a Solana and BEP-20, but items and item ownership can also be transferred to other blockchains such as ERC-20.
