INVEST TODAY IN TOMORROW'S VISION

Whitepaper

TABLE OF **CONTENTS**

Abstract

Avoteo first of all is "a vote"

The vision is to create and provide a platform that connects the best elements of four different exiting areas.

CROWD FUNDING

CRYPTOSPACE

SOCIAL MEDIA

FINANCE

Did you always have this great idea, but never made the step to get started because banks or other investors do not see the fire behind the project?

Avoteo provides you a platform to reach thousands of potential investors. The best thing is: they don´t give you their money – they only give you their voice.

Present your idea, convince our community, gather likes and be one of the most voted projects.

Make it to the top, and we will fund your project out of our funding pool.

Introduction

We live in a digitalized world. Daily we make an impact by simple mouse clicks, or by a tap on a screen. Next to the physical world we build online networks and we interact with people from all over the globe. We share our opinions and visions with everyone who is willing to listen.

We make friends, discuss movies or the news, and we play video games online with people that we may never meet in person. We are able to create whole online communities based on shared interests, opinions, or goals and dreams. We decide what is good and what is bad using the power of numbers, like and dislike buttons, and other rating systems. Online voting represents a form of democracy in its purest form, no secret meetings behind closed doors, no personal gains and competing interests, simply the power of the people giving directions.
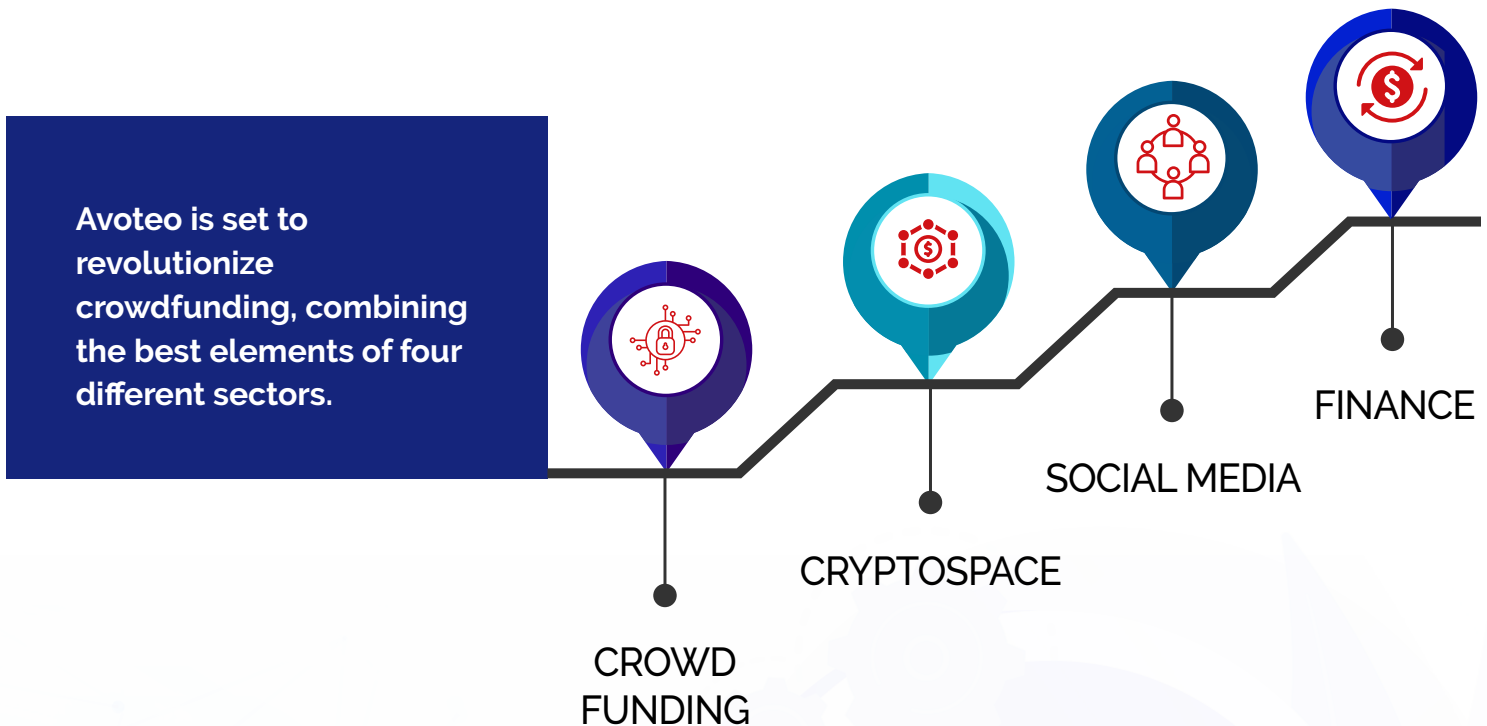

Whereas a few decades ago the dream was to find a steady job and work there for the rest of your life, the more recent generations want to do things differently. Next to making money to live, they want to enjoy their occupation; working on the same job is usually not seen as an appealing future. Not many still dream of working for a boss until they are too old to really enjoy their lives to the fullest. There is a whole movement that aims to become financially independent and retire early (https://en.wikipedia.org/wiki/FIRE_movement). Many find better ways to make a living, some start their own companies, some become skilled traders on the crypto or stock markets, and others just make videos that other people like to watch. There are countless examples of how creativity combined with the advantages offered by the digital world led to great successes.

One could argue that our financial system is broken, negative interest rates (unless you are the one that is borrowing the money), inflation, wealth gaps depending on where you were born. It is not strange that there is an increasing interest of the public for stock trading and cryptocurrencies. Our team does not believe in the old-fashioned financial system, where only the rich can have the means to pursue their goals. We don't believe in a system where grey suits get to decide which ideas are good and should get a chance to make, it and which ideas get moved to the trash bin. We believe that a diverse community consisting of many unique minds, with different backgrounds and different experiences and expertise, are much more suited to make such decisions.

Times have changed, interaction has changed, and many dreams have changed. Avoteo is a project that aims to make a large impact on the world and on the lives of everyone involved in the project. We aim to build a community where creative people with good ideas get the chance to receive funding to make their ideas a reality. It will be the community that decides which ideas are worth pursuing, and it will be that same community that will also reap the rewards if the ideas succeed. Avoteo is set to create an ecosystem where everyone benefits from everyone, we will not only help to fund the best ideas, but we also aim to create a community with people with diverse experiences that can help to make those ideas and dreams a reality. Each project funded by Avoteo that succeeds will be a success of the whole community. Avoteo is here to make dreams come true.

Goal and vision

Avoteo is set to revolutionize crowdfunding, combining the best elements of four different sectors.

CROWD FUNDING

CRYPTOSPACE

SOCIAL MEDIA

FINANCE

We will create a revolutionary platform that can be used by our community. The main goal is to collect ideas and to generate the funds to bring them to life. We will rely on the power of the community to judge which project ideas are most likely to succeed.

But we will also facilitate making use of each other's skills and experience to make concepts into reality. We want to be a place where ideas can be discussed freely and where dreams can become reality.

We developed a system that, with time, will become self-sustaining, as the revenues generated by projects that become successful will flow back to the community and the Avoteo ecosystem.

Success stories will generate more funding, which will generate more success stories and all will benefit the entire community.

We strive to be a project that is governed by its own community, your vote will not only decide which projects receive funding, but also how the Avoteo project will develop as a whole. The next revolution in crowdfunding is here!

Avoteo platform

Several crowdfunding platforms on the Internet have the same goal. They try to give a chance to new ideas. Why do we need another one? Why does the world need **AVOTEO**?

The answer is quite simple:

Avoteo is entertaining, Avoteo is free of charge, Avoteo brings you financial benefits while it doesn't cost you anything.

FUNDING COMPETITION PARTICIPANTS BENEFITS

On this platform any Avoteo holder can present their ideas, this can be through articles, videos, posters, or whatever way the creator choses. There will be no additional fees required, other than holding a minimal required amount of Avoteo tokens. However, there will be possibilities to give a project more exposure by booking special promotion packages. That doesn't mean that the paid ideas will win the voting. Here creativity is required, just like on social media platforms. The key is to be seen. Each project will have its own space within the Avoteo platform, where the creators can discuss their ideas with the community and where they can answer questions. There are nearly no limits. You can promote any kind of business you have in mind. Real Estate, Entertainment, Technology, Cryptospace, Art.

Avoteo will grow with the ideas of its community.

VOTING COMMUNITY´S BENEFITS

The role of the holders of the AVO token that have no specific interest in starting their own project will be to review all the content and to give their vote. Being critical in voting is essential, all community members are responsible for the quality of the projects that win the competition. The better the quality, the higher the success rate and the higher the success rate, the more the whole community will profit.

So holding the AVO Token gives you several advantages:

- ☞ Follow your favorite founder and support the project by upvoting it.
- ☞ Take part in governance votings on companies strategy
- ☞ Simply keep it in your wallet and take advantage of the redistribution
- ☞ Trade your AVO token on several DEX and CEX once listed

VOTING SYSTEM

The voting system is crucial, users can vote by giving upvotes, or down votes to projects, each wallet holding the minimal required amount of AVO tokens is entitled to one vote per project.

GOVERNANCE

Avoteo will be built around its community. Voting will not only be important to rate the different projects, but it will also be used to decide the direction of the project. On top of governance voting organized by the developers on important crossroads, it will also be possible for the community to suggest governance votes. If a proposed vote is supported by two thirds of the community members and reaches a predefined minimal number of votes, it will be held as an official governance vote and the outcomes will be respected by the developers.

SKILL MARKETPLACE

As a community driven project we also want to bring people together, some community members may not have specific ideas for a project, but they may have specific skills. Another goal of Avoteo is to bring the people with ideas and the people with the required skills to make those ideas a reality together. There will be a dedicated space where people with specific skills can advertise those, or where other members in need of someone with certain skills can make an advertisement to look for them. Perhaps you have a great idea for a new addictive mobile game, but you don't know how to build a mobile app, while someone else from the community has the skills to build apps but lacks the million-dollar idea. Using this feature, community members can start working together to come up with better and more realistic project proposals, which in turn Avoteo can help to fund.

Avoteo Holdings

Avoteo Holdings will be a legal entity that will be founded. As compensation for being funded, the winners of the funding competition will attribute a certain amount (depending on the total amount funded) of their profits to Avoteo holdings. The income of Avoteo Holdings will then again be shared with the Avoteo community and contribute to the funding wallet through the purchase of tokens on the open market. The only requirement for AVO token holders to share in these gains is to hold AVO tokens on the platform without moving them for a period of 12 months, after those 12 months and depending on the number of tokens that have been held for that period, each community member will receive a share of the income from Avoteo holdings, this share will be distributed in AVO tokens that will be bought at the open market. In other words: if the funded projects become a success, Avoteo holdings will start generating revenue and the community will profit more. A part of the profits from Avoteo holdings will also flow back into the funding wallet, to help accelerate the growth of the number of Avoteo funded projects.

Avo Token

The AVO token will be made available on the Binance Smart Chain.

The max supply will be 1,000,000,000; however, the circulating supply will decrease over time through manual burns if the community votes to do so.

Compared to many other projects in cryprospace the AVO token will have several use cases.

With our AVOTEO platform, built to be used in connection to the AVO token only, we will bring together AVO holders and users, as well as entrepreneurs all around the globe. To give them all the advantages of being part of our ecosystem.

TOKEN DISTRIBUTION

Out of the 1,000,000,000 tokens

300,000,000 will be distributed to the team, partners and advisors those tokens will have a vesting period of 12 months after the first listing on a DEX and will be released in tranches of 5% offer the following 20 month.

150,000,000 will be used for referrals.

50,000,000 will be used for giveaways, these could be for example airdrops, rewards for social competitions or they could be used as staking rewards. In each case these tokens will flow back to the Avoteo community

500,000,000 tokens will be sold during three rounds of ICOs.

ROUND 1

Private Sale: the tokens will be sold for the equivalent of $0.01 cents
The funds will be used for the development of the platform, the founding of Avoteo holding and hiring employees. Minimal purchase 50,000 AVO tokens, maximum purchase 1,000,000 AVO tokens. The tokens will have a vesting period of 9 months after the first listing after which 50% will be unlocked, 3 months later the remaining 50% will be unlocked.

ROUND 2

Presale Phase 1 the tokens will be sold for the equivalent of $0.02 cents
Minimum purchase 5,000 AVO, maximum purchase 1,000,000. The tokens will have vesting periods: 25% of the tokens will be unlocked directly upon listing, 25% will be unlocked 3 months after listing, 25% will be unlocked 6 months after listing and 25% will be unlocked 9 months after listing.
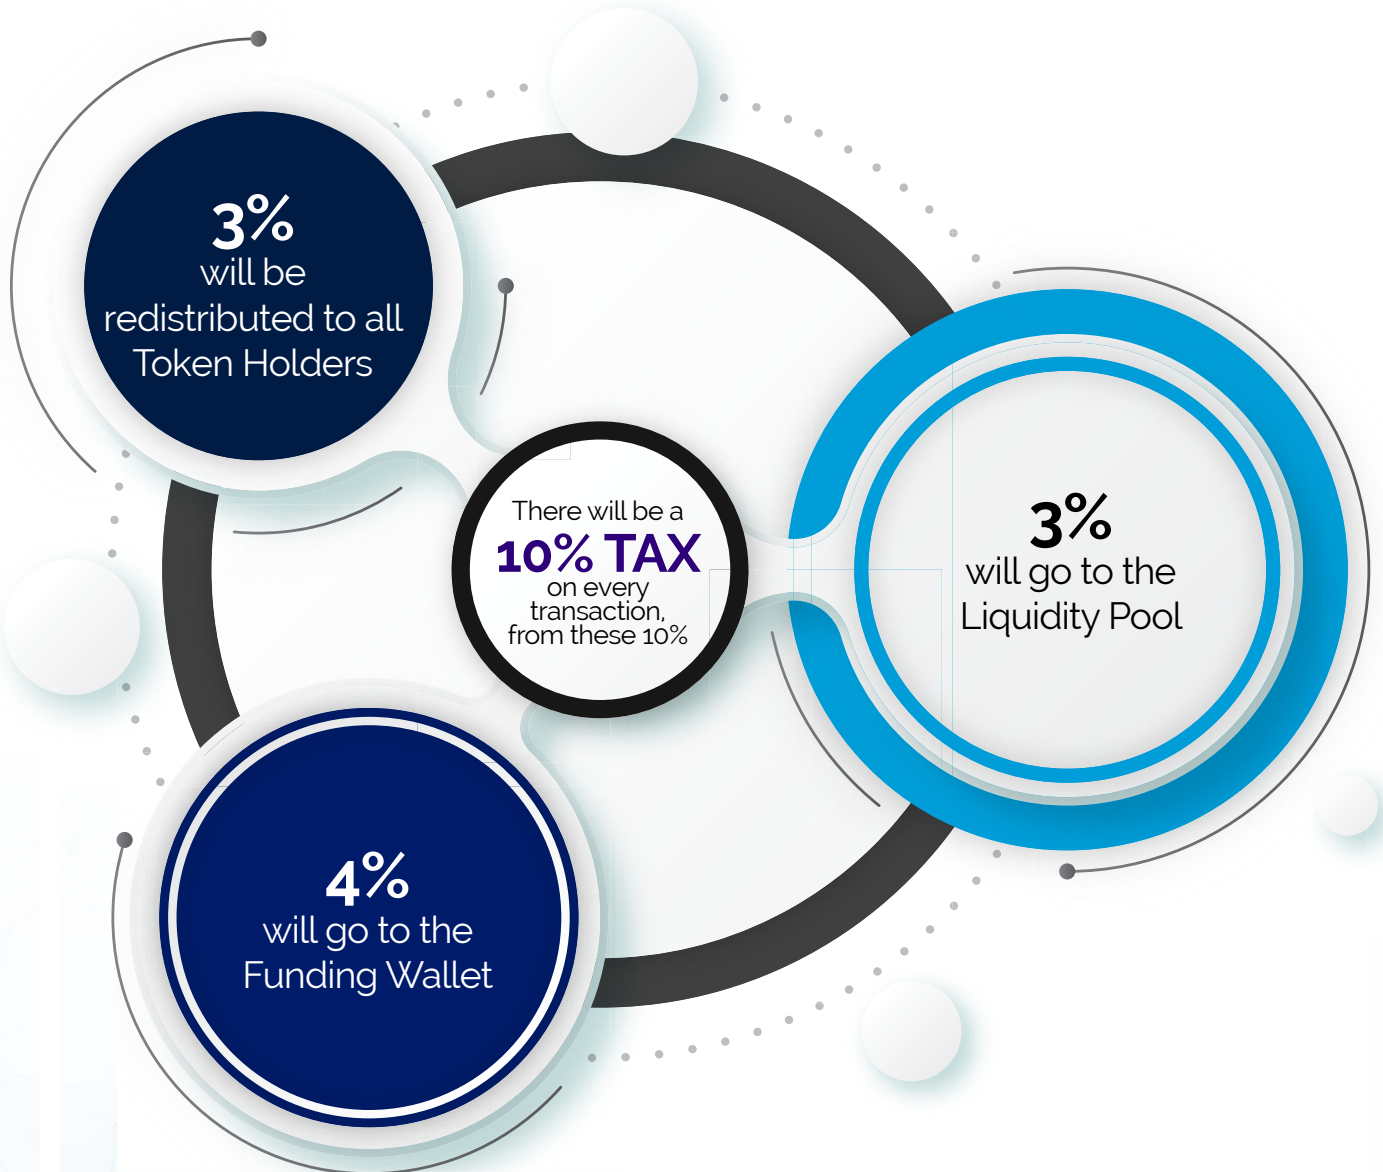

ROUND 3

Presale Phase 2 (crowd sale) the tokens will be sold for the equivalent of $0.05
No minimal, or maximum purchase amounts. The sold tokens will have no vesting period.

Unsold tokens from one round will be transferred to the next, and all unsold tokens after round 3 will be burned. Upon listing, the liquidity will be locked for a period of two years, the exception is when a governance vote by the community decides that tokens need to be unlocked for example to burn part of the tokens, community redistributions, or to facilitate further developments of the Avoteo ecosystem.

TOKENOMICS

3%
will be redistributed to all Token Holders

There will be a **10% TAX** on every transaction, from these 10%

3%
will go to the Liquidity Pool

4%
will go to the Funding Wallet

FUNDING WALLET

A crucial part of the Avoteo project is the funding wallet, we will fund projects using this wallet, which means that there is no need for our community to invest their own money, other than in buying their tokens. This aspect sets us apart from other crowdfunding platforms that require you to directly invest money into the funded projects. A financial goal will be specified and once that goal is reached the funding wallet will be used to fund the best projects as decided by the community. After the goal is reached, we will set the next financial goal for the funding wallet, which will then be used to fund additional projects. Here the community will have a voice and Avoteo will consider it in the decision.

Roadmap

The project is growing and changing every day. We try to provide a roadmap which is not obligatory and can experience changes and adjustments if it is for projects benefit. However we are determined to follow the steps provided in the roadmap as close as possible. If there will be a need of an adjustment, we will communicate this with our community through our social media channels.
